Miles, 2020-03-02 Torture doctors invent and oversee techniques to inflict pain and suffering without leaving scars Their knowledge of the body and its breaking points and their credible authority over death certificates and medical records make them powerful and elusive perpetrators of the crime of torture In The Torture Doctors Steven H Miles fearlessly explores who these physicians are what they do how they escape justice and what can be done to hold them accountable At least one hundred countries employ torture doctors including both dictatorships and democracies While torture doctors mostly act with impunity protected by governments medical associations and licensing boards Miles shows that a movement has begun to hold these doctors accountable and to return them to their proper role as promoters of health and human rights Miles's groundbreaking portrayal exposes the thinking and psychology of these doctors and his investigation points to how the international human rights community and the medical community can come together to end these atrocities

Wienthal and Kracauer in our troubled times Without forcing a unified argument they range over a wide variety of topics from the uncertain founding of the School to its mixed reception of psychoanalysis from Benjamin's ruminations on stamp collecting to the ironies in the reception of Marcuse's One Dimensional Man from L. Wienthal's role in Weimar's Jewish Renaissance to Horkheimer's involvement in the writing of the first history of the Frankfurt School Of special note are their responses to visual issues such as the emancipation of color in modern art the Jewish prohibition on images the relationship between cinema and the public sphere and the implications of a celebrated Family of Man photographic exhibition The collection ends with two essays tracing the still metastasizing demonization of the Frankfurt School by the so called Alt Right as the source of cultural Marxism and political correctness which has gained alarming international resonance and led to violence by radical right wing fanatics **Managing Fear** Bernadette McSherry, 2013-10-23 Managing Fear examines the growing use

of risk assessment as it relates to preventive detention and supervision schemes for offenders perceived to be at a high risk of re offending individuals with severe mental illness and suspected terrorists It outlines a number of legislative regimes in common law countries that have broadened civil as opposed to criminal powers of detention and supervision Drawing on the disciplines of criminology and social psychology it explores how and why such schemes reflect a move towards curtailing liberty before harm results rather than after a crime has occurred Human rights and ethical issues concerning the role of mental health practitioners in assessing risk for the purposes of preventive detention and supervision are explored and regimes that require evidence from mental health practitioners are compared with those that rely on decision makers notions of reasonable belief concerning the risk of harm Case studies are used to exemplify some of the issues relating to how governments have attempted to manage the fear of future harm This book aims to educate mental health practitioners in the law relating to preventive detention and supervision schemes and how the legal requirements differ from clinical assessment practices examine the reasons why there has been a recent renewal of preventive detention and supervision schemes in common law countries provide a comparative overview of existing preventive detention and supervision schemes and analyse the human rights implications and the ethics of using forensic risk assessment techniques for preventive detention and supervision schemes

The Russian Quest for Peace and Democracy Metta Spencer, 2012-07-10 In *The Russian Quest for Peace and Democracy* Metta Spencer recounts the political and military changes that have occurred in Russia up to mid 2010 Using hundreds of interviews she conducted with officials dissidents and liberal intellectuals she describes the various groups forces and individuals that worked to liberalize the totalitarian Soviet Union and its fellow nations behind the Iron Curtain and which ultimately brought about the dissolution of those repressive governments Spencer identifies four political orientations to describe Soviet society Sheep ordinary citizens who accepted the undemocratic regime they lived in without challenging it Dinosaurs hard line Communist officials Termites including Mikhail Gorbachev and his advisers and government and Barking Dogs a few hundred dissidents who made a lot of noise protesting hoping to awaken a grass roots demand for democracy The strange rivalry between the Termites and Barking Dogs would ultimately doom perestroika Spencer's research dispels the widely held perception that US President Ronald Reagan won the Cold War by standing firm until the Soviet Union blinked first There are vitally important lessons to be learned from the Soviet period about how to assist citizens of totalitarian and authoritarian regimes around the world The irony is that transnational civil society organizations major sources of the progress in Soviet Russia are still needed today in authoritarian Russia under Vladimir Putin and Dmitry Medvedev for totalitarianism remains a potential social trap In *The Russian Quest for Peace and Democracy* Metta Spencer suggests new ways of building urgently needed social capital in today's Russia where democracy has yet to flourish

The Ukrainian Diaspora Vic Satzewich, 2003-09-02 In this fascinating book Vic Satzewich traces one hundred and twenty five years of Ukrainian migration from the economic migration at the end of the nineteenth century to the political

migration during the inter war period and throughout the 1960s and 1980s resulting from the troubled relationship between Russia and the Ukraine The author looks at the ways the Ukrainian Diaspora has retained its identity at the different factions within it and its response to the war crimes trials of the 1980s **Psychiatrist in the Chair** Brendan Kelly, Muiris Houston, 2020-10-22 Born in Dublin in 1942 Anthony Clare was the best known psychiatrist of his generation His BBC Radio 4 show In the Psychiatrist's Chair which ran from 1982 to 2001 brought him international fame and changed the nature of broadcast interviews forever Famous interviewees included Stephen Fry Anthony Hopkins Spike Milligan Maya Angelou and Jimmy Savile each of whom yielded to Clare's inimitable gentle yet probing style Clare made unique contributions to the demystification and practice of psychiatry most notably through his classic book Psychiatry in Dissent Controversial Issues in Thought and Practice 1976 This book the first official biography of this much loved figure examines the man behind these achievements the debater and the doctor the writer and the broadcaster the public figure and the family man Using extensive public and family records we ask Who was Anthony Clare really Were there just one Anthony Clare or many What drove him And what is to be learned from his life his career and his unique sometimes controversial legacy to our understanding of the mind This is the remarkable story of a remarkable person *Protest Beyond Borders* Hara Kouki, Eduardo Romanos, 2011-03-01 The protest movements that followed the Second World War have recently become the object of study for various disciplines however the exchange of ideas between research fields and comparative research in general is lacking An international and interdisciplinary dialogue is vital to not only describe the similarities and differences between the single national movements but also to evaluate how they contributed to the formation and evolution of a transnational civil society in Europe This volume undertakes this challenge as well as questions some major assumptions of post 1945 protest and social mobilization both in Western and Eastern Europe Historians political scientists sociologists and media studies scholars come together and offer insights into social movement research beyond conventional repertoires of protest and strictly defined periods borders and paradigms offering new perspectives on past and present processes of social change of the contemporary world **Revolution and War in Contemporary Ukraine** Olga Bertelsen, 2017-03-28 What are the reasons behind and trajectories of the rapid cultural changes in Ukraine since 2013 This volume highlights the role of the Revolution of Dignity and the Russian Ukrainian war in the formation of Ukrainian civil society the forms of warfare waged by Moscow against Kyiv including information and religious wars Ukrainian and Russian identities and cultural realignment sources of destabilization in Ukraine and beyond memory politics and Russian foreign policies the Kremlin's geopolitical goals in its near abroad and factors determining Ukraine's future and survival in a state of war The studies included in this collection illuminate the growing gap between the political and social systems of Ukraine and Russia The anthology illustrates how the Ukrainian revolution of 2013 2014 Russia's annexation of the Crimean peninsula and its invasion of eastern Ukraine have altered the post Cold War political landscape and with it regional and global power and security dynamics *Brutal*

treatments Russell T. Moul, 2025-05-13 *Brutal treatments* explores the role medical doctors played in the colonial counterinsurgency campaigns in British Kenya 1952-1960 and French Algeria 1954-1962 in the final years of empire. It not only examines how these medical professionals became embroiled in the conflict but also how they used their knowledge to further the interests of the state. The book makes a substantial and significant contribution to the history of medicine, the history of medical ethics, and the history of colonialism.

The Fundamentals of Ethics Russ Shafer-Landau, 2024 This book is divided into three parts: one on the Good Life, another on Doing the Right Thing, and the last on the Status of Morality. You can read these parts in any order. Many will want to begin at the end for instance with a discussion of whether morality is a human invention or is in some way objective. Some will prefer to start in the middle asking about the supreme principle of morality and whether there is any such thing. And others may want to begin at the beginning by thinking about human well-being and the quality of life. Each part can be understood independently of the others though there are of course many points of connection across the three main branches of moral philosophy. No matter where you begin there are footnotes in most chapters that provide cross references to relevant discussions elsewhere in the book. When beginning a new area of study you are bound to encounter some unfamiliar jargon. I've tried to keep this to a minimum and I suppose that you can be thankful that we're doing ethics here rather than physics or anatomy. I define each technical term when I first use it and have also put together a glossary which appears at the end of the book. Each specialized term that appears in boldface has an entry there. You may be interested enough in what you read here that you'll want to continue your studies in moral philosophy. There is a natural place to begin the companion volume to this book *The Ethical Life* described later in this preface. I have also compiled a list of Suggestions for Further Reading for each chapter or pair of chapters. This list appears at the end of the book just before the glossary. I have selected the readings with an eye to what might be accessible and interesting to those just beginning their study of moral philosophy.
