Gray, Ramzan Mohamed, 1990-06 ECOOP '88 European Conference on Object-Oriented Programming Stein Gjessing, Kristen Nygaard, 2007-03-11 object oriented seems to be becoming in the 1980s what structured programming was in the 1970s Brian Randell and Pete Lee This quotation is from the invitation to the annual Newcastle University Conference on Main Trends in Computing September 1988 It seems to capture the situation quite well only that the object orientation is being materialised in languages and language constructs as well as in the style of programming and as a perspective upon the task considered The second European Conference on Object Oriented Programming ECOOP 88 was held in Oslo Norway August

15 17 1988 in the city where object oriented programming was born more than 20 years ago when the Simula language appeared The objectives of ECOOP 88 were to present the best international work in the field of object oriented programming to interested participants from industry and academia and to be a forum for the exchange of ideas and the growth of professional relationships *Building Interactive Systems* Philip Gray,Roger Took,2013-03-09 Architectures and tools are two important considerations in the construction of interactive computer systems The former is concerned with the optimal structural organisation of systems and the latter with the effective support of the design and management of user interfaces They are regarded as the areas of research most likely to contribute to the development of existing interactive systems in particular by providing improved architectures capable of supporting new styles of interaction and more sophisticated software tools to improve productivity This volume combines the proceedings of two workshops held in York and Glasgow which concentrated on architectures and tools respectively In doing so it addresses the problems of user interface construction from two complementary viewpoints and provides alternative perspectives on many of the central issues Some of the papers are published in expanded form to provide a more comprehensive coverage of the topics and two additional papers have been included which offer a useful insight into issues raised by the workshops The papers address formal and theoretical concerns as well as academic and commercial ones Specific topics covered include novel input models architectures for real time systems and object oriented user interface tools for X widgets NeWS and Smalltalk based applications The papers also include presentations of new tools and architectural designs *Building Interactive Systems Architectures and Tools* provides the most extensive recent account of research into the relationship between architectures and tools in the construction of interactive computer systems and will be of interest to researchers postgraduate students and software developers *Book on C* Robert E. Berry,M.D. Soren,B.A.E. Meekings,1988-06-18 Revised and extended this text covers all features of the C programming language for both the student and the professional user Mobile Communications J.L. Encarnacao,Jan M. Rabaey,2013-03-19 Mobile computing is one of the biggest issues of computer technology science and industry today This book looks at the requirements of developing mobile computing systems and the challenges they pose to computer designers It examines the requirements of mobile computing hardware infrastructure and communications services Information security and the data protection aspects of design are considered together with telecommunications facilities for linking up to the worldwide computer infrastructure The book also considers the mobility of computer users versus the portability of the equipment The text also examines current applications of mobile computing in the public sector and future innovative applications Introduction to occam 2 on the Transputer Graham R. Brookes,Andrew J. Stewart,1989-06-18 The aim of this student text is to provide support for practical programming in concurrency using the OCCAM 2 computer language Although readers do not require previous experience of writing parallel computer programs a general knowledge of programming techniques is assumed **Journal of Object-oriented**
