The Moral Collapse of the University Bruce W. Wilshire,1990 **The Moral Collapse of the University** Bruce Wilshire,1990-04-02 Reconstructing the “Uni-versity” Harvey J. Graff,2025-09-14 Slogans myths and isolated anecdotes are inadequate substitutes for documented history and contextual understanding Literature on the history of higher education is dominated by ahistorical and contextually ignorant slogans Seldom acknowledged in discussions of the decline or failure of the modern university is 1 how long it has been going on at least since the 1960s and 2 universities own complicity in this long complicated and contradictory process Myths intertwine inseparably with slogans to echo yet another lost cause Our collective as well as individual pasts provide essential lessons if we know how to read and learn from them More complicated is imagining a plausible better future for universities In Reconstructing the Uni versity From the Ashes of the Mega and Multi versity to the Futures of Higher Education Harvey J Graff bringing experience from over 50 years as a professor provides an accurate history of higher education redefining the issues and terms to establish a new agenda

The Stone Trumpet Richard A. Gibboney,1994-07-22 This is a book about school reform Fundamental school reform reforms that cultivate intelligence and predispose us to the democratic virtues **Swimming Lessons** David Ehrenfeld,2002-02-06 Never in history has life been so complicated and full of sudden changes Technology the environment and the way we work and relate to one another are all in upheaval With wit humor a calm voice and great authority Swimming Lessons gives a clear view of what our world has become not just our successes but also the destruction set loose by our own genius and inventions In addition it offers practical non utopian suggestions for keeping afloat in the dangerous waters of the 21st century s globalized civilization Whether it is describing a comical brainstorming session in a Washington boardroom or a close encounter with an Alaskan grizzly and her cubs Swimming Lessons is a delight to read Trained in history medicine and zoology David Ehrenfeld brings a grand perspective to his challenging task He writes not just as a scientist but as one who values and understands the social sciences and humanities as well In the first half of Swimming Lessons we learn to recognize the lies we live about education new military weapons systems biotechnology electronic pseudocommunities and accelerated obsolescence We also learn about the deadly corporate economics that affect every aspect of our lives even environmental conservation The second half reveals the pitfalls and opportunities in the main tasks we face relating to nature in a manmade world and restoring our damaged communities All to One Another Andrew A. Sorensen,2008 This book presents visionary perspectives on the changing roles of teaching research and outreach in higher education during our trying times All to One Another collects some of the most compelling recent articles and speeches of Andrew A Sorensen twenty seventh president of the University of South Carolina on the evolving place of institutions of higher learning at the local and global levels as good stewards of existing resources and as entrepreneurial innovators Informed by the varied experiences of his distinguished career as a university educator and administrator Sorensen stresses

in this concise volume the importance of building partnerships both on and off campus to foster the vitality of the university of pursuing new avenues in diversity technology and research to secure the investments of a dynamic base of constituents and of effectively managing the interconnected responsibilities needed more than ever by university leaders The specific subjects and occasions of these pieces vary greatly as do the duties and audiences of a modern university president but these statements are unified by a common vision of empowering hope for our future in the yet unfulfilled potential of teaching research and outreach of higher education

Multi-Level Governance in Universities Jetta Frost, Fabian Hattke, Markus Reihlen, 2016-06-03 Governing universities is a multi level as well as a highly paradoxical endeavor The featured studies in this book examine critically the multifaceted repercussions of changing governance logics and show how contradictory demands for scholarly peer control market responsiveness public policy control and democratization create governance paradoxes While a large body of academic literature has been focusing on the external governance of universities this book shifts the focus on organizations internal characteristics thus contributing to a deeper understanding of the changing governance in universities The book follows exigent calls for getting back to the heart of organization theory when studying

organizational change and turns attention to strategies structures and control mechanisms as distinctive but interrelated elements of organizational designs We take a multi level approach to explore how universities develop strategies in order to cope with changes in their institutional environment macro level how universities implement these strategies in their structures and processes meso level and how universities design mechanisms to control the behavior of their members micro level As universities are highly complex knowledge based organizations their modus operandi i e governing strategies structures and controls needs to be responsive to the multiplicity of demands coming from both inside and outside the organization
