

A scenic landscape at sunset or sunrise. The sun is low on the horizon, casting a warm, golden glow across the sky and the landscape. A road curves through the scene, bordered by tall grass and a steep, rocky hillside. A faint rainbow is visible in the sky, arching over the road. The overall mood is serene and contemplative.

Very little is needed for everything
to be upset and ruined, only a
slight lapse in reason.

Capturing Light Michael Freeman,2014-06-20 In almost all photography it's the quality of light that makes or breaks the shot For professional photographers chasing the light waiting for it sometimes helping it and finally capturing it is a constant preoccupation and for some an obsession Drawing on four decades of doing just this Michael Freeman takes a simple but practical approach to reacting to and capturing photography's most important commodity There are just three sections titled *Waiting Chasing and Helping* *Waiting* explains the kinds of lighting that photographers can anticipate and plan for while *Chasing* explores the transient serendipitous light that photographers have to work quickly to exploit *Helping* the final and most technical section focuses on the skills and techniques for enhancing reducing or otherwise controlling light covering everything from in the field shooting choices to technical transformations to post production The Green Devil Paul Alcocer,2020-10-15 In a world plagued by systematic oppression Billy Evans finds out early how ruthless life could be for a fatherless teenage boy growing up in America's ghetto Exposed to his family's financial difficulties immediately after his

The Complementary Therapist's Guide to Conventional Medicine

E-Book Clare Stephenson,2011-07-26 The Complementary Therapist s Guide to Conventional Medicine is a unique textbook for students and practitioners of complementary medicine offering a systematic comparative approach to Western and Eastern medicine Practitioners of complementary medicine increasingly find themselves working alongside conventionally trained doctors and nurses and it is vital for them to develop a core understanding of conventional medical language and philosophy The book is designed as a guide to understanding conventional medical diagnoses symptoms and treatments whilst also encouraging the reader to reflect on and translate how these diagnoses may be interpreted from a more holistic medical perspective Throughout the text the practitioner student is encouraged to see that conventional and more holistic interpretations are not necessarily contradictory but instead are simply two different approaches to interpreting the same truth that truth being the patient s symptoms After introductory sections on physiology pathology and pharmacology there follow sections devoted to each of the physiological systems of the body In these the physiology of each system is explored together with the medical investigation symptoms and treatments of the important diseases which might affect that system As each disease is described the reader is encouraged to consider the corresponding Chinese medical perspective The textbook concludes with chapters relating specifically to dealing with patients in practice In particular these focus on warning signs of serious disease supporting patients on medication and ethical issues which may arise from management of patients which is shared with conventional practitioners The book also offers a detailed summary of Red Flag symptoms which are those which should be referred for Western medical investigation or emergency medical treatment and also a guide to how patients can be safely supported in withdrawing from conventional medication when this is clinically appropriate Those wishing to use the text for systematic study can make use of the question and problem solving approach offered on the accompanying CD to which references to self study exercises appear at regular stages throughout the book This means that the text can be easily adapted to form the basis of a study course in clinical medicine for students of

complementary medicine In addition to the self testing questions and answers the supporting CD also contains checklists for revision and full colour illustrations ABOUT THE AUTHOR Clare Stephenson is a qualified medical practitioner who worked in hospital medicine general practice and public health medicine for a number of years before training in Traditional Chinese Medicine TCM and acupuncture Over the course of a decade she developed and taught an undergraduate course for students of Chinese medicine on Western medicine and how it relates to TCM She is particularly committed to encouraging communication and understanding between practitioners of different health disciplines She currently works as a GP in Oxfordshire Approx 734 pages
