Soviet Military Psychiatry:

Russian/Soviet Military Psychiatry, 1904-1945 Paul Wanke, 2005 Psychiatry like most professional fields in Russia gained its legitimacy from its ability to serve the Tsar and later the Bolshevik party The militarised nature of these governments meant that psychiatry would have to prove its worth to the military This study will cover Russian Soviet military psychiatry from its first practical experience during the Russo Japanese war to its greatest test during the Great Patriotic War 1941-45 Throughout this study the continuity between Russian and Soviet military psychiatry will be emphasised For example psychiatry's materialist school dominated throughout this period and that Russia's acceptance that psychiatric casualties will occur allowed them to focus their resources on treatment rather than prevention Soviet Military Psychiatry Richard A. Gabriel, 1986-02-21 **Military Psychiatry** Richard A. Gabriel, 1986 The problem of battle stress has become a major factor in the question of military effectiveness Current estimates suggest that modern armies are likely to lose between forty and fifty percent of their total strength as a result of psychiatric collapse The first work of its kind ever published in the field of comparative military psychiatry this book draws together a cross cultural analysis of the discipline as practiced by the armies of the United States Germany Israel and the Soviet Union **Military Psychiatry**, 1994

Traumatic Memories of the Second World War and After Peter Leese, Jason Crouthamel, 2016-10-05 This collection investigates the social and cultural history of trauma to offer a comparative analysis of its individual communal and political effects in the twentieth century Particular attention is given to witness testimony to procedures of personal memory and collective commemoration and to visual sources as they illuminate the changing historical nature of trauma The essays draw on diverse methodologies including oral history and use varied sources such as literature film and the broadcast media The contributions discuss imaginative communal and political responses as well as the ways in which the later welfare of traumatized individuals is shaped by medical military and civilian institutions Incorporating innovative methodologies and offering a thorough evaluation of current research the book shows new directions in historical trauma studies *Military Review*, 1988 **National Library of Medicine Current Catalog** National Library of Medicine (U.S.), **Vitalist Modernism** Fae Brauer, 2023-02-28 This book reveals how when where and why vitalism and its relationship to new scientific theories philosophies and concepts of energy became seminal from the fin de siècle until the Second World War for such Modernists as Sophie Taeuber Arp Hugo Ball Juliette Bisson Eva Carrière Salvador Dalí Robert Delaunay Marcel Duchamp Edvard Munch Picasso Yves Tanguy Gino Severini and John Cage For them Vitalism entailed the conception of life as a constant process of metamorphosis impelled by the free flow of energies imaginings intuition and memories unconstrained by mechanistic materialism and chronometric imperatives to generate what the philosopher Henri Bergson aptly called Creative Evolution Following the three main dimensions of Vitalist Modernism the first part of this book reveals how biovitalism at the fin de siècle entailed the pursuit of corporeal regeneration through absorption in raw nature

Review of Current Military Literature, 1988 **Jesus the Egyptian** Richard Gabriel, 2005 Jesus The Egyptian is a revolutionary attempt to examine the origins of Christianity as historical artifacts and not theological ones The author offers the theory that Christianity is historically rooted in the ancient Egyptian creed of Osiris and not only as is often claimed in Judaism presenting a radical break with established Christian tradition Professor Gabriel offers an intriguing analysis of Jesus' psychological motivation to explain Jesus' rejection of Judaism and his adoption of the Osiran Isis creed the most popular and practiced pagan theology of Christ's time *Breaking Point* Rebecca Schwartz Greene, 2023-01-03 WINNER SOCIETY FOR MILITARY HISTORY DISTINGUISHED BOOK AWARDS FIRST BOOK This book informs the public for the first time about the impact of American psychiatry on soldiers during World War II *Breaking Point* is the first in-depth history of American psychiatry in World War II Drawn from unpublished primary documents oral histories and the author's personal interviews and correspondence over years with key psychiatric and military policymakers it begins with Franklin Roosevelt's endorsement of a universal Selective Service psychiatric examination followed by Army and Navy pre and post induction examinations Ultimately 2.5 million men and women were rejected or discharged from military service on neuropsychiatric grounds Never before or since has the United States engaged in such a program In designing Selective Service Medical Circular No. 1 psychiatrist Harry Stack Sullivan assumed psychiatrists could predict who might break down or falter in military service or even in civilian life

thereafter While many American and European psychiatrists questioned this belief and huge numbers of American psychiatric casualties soon raised questions about screening's validity psychiatric and military leaders persisted in 1942 and 1943 in endorsing ever tougher screening and little else Soon families complained of fathers and teens being drafted instead of being identified as psychiatric 4Fs and Blacks and Native Americans among others complained of bias A frustrated General George S Patton famously slapped two malingering neuropsychiatric patients in Sicily a sentiment shared by Marshall and Eisenhower though they favored a tamer style Yet psychiatric rejections evacuations and discharges mounted While psychiatrist Roy Grinker and a few others treated soldiers close to the front in Tunisia in early 1943 this was the exception But as demand for manpower soared and psychiatrists finally went to the field and saw that combat itself not predisposition precipitated breakdown leading military psychiatrists switched their emphasis from screening to prevention and treatment But this switch was too little too late and slowed by a year long series of Inspector General investigations even while numbers of psychiatric casualties soared Ironically despite and even partly because of psychiatrists wartime performance plus the emotional toll of war postwar America soon witnessed a dramatic growth in numbers popularity and influence of the profession culminating in the National Mental Health Act 1946 But veterans with PTSD not recognized until 1980 were largely neglected

Psychiatric Casualties Mark Russell, Charles Figley, 2021-06-15 The psychological toll of war is vast and the social costs of war's psychiatric casualties extend even further Yet military mental health care suffers from extensive waiting lists organizational scandals spikes in veteran suicide narcotic overprescription shortages of mental health professionals and inadequate treatment The prevalence of conditions such as post traumatic stress disorder is often underestimated and there remains entrenched stigma and fear of being diagnosed Even more alarming is how the military dismisses or conceals the significance and extent of the mental health crisis The trauma experts Mark C Russell and Charles Figley offer an impassioned and meticulous critique of the systemic failures in military mental health care in the United States They examine the persistent disconnect between war culture which valorizes an appearance of strength and seeks to purge weakness and the science and treatment of trauma Instead of reckoning with the mental health crisis the military has neglected the needs of service members It has discharged prosecuted and incarcerated a large number of people struggling with the psychological realities of war and it has inflicted humiliation ridicule and shame on many more Through a far reaching historical account Russell and Figley detail how the military has perpetuated a self inflicted crisis The book concludes with actionable prescriptions for change and a comprehensive approach to significantly improving military mental health

the biological and evolutionary roots of fear fear as innate versus learned behavior in both humans and animals and conceptions of human passions and their self mastery from late antiquity to the early modern era Additionally the contributors examine theories of intentional and non intentional reactivity the process of fear memory coding and contemporary psychology s emphasis on anxiety disorders Overall the authors point to fear as a dense and variable web of responses to external and internal stimuli Our thinking about these reactions is just as complex In response this volume opens a dialogue between science and the humanities to afford a more complete view of an emotion that has shaped human behavior since time immemorial

God's Generals Richard A. Gabriel, 2016-09-19 It is one of the more startling facts of military history that the founders of three of the four great religions Judaism Buddhism and Islam were also accomplished field generals with extensive experience in commanding men in battle One of these Muhammad fought eight battles and was wounded twice once almost fatally Another Siddhartha Gautama later to become the Buddha witnessed so much battlefield carnage that he suffered a psychological collapse Moses had become so much a god intoxicated personality it is a reasonable suspicion that he like the Buddha was murdered Indeed had the experiences of these men in war not been so successful it is quite possible that their achievements as religious leaders would never have occurred For all three war and religion were so closely intertwined in their personalities that it is difficult to discern where the influence of one ended and the other began This book attempts to explore the military lives of Moses the Buddha and Muhammad and the role their war experiences played in their religious lives
