Sports Science Research and Technology Support Jan Cabri,João Barreiros,Pedro Pezarat Correia,2015-10-07 This book constitutes thoroughly revised and selected papers from the Second International Congress on Sports Science Research and Technology Support icSPORTS 2014 held in Rome Italy in October 2014 The 8 thoroughly revised and extended papers presented in this volume were carefully reviewed and selected from originally 131 submissions **Teaching Beginners to Ski** Dr. John T. Whiting, **Modelling Nature: An Opinionated Introduction to Scientific Representation** Roman Frigg,James Nguyen,2020-09-02 This monograph offers a critical introduction to current theories of how scientific models represent their target systems Representation is important because it allows scientists to study a model to discover features of reality The authors provide a map of the conceptual landscape surrounding the issue of scientific representation arguing that it consists of multiple intertwined problems They provide an encyclopaedic overview of existing attempts to answer these questions and they assess their strengths and weaknesses The book also presents a comprehensive statement of their alternative proposal the DEKI account of representation which they have developed over the last few years They show how the account works in the case of material as well as non material models how it accommodates the use of mathematics in scientific modelling and how it sheds light on the relation between representation in science and art The issue of representation has generated a sizeable literature which has been growing fast in particular over the last decade This makes it hard for novices to get a handle on the topic because so far there is no book length introduction that would guide them through the discussion Likewise researchers may require a comprehensive review that they can refer to for critical evaluations This book meets the needs of both groups **Ski** ,1989-05
