The Molecular Designing Of Materials And Devices:

The Molecular Designing of Materials and Devices Massachusetts Institute of Technology. Laboratory for Insulation Research, Arthur Robert Von Hippel, 1965-01 Nature designs everything from atoms hence we should be able to create any feasible kind of material and device with foresight if we understood the Periodic System in all its implications Yet like weather forecasters we find ourselves still members of the gambling profession This was the tenor of the third summer session on modern materials research sponsored by the Laboratory for Insulation Research at MIT in 1963 Its program organized by Arthur R von Hippel Institute Professor and one of the pioneers of modern materials research ranged from the electronic structure of atoms and molecules to the design patterns and operating mechanisms of living systems The participants came from a gamut of professions and the course seemed threatened by a confusion of tongues instead the two weeks of learning and debating proved so full of interest and enjoyment that the majority of the lecturers voted for a joint publication of their contributions Thus this volume on The Molecular Designing of Materials and Devices joins its three predecessors Dielectrics and Waves Dielectric Materials and Applications and Molecular Science and Molecular Engineering already established as classics in their fields This volume advances its theme in three stages from the architecture of materials to the properties produced by structures and compositions and to the devices employing such properties with increasing sophistication Since this vast panorama is conjured by twenty five experts with highly individual outlooks an extensive survey traces the problems and thoughts that connect chapter to chapter The text is supported by a great number of illustrations and a comprehensive index gives additional unity and long range usefulness to the presentation The contributors are Ali S Argon David J Epstein John B Goodenough Shinya Inou Thomas A Kaplan Hendrik A Kasens Helen D Megaw Erwin W M Heinz Raether Gert W Rathenau Albert Rose Murray D Rosenberg Walter A Rosenblith Heinz Schlicke Francis O Schmitt James H Schulman John C Slater Alexander Smakula Edward V Somers S Donald Stookey Morris Tanenbaum Albert von Engel Arthur von Hippel Carl Wagner Herbert Zeiger and Clarence Zener
