Education Gwyneth Owen-Jackson,2013-08-21 Design and Technology has long held a controversial place on the school curriculum with some arguing that it shouldn t be there at all This book presents and questions considered arguments and judgements and explores the major issues that all D T teachers encounter in their daily professional lives In exploring some of the key debates it encourages critical reflection and aims to stimulate both novice and experienced teachers to think more deeply about their practice and link research and evidence to what they have observed in schools Written by expert design and technology education professionals chapters tackle established and contemporary issues enabling you to reach informed judgements and argue your point of view with deeper theoretical knowledge and understanding Debates covered include What is the purpose of design and technology Is it a vocational or academic subject What is the place of design and technology within the STEM agenda What knowledge and skills do teachers really need What does the design and technology gender divide mean for schools and pupils Is it a creative subject What is the future for design and technology With its combination of expert opinion and fresh insight *Debates in Design and Technology Education* is the ideal companion for any student or practising teacher engaged in initial training continuing professional development or Masters level study

Resources in Education ,2001-10 **Home Economics & Technology** ,1992 **Education Outside the Classroom** Great Britain. Parliament. House of Commons. Education and Skills Committee,2005 The Committees report examines the wide range of outdoor learning experiences from lessons held within school grounds to residential expeditions abroad and considers the place of outdoor learning in the curriculum from foundation stage to higher education Issues discussed include the value of outdoor learning and the decline of opportunities for educational opportunities outside the

classroom the barriers that deter schools from teaching outside the classroom including perceptions of risks in school trips the resources and curriculum time available for such trips availability and costs involved policy options for the Department for Education and Skills to help encourage schools improve and expand provision for outdoor learning and funding implications The Committees recommendations include that the DfES should issue a Manifesto for Outdoor Learning which gives all students the right to outdoor learning and which should attract a similar funding level to the music manifesto around 30 million in order to deliver real change

Bringing Communities Together Bev France,Vicki

Compton,2012-07-30 Over recent years connective partnerships between educational communities and sectors outside of education have become increasingly popular One significant reason behind this popularity has the expansion of information and communication technologies which have increased access and provided mechanisms for ongoing connections to be made between differing worlds But successful connections that cross cultural boundaries are not easy to establish and even harder to maintain in ways that are mutually beneficial This book focuses on science and technology connective ventures and the complexity inherent in bringing such worlds together The authors have been in the business of developing such connections and this book brings them together to describe how and why making connections can support the science technology education sector the technology science communities and the wider sociocultural life we all inhabit A range of illustrative examples of connections in action provide an empirical basis from which to explore and gain insight into the issues for and potential of such connective ventures alongside a rich mix of critical commentary arguments cautions and challenges Five key principles have been distilled from the collective experience and wisdom of the authors serving to capture that which underpins effective and efficient connective initiatives Each principle is accompanied by a set of questions that reflect the issues raised and successes illustrated throughout the book It is hoped these principles and questions will serve to guide people interested in developing funding and or participating in future connective initiatives in the fields of science and technology
