not only the most systematic philosophical exposition by any early Confucian thinker but also account of virtually every aspect of the intellectual cultural and social life of his time Xunzi was a social critic and intellectual historian as well as a philosopher He was also extremely active in the political and academic circles of his day and his teaching had a great influence on the initial institutional organization of a unified China under the first Qin emperor an influence that continued though often unacknowledged through later centuries This is the first of three volumes that will constitute the first complete translation of Xunzi into English The present volume consists of a general introduction and Books 1-6 dealing with self cultivation learning and education The translation is accompanied by substantial explanatory material identifying technical terms persons and events detailed introductions to each book and extensive annotation with characters when desirable indicating the basis of the translations The general introduction recounts the biography of Xunzi his later influence the intellectual world in which he lived and the basic terms that the ancient Chinese used to conceptualize nature and society

International Law as World Order in Late Imperial China Rune Svarverud, 2007-08-31 This is the first systematic analysis of the early introduction and reception of international law as a Western political and legal science in China International law in late imperial China is studied both as part of the introduction of the Western sciences and as a theoretical orientation in international affairs between 1847 and 1911 The first chapters serve the purpose of analysing the political institutional intellectual and linguistic process of adapting the theories of international law to the Chinese context language The second major part of the book is dedicated to the discourse on China and world order within this framework
