Mozart's Così Fan Tutte Ian Woodfield, 2008 A groundbreaking new approach proposes answers to many of the opera's unresolved questions WINNER of the Mozart Society of America Marjorie Weston Emerson Award for 2008 This study proposes a hypothesis to account for some of the opera's long standing problems It suggests that Mozart considered the idea that the pairings in Act II should not be crossed that each of the two disguised officers should seek to seduce his own woman Although this alternative plot structure was rejected signs of it may remain in the final score in the uneasy co existence of dramatic duplicity and musical sincerity and in the ending in which the easy restitution of the original couples seems not to take account of the new passions that have been aroused Evidence that several of the singers were re cast is also presented In addition to these radically new ideas about the conceptual genesis of Così the book also provides a full account of the work's compositional history based on early Viennese and Bohemian copies Four different versions are identified including a significant revision in which Mozart removed the Act II finale canon The composer's probable involvement in the 1791 Prague production is also discussed IAN WOODFIELD is Professor of Historical Musicology School of Music and Sonic Arts Queen's University Belfast

Music History During the Renaissance

Period, 1520-1550 Blanche M. Gangwere, 2004-10-30 This annotated chronology of western music is the third in a series of outlines on the history of music in western civilization. It contains a 120 page annotated bibliography followed by a detailed documented outline that is divided into ten chapters. Each chapter is written in chronological order with every line being documented by means of abbreviations that refer to the annotated bibliography. There are short biographies of the theorists and detailed discussions of their works. The information on music is organized by classes of music rather than by composer. Also included are lists of manuscripts with descriptions of their contents and notations as to where they may be found. The material for the outline has been taken from primary and secondary sources along with articles from periodicals. Like the other two volumes in this series *Music History from the Late Roman through the Gothic Periods 313-1425* and *Music History During the Renaissance Period 1425-1520*, this volume will be an important research tool for anyone interested in music history.

Songs of the Vietnam Conflict James E. Perone, 2001-08-30 Offering the widest scope of any study of one of popular music's most important eras, *Songs of the Vietnam Conflict* treats both anti-war and pro-government songs of the 1960s and early 1970s from widely known selections such as *Give Peace a Chance* and *Blowin' in the Wind* to a variety of more obscure works. These are songs that permeated the culture through both recordings and performances at political gatherings and concerts alike, and James Perone explores the complex relationship between music and the society in which it is written. This music is not merely an indicator of the development of the American popular song; it both reflected and shaped the attitudes of all who were exposed to it. Whereas in previous wars musicians rallied behind the government in the way of Aaron Copland and Samuel Barber, the Vietnam conflict provoked anger, frustration, and rage, all of which comes through in the songs of the time. This reference work provides indispensable coverage of this phenomenon in chapters devoted to Anti-War Songs, Pro-Government Songs, and what might be called Plight of the Soldier or Veteran songs. A selected discography guides the reader to the most notable recordings, all of which together provide a unique and important perspective on perhaps the 20th century's most contentious time.

Music Library and Research Skills Jane Gottlieb, 2017 Concise and engaging, this text covers a wide range of reference sources for research in all genres of music. Through this practical introduction to the key concepts of music research, students will develop a firm understanding of the tools used to gather data, including what types of sources exist, how they are arranged, and how they may best be used to do research.

Don Giovanni Captured Richard Will, 2024-05-31 *Don Giovanni Captured* considers the life of a single opera, engaging with the entire history of its recorded performance. Mozart's opera *Don Giovanni* has long inspired myths about eros and masculinity. Over time, its performance history has revealed a growing trend toward critique, an increasing effort on the part of performers and directors to highlight the violence and predatoriness of the libertine central character alongside the suffering and resilience of his female victims. In *Don Giovanni Captured*, Richard Will sets out to analyze more than a century's worth of recorded performances of the opera, tracing the ways it has changed from one performance to another and from one

generation to the next Will consults audio recordings starting with wax cylinders and 78s as well as video recordings including DVDs films and streaming videos As Will argues recordings and other media shape our experience of opera as much as live performance does Seen as a historical record opera recordings are also a potent reminder of the refusal of works such as Don Giovanni to sit still By choosing a work with such a rich and complex tradition of interpretation Will helps us see Don Giovanni as a standard bearer for evolving ideas about desire and power both on and off the stage
