Hövelmann, Hans Michels, 2017 Dutch journalist Piet Hein Hoebens 1948-1984 held a unique position in the controversies between proponents and skeptics of parapsychology and related fields While he described himself as a card carrying skeptic with strong ecumenical leanings even many of his nominal opponents appreciated his work and his penetrating open minded criticism Hoebens constructive influence on the culture of responsible scientific exchange is felt to this day The editors have collected and mostly translated more than 40 of Hoebens most significant writings about half of which were never published in English before The editors also added editorial introductions to all chapters to elucidate their original contexts and their lasting relevance Therefore the book is more than a commemoration of an important author it provides valuable insights into the history of parapsychology and its skeptical reflections Back cover *Storytelling in Film and Television* Kristin Thompson, 2003 Derided as simple dismissed as inferior to film famously characterized as a vast wasteland television nonetheless exerts an undeniable apparently inescapable power in our culture The secret of television's success may well lie in the remarkable narrative complexities underlying its seeming simplicity complexities Kristin Thompson unmask in this engaging analysis of the narrative workings of television and film After first looking at the narrative techniques the two media share Thompson focuses on the specific challenges that series television presents and the tactics writers have devised to meet them tactics that sustain interest and maintain sense across multiple plots and subplots and in spite of frequent interruptions as well as weeklong and seasonal breaks Beyond adapting the techniques of film

Thompson argues television has wrought its own changes in traditional narrative form Drawing on classics of film and television as well as recent and current series like Buffy the Vampire Slayer The Sopranos and The Simpsons she shows how adaptations sequels series and sagas have altered long standing notions of closure and single authorship And in a comparison of David Lynch's Blue Velvet and Twin Peaks she asks whether there can be an art television comparable to the more familiar art cinema

The Nicola Tesla UFO Connection Patrick Gunn, 2025-06-28 This compelling book explores the mysterious legacy of Nikola Tesla and his potential connection to unidentified aerial phenomena and extraterrestrial communication Blending history science and conspiracy theories it examines Tesla's groundbreaking inventions secret experiments and the hidden mysteries surrounding his work The narrative delves into whether Tesla's visions of wireless energy and advanced technologies may have inadvertently or intentionally linked to UFO presence and alien signals It also investigates credible eyewitness accounts declassified government documents and modern UFO phenomena raising questions about the possible use of Tesla inspired technology in secret projects Rich with speculation and scientific analysis this book invites readers to rethink the boundaries between science myth and the unexplained highlighting the enduring fascination with Tesla's genius and the possibility of extraterrestrial life An intriguing journey into one of history's most enigmatic figures and the mysteries that continue to surround him

The Brood of Time Terence Barnett Magness, 2009 What would two literary geniuses have in common especially when they come from entirely different social backgrounds and societies and a different point in time Many as this unique analysis of Shakespeare and Tolstoy shows The book has two parts the first is on Leo Tolstoy and the second on William Shakespeare and runs to a total of 470 pages The author analyses these literary figures through their personalities and their respective works through their internal turmoil and torment as moral beings wrestling with the vicissitudes and inequities of life These literary giants' consciences and actions are examined in minute detail from the perspective of the Law of Karma as it is understood in Buddhism Theravada Buddhism to be precise The stories that these writers told bespeak of their own trials and tribulations foibles and insecurities of life as well as their struggle with social issues of the day Whereas Tolstoy being an aristocrat was prepared to speak his mind loud and clear about the injustices of his society and be ridiculed for his views and his own actions in contrast Shakespeare wasn't prepared to do so largely because of his relatively low social status which obliged him to suck up to the aristocratic and royal classes It was a matter of earning a living for Shakespeare at the pleasure of the powers that were otherwise he wouldn't have survived and prospered financially There are interesting instances where the author highlights similarities between the two historical literary figures and explained why Tolstoy disdained Shakespeare for example for his inability to speak his mind and the hypocrisy of his works' characters Also surprisingly to many Tolstoy even disdained his early works War and Peace and Anna Karenina in the twilight of his life Why The analyses present such an interesting insight into the lives of these two great literary giants as to keep one not only entertained but intrigued as to how karma had wrought their lives and how karma molded them so how

kamma has made Tolstoy so different from his antecedent self Shakespeare if one accepts that Tolstoy was a chip of the old English block but that the genius of his pen remained as finely tuned and accomplished as he was in his previous life as the celebrated English Bard Everything You Always Wanted to Know about the Special Theory of Relativity But Were Afraid to Ask Kenneth Knight, 2005-02 It is the author's belief that while almost everyone has heard of $E=mc^2$ very few people really know much about it Unfortunately most books on the subject either require a knowledge of higher mathematics or they leave too much inadequately explained In this book the author attempts to steer a middle course explaining the subject as fully as possible yet keeping it easy to understand
