Slide Rule The Autobiography Of An Engineer:

Slide Rule Nevil Shute,1954 Nevil Shute was a pioneer in the world of flying long before he began to write the stories that made him a bestselling novelist This autobiography charts Shute s path from childhood to his career as a gifted aeronautical engineer working at the forefront of the technological experimentation of the 1920s and 30s The inspiration for many of the themes and concerns of Shutes novels can be found in this enjoyable and enlightening memoir **Slide Rule.**

The Autobiography of an Engineer. [With a Portrait.]. Nevil Shute,1966 SLIDE RULE. THE AUTOBIOGRAPHY OF AN ENGINEER. NEVIL SHUTE. Nevil Shute,1956 *Slide Rule* Nevil Shute (Flugzeugkonstrukteur, Schriftsteller, England, Australien),1954 *An Engineer's Alphabet* Henry Petroski,2011-10-10 Written by America s most famous engineering storyteller and educator this abecedarium is one engineer s selection of thoughts quotations anecdotes facts trivia and arcana relating to the practice history culture and traditions of his profession The entries reflect decades of reading writing talking and thinking about engineers and engineering and range from brief essays to lists of great engineering achievements This work is organized alphabetically and more like a dictionary than an encyclopedia It is not intended to be read from first page to last but rather to be dipped into here and there as the mood strikes the reader In time it is hoped this book should become the source to which readers go first when they encounter a vague or obscure reference to the softer side of engineering **Umberto Nobile And the Arctic Search for the Airship Italia** Garth Cameron,2017-09-09 By the time it

was over eight of the crew and nine rescuers were dead and scores more had been put in harm s way The disappearance and search for the airship Italia was headline news all over the world for months after its last radio message on 25 May 1928 It had reported being to the north east of its base at Kings Bay on the Arctic island of Spitsbergen returning from a long flight to Greenland and the North Pole Ships aircraft and men from many countries converged on Kings Bay to participate in the rescue effort The Italian airship designer and pilot Umberto Nobile had flown to the North Pole and beyond in 1926 He resolved to return to the Arctic with a new airship in 1928 The expedition had geographical and scientific aims but the political environment was also an important motivator Benito Mussolini and his fascist party had come to power in 1922 and a successful expedition to the Arctic would be excellent propaganda *Delphi Complete Works of Nevil Shute (Illustrated)*

Nevil Shute,2020-06-11 Nevil Shute was an English novelist and aeronautical engineer who spent his later years living in Australia His novels are written in a simple highly readable style with clearly delineated plots An enduring theme of his novels is the dignity of work spanning all classes His famous novel *On the Beach* 1957 reflects his pessimism for humanity in the atomic age while *A Town like Alice* 1950 tackles themes of emigration and racism as the heroine seeks economic prosperity in a disadvantaged outback community Several of Shute s novels explore the boundary between accepted science and rational belief on the one hand and mystical or paranormal possibilities on the other The author is noted for his unique talent of weaving his technical knowledge of engineering into the texture of his narratives For the first time in publishing

The Early Development of the Aviation Industry

Malcolm Abbott,Jill Bamforth,2019-05-09 The Early Development of the Aviation Industry Entrepreneurs of the Sky provides an introduction to the world of the early aviation

industry and the business endeavours of the original aviators. Many of the first pioneers who flew heavier than air planes went on to develop considerable industrial concerns. In doing so they exhibited a number of entrepreneurial qualities which provide useful case studies for those interested in studying how successful entrepreneurs create or develop opportunities at the inception and emergence of high tech industries. This book looks at the careers of pioneer aviators in the United States, Britain and France such as A. V. Roe, Thomas Sopwith, Glenn Curtiss and William Boeing. It examines this group of entrepreneurs during the start up and early development stages of an emerging industry undergoing considerable technological change and relates this experience to contemporary studies and experiences of entrepreneurship. The book explores what made these men successful in their entrepreneurial endeavours to help promote a better understanding of what makes an entrepreneur and what business and economic conditions are needed to allow such men to be successful. This book makes a major contribution to our knowledge of the development of the twentieth century economy and is essential reading for students and academics who are interested in the development of aviation and the nature of entrepreneurial behaviour.
