Fischbein, 1975-11-30 About a year ago I promised my friend Fischbein a preface to his book of which I knew the French manuscript Now with the printer's proofs under my eyes I like the book even better than I did then because of and influenced by new experiences in the meantime and fresh thoughts that crossed my mind Have I been influenced by what I remembered from the manuscript If so it must have happened unconsciously But of course what struck me in this work a year ago struck a responsive chord in my own mind In the past mathematics teaching theory has strongly been influenced by a view on mathematics as a heap of concepts and on learning mathematics as concepts attainment Mathematics teaching practice has been jeopardised by this theoretical approach which in its most dangerous form expresses itself as a radical atomism To concepts attainment Fischbein opposes acquisition of intuitions In my own publications I avoided the word intuition because of the variety of its meanings across languages For some time I have used the term constitution of mathematical objects which I think means the same as Fischbein's acquisition of intuitions indeed as I view it constituting a mental object precedes its conceptualising and under this viewpoint I tried to observe mathematical activities of young children **The Works of the Honourable Robert Boyle** Robert Boyle, Thomas Birch, 1744 SUCCESSFUL FARMING DES MOINES IOWA: THE DISCOVER CHRISTMAS 1909, 1909 Official Gazette of the United States Patent and Trademark Office United States.
