The Move To Europe:

Young EU Migrants in London in the Transition to Brexit Aija Lulle, Laura Moroşanu, Russell King, 2022-08-09 London has long been a magnet for migrants millions of whom have been attracted by its economic educational and cultural roles as a truly global city This book examines recent European migration to the London region through the narrated experiences of a large number of younger migrants from old and new EU member states of varying educational and skill backgrounds The research opens multiple windows into the lives of young EU migrants from six different countries before and after the 2016 Referendum on Brexit A key concept which lies at the core of the analysis is the interrelationship between geographical mobility and the youth transition to adulthood Among the dimensions documented are study and employment trajectories housing and social inclusion identity and belonging and transnational ties By paying attention to young people's own accounts of their mobile lives the research pushes the boundaries of traditional understandings of youth transitions and life paths As an indispensable account of young EU migrants during the Brexit process the book will appeal to undergraduate and postgraduate students across the social sciences especially those interested in migration youth studies and European studies as well as researchers and policy makers

Gender, Movement and Safety Jasmin Lilian Diab, 2019-02-18 This book looks into the sexual assault of irregular illegal immigrant women and girls throughout their arrival to the European Union borders and borderlands between the period of 2011 and 2018 through an Intersectional lens It intends to analyze this sensitive human rights issue through grasping the cultural obstacles and procedures at European borders which have fueled the violation of this fragile migrant group's human rights while also supporting this argument with academic research statistical data and reports on irregular migration from international and regional organizations security mechanisms at borders and statistics on sexual abuse and exploitation during the aforementioned period It intends to explore the manner in which several factors and developments at European borders and in the borderlands have resulted in a more dangerous migration journey for these women and girls as well as the manner in which these developments further perpetuate the likelihood of sexual violence of migrants and female migrants in particular This book aims to comprehend the linkages between academic research and the supporting statistical information

through the lens of Intersectionality Theory a theory which will allow for the issue to be tackled across its different layers and across all the intersections and overlaps these layers create This book highlights multiple instances of sexual violence throughout the journey and upon arrival of these migrant women and girls to the European borders and borderlands and subsequently emphasizes that these events further perpetuate the vulnerability to sexual assault for irregular migrant women due to the very illegal nature of their journeys Through this lens this process is examined across power dynamics security legal status and gender Through examining these realities and power systems it becomes evident that this particularly vulnerable group of women and girls from developing countries escaping war economic burdens and conflict are ostracized and subordinated in a number of interconnected patterns This book highlights a need for more gender sensitive policies because the group of women in question has close to no viable resource for justice within a system that currently acts against them and views them as criminal or illegal

Women and Borders Seema Shekhawat,Emanuela C. Del Re,2017-12-18 Borders whether settled or contested violent or calm closed or open may have a direct and often acute human impact Those affected may be people living nearby those attempting to cross them and even those who succeed in doing so At the border vulnerable refugee and migrant communities especially women are exposed to state centred boundary practices paving the way for both their

alienation and exploitation The militarization of borders subjugates the very position of women in these marginalized areas and often subjects them to further victimization which is facilitated by patriarchal socio cultural practice Structural violence is endemic to these regions and gender interlocks with their perimeters to reinforce and shape violence This book locates gender and violence along geographical edges and critically examines the gendered experiences of women as global border residents and border crossers Broadly it explores two questions First what are women s experiences of engaging with borders Second where are women positioned in the theory and practice of marking remarking and demarking these margins Offering a nuanced and thorough approach this book suggests that research on borders and violence needs to focus on how bordered violence shapes the embodiment of gender identity and norms and how they are challenged It examines an array of issues including forced migration trafficking and cross border ties to explore how gender and borders intersect
