**The Political Reconstruction of American Tobacco, 1862-1933** Patrick Mulford O'Connor, 2025-06-03 A deeply researched and clearly argued account of the mutual growth of the federal government and the modern tobacco Nearly everything about the United States tobacco economy changed in the generation following the American Civil War From labor to consumption manufacturing to regulation tobacco was utterly reconstructed comparatively a new industry as one contemporary wrote The Political Reconstruction of American Tobacco 1862 1933 exposes the causes of these changes and in the process it reconsiders cornerstones of the American national narrative Through a detailed rendering of tobacco s late nineteenth century political economy this book argues that the federal state s and American capitalism s development were mutually constitutive and fundamentally political processes From the Civil War to the Progressive Era diverse political movements across tobacco s commodity chain drove state and market development creating the immense power and stifling poverty that defined tobacco s reconstruction The Political Reconstruction of American Tobacco 1862 1933 emphasizes the significance of the thousands of manufacturers whose interest groups shaped federal tax policy and in turn forged a powerful and effective internal revenue system the increasingly influential fertilizer producers and warehouse operators who determined tobacco s value and the crop scientists who sought to promote and rationalize US tobacco production As these actors reshaped tobacco s commodity chain they missed and even dismissed the interests of tobacco growers especially newly emancipated African Americans and smallholding whites throughout the South The ruling logic of tobacco s reconstructed political economy rationalized agrarian indebtedness justified low prices and intensified labor discipline on thousands of small farms In emphasizing these exclusions The Political Reconstruction of American Tobacco 1862 1933 reveals how nineteenth century state and economic development coincided with and even created rural poverty

courts the presidency and the media this book chronicles how the interests of affluent Americans particularly business professional and corporate interests dominate over those of average citizens Anthony R DiMaggio examines American political behavior as it relates to lobbying citizen activism media consumption and voting to demonstrate how the public is often misinformed and manipulated regarding major political and economic matters However record public distrust of the government and the increasing popularity of mass protests suggest that most Americans are deeply unhappy with the political status quo and many are willing to fight for change Political Power in America details this interplay between a political system dominated by the affluent few and the rise of mass political distrust and protest It offers information and tools needed to better understand the democratic deficit in American politics while providing opportunities for discussing what we might do to address the mounting crisis of declining democracy An original and refreshing introductory text on the United States political system The originality coupled with an accessibility of critical concepts makes this book truly one of a kind Mark Major author of The Unilateral Presidency and the News Media The Politics of Framing Executive Power
