Waring, David Weisburd, This tenth volume in the Advances in Criminological Theory series is dedicated to the work of Albert J. Reiss Jr It focuses on the relationship between crime and social organization that is so central to his work This focus rejects a view of crime solely as the action of atomistic individuals and sees the criminal justice system as inseparable from its social political and organizational context This perspective has had a resurgence in recent years and this volume brings together some of the most important scholars who have contributed to these developments Articles examine the social organization of crime itself the context of crime and the response to crime The concept of co-offending originally developed by Reiss is explored both as a way of improving understanding of juvenile offending and as a

framework for understanding patterns of criminal organization across crime types and the relationship of criminal to licit organization Other articles recast social disorganization theory in light of recent theoretical and empirical developments They argue for a version of control theory that incorporates internal contextual and state focused dimensions Organizational actors both as offenders and as governmental agencies responding to crime are explored Building from Reiss's groundbreaking work on policing a group of articles on policing examine organizational change through reorganization the adoption of strategies such as community policing and the increased use of empirical evidence complicated by routines organizational culture and political constraints Taken together these works develop new connections between dimensions of social organization and renew the social organization perspective on crime and criminal justice Contributors include Diane Vaughan Joan McCord Kevin P Conway Elin Waring Felton Earls Beat Mohler Peter Manning Stephen Mastrofski Lawrence Sherman David Weisburd Robert Sampson David F Greenberg Margaret Kelley Robin Tamarelli and Jeremy Travis

The Concept of Dilemma in Legal and Judicial Ethics Przemysław Kaczmarek, Krzysztof J. Kaleta, Paweł Łabieniec, Marcin Pieniążek, Paweł Skuczyński, Sebastian Sykuna, 2018-10-12 Judges and lawyers have to shape their moral competences in order to maintain their professional ethics at a high standard if they want to effectively meet the challenges that modern society will throw at them This requirement is due to the growing expectation that they will be socially and morally responsible for the law Thus the need to place ethics at the heart of legal education and to make ethical reflection pervasive in academic courses becomes more obvious every day Using the concept and examples of moral dilemmas is a way of facilitating this task The main purpose of this book is to analyse the concept of moral dilemma in context of judicial and legal ethics and to provide material for legal education The structure of this book is designed with this double aim in mind The theoretical part presents the concept of dilemmas on grounds of metaethics and the perspectives for its application in a professional legal context The former encompasses situations of conflict of duties or obligations in which the choice of one conduct necessarily prevents a different conduct and therefore leads to an unacceptable outcome Hence the situation of dilemma always involves an issue of moral responsibility and the problem of dirty hands How such situations are present in legal practice and how to deal with them is the main concern of this part The considerations are divided into three levels of reflection deontological axiological and moral responsibility The practical part of the book contains an overview of 150 dilemmas that can be useful in legal ethics or other legal courses The dilemmas are divided into chapters covering the following branches of law criminal law civil and commercial law family and custody law labour and social security law and constitutional law Every dilemma presents a description of the facts a reconstruction of dilemma its standard solution and

some critical remarks from a meta ethical perspective The dilemmas cover situations regularly met in everyday practice as well as examples of more exceptional challenges in connection with constitutional crises that have occurred in Poland in recent years

A Theory of Urbanity Anton Zijderveld, 2017-09-29 Cities provide for people not just functionally in terms of jobs obligations and practical pursuits but also and above all emotionally We like some cities and detest others Despite shared rationalizations and common modes of administration and design each city has its own culture A culture is typically human in that it contains all dimensions of the human personal condition from the lowest to the most sublime Urban culture comprises both economic and civic culture and is the source of a city's vitality For today's urban sprawls which have a weak and failing economic and civic culture the task of the urban administration and various economic and civic organizations is to strengthen conditions that can prevent the emergence of urban anomie With suburbanization the edge city and the emergence of cyberspace some argue that cities as integrated places of working and living are things of the past Zijderveld argues that people are and remain social animals who like and need one another's company particularly in their economic socio cultural and political activities Throughout the ages cities have provided the environment in which people fulfill these needs Anton Zijderveld discusses urban preferences the organizations and ramifications of urbanity the modernization of urban culture the uneasy alliance between urbanity and the interventionist state and the cultural dimensions of urban renewal Zijderveld sees the economic and civic culture of the city as the centerpiece of contemporary urban management and contemporary urban democracy In this sense the new technology is an ally of the new urban renewal Most postmodern treatises on the end of the city are impressionistic and unsystematic In contrast Zijderveld puts the qualitative dimensions of city life into focus catching its pulse and cultural rhythms in a systematic context that prior studies have lacked As such it will be of great interest to urban administrators p
