Diane Ackerman, author of *The Zookeeper's Wife*, Nicknamed the Real Life Lorax by National Geographic, the biologist, botanist, and conservationist Meg Lowman, aka CanopyMeg, takes us on an adventure into the eighth continent of the world's treetops along her journey as a tree scientist and into climate action. Welcome to the eighth continent. As a graduate student exploring the rain forests of Australia, Meg Lowman realized that she couldn't monitor her beloved leaves using any of the usual methods. So she put together a climbing kit, she sewed a harness from an old seat belt, gathered hundreds of feet of rope, and found a tool belt for her pencils and rulers. Up she went into the trees. Forty years later, Lowman remains one of the world's foremost arbornauts, known as the Real Life Lorax. She planned one of the first treetop walkways and helps create more of these bridges through the eighth continent all over the world. With a voice as infectious in its enthusiasm as it is practical in its optimism, *The Arbornaut* chronicles Lowman's irresistible story. From climbing solo hundreds of feet into the air in Australia's rainforests to measuring tree growth in the northeastern United States from searching the redwoods of the

Pacific coast for new life to studying leaf eaters in Scotland s Highlands from conducting a BioBlitz in Malaysia to conservation planning in India and collaborating with priests to save Ethiopia s last forests Lowman launches us into the life and work of a field scientist ecologist and conservationist She offers hope specific plans and recommendations for action despite devastation across the world through trees we can still make an immediate and lasting impact against climate change A blend of memoir and fieldwork account The Arbournaut gives us the chance to live among scientists and travel the world even in a hot air balloon It is the engrossing uplifting story of a nerdy tree climber the only girl at the science fair who becomes a giant inspiration a groundbreaking ground defying field biologist and a hero for trees everywhere Includes black and white illustrations
