Skull Of Australopithecus Afarensis:

The Skull of Australopithecus Afarensis William H. Kimbel, Yoel Rak, Donald C. Johanson, 2004 The book is the most in depth account of the fossil skull anatomy and evolutionary significance of the 3.6 million year old early human species *Australopithecus afarensis* Knowledge of this species is pivotal to understanding early human evolution because 1 the sample of fossil remains of *A. afarensis* is among the most extensive for any early human species and the majority of remains are of taxonomically informative skulls and teeth 2 the wealth of material makes *A. afarensis* an indispensable point of reference for the interpretation of other fossil discoveries 3 the species occupies a time period that is the focus of current research to determine when where and why the human lineage first diversified into separate contemporaneous lines of descent Upon publication of this book this species will be among the most thoroughly documented extinct ancestors of humankind The main focus of the book its organizing principle is the first complete skull of *A. afarensis* specimen number A.L. 444-2 at the Hadar site Ethiopia the home of the remarkably complete 3.18 million year old skeleton known as Lucy found at Hadar by third author D. Johanson in 1974 Lucy and other fossils from Hadar together with those from the site of Laetoli in Tanzania were controversially attributed to the then brand new species *A. afarensis* by Johanson T. White and Y. Coppens in 1978 However a complete skull which would have quickly resolved much of the early debate over the species proved elusive until second author Y. Rak's discovery of the 444 skull in 1992 The book details the comparative anatomy of the new skull and the cast of its brain analyzed by R. Holloway and M. Huan as well as of other skull and dental finds recovered during the latest ongoing field work at Hadar and analyzes the evolutionary significance of *A. afarensis* in the context of other critically important discoveries of earliest humans made in recent years In essence it summarizes the state of knowledge about one of the central subjects of current paleoanthropological investigation

The Human Career Richard G. Klein, 2024-05-31 Since its publication in 1989 *The Human Career* has proved to be an indispensable tool in teaching human origins This substantially revised third edition retains Richard G. Klein's innovative approach while showing how cumulative discoveries and analyses over the past ten years have significantly refined our knowledge of human evolution Klein chronicles the evolution of people from the earliest primates through the emergence of fully modern humans within the past 200,000 years His comprehensive treatment stresses recent advances in knowledge including for example ever more abundant evidence that fully modern humans originated in Africa and spread from there replacing the Neanderthals in Europe and equally archaic people in Asia With its coverage of both the fossil record and the archaeological record over the 2.5 million years for which both are available *The Human Career* demonstrates that human morphology and behavior evolved together Throughout the book Klein presents evidence for alternative points of view but does not hesitate to make his own position clear In addition to outlining the broad pattern of human evolution *The Human Career* details the kinds of data that support it For the third edition Klein has added numerous tables and a fresh citation system designed to enhance readability

especially for students He has also included more than fifty new illustrations to help lay readers grasp the fossils artifacts and other discoveries on which specialists rely With abundant references and hundreds of images charts and diagrams this new edition is unparalleled in its usefulness for teaching human evolution *Biology Coloring Workbook* I.
