

ВЕЛИЧАЙШАЯ ПОБЕДА СОВЕТСКОЙ НАУКИ И ТЕХНИКИ

Четвергом октября 1957 года навсегда войдет в историю человечества как день из самых памятных для. В этот день был запущен первый в мире советский искусственный спутник Земли.

Нашим современникам трудно быть свидетелем того, как освобожденный и социалистический труд людей нового, социалистического общества делает реальностью самые давние мечты человечества.

Вот почему так важно, чтобы наши дети и внуки знали, что такое искусственный спутник Земли, как он работает, как он был создан. Это знание поможет им понять, как важно было в то время, чтобы наша страна была первой в мире, которая запустила в космос первый искусственный спутник Земли.

Искусственный спутник Земли — это аппарат, который вращается вокруг Земли. Он может быть использован для различных целей: для связи, для наблюдения за Землей, для изучения космоса. Первый искусственный спутник Земли был запущен в 1957 году. Он был создан в СССР. Его название — «Спутник-1».

Soviet Science Technology Design:

Soviet Science, Technology, Design Raymond Hutchings, 1976 *Soviet Science on the Edge of Reform* Harley D. Balzer, 2019-06-04 It is my sincere hope that the reforms currently being introduced in the USSR will render much of this book obsolete Yet even if perestroika brings significant change to the Soviet Union historians will want a record of what existed before After four years it has become apparent that perestroika is a painful long term process In such a large and diverse country even the reforms that are successful cannot take place everywhere at once One major goal in publishing this book is to make data from a major interview project on Soviet science and technology available to a broader audience Despite the changes taking place many of the features illuminated by these unique data persist *Science Policy in the Soviet Union* Paul M. Cocks, 1980 **Science Policy: Science policy in the Soviet Union** ,1980 **Science Policy** ,1980

International Design Organizations Jeremy Aynsley, Alison J. Clarke, Tania Messell, 2022-01-13 This innovative volume brings together international design scholars to address the history and present day status of national and international design organizations working across design disciplines and located in countries including Argentina Turkey Estonia Switzerland Italy China and the USA In the second half of the 20th century many non governmental organizations were created to address urgent cultural economic and welfare issues Design organizations set out to create an international consensus for the future direction of design This included enhancing communication between professionals educators and practitioners raising standards for design and creating communities of designers across linguistic national and political borders Shared needs and agendas were identified and categories of design constantly defined and re defined often with overt cultural and political intents Drawing on an impressive range of original research archival sources and oral testimony this volume questions the aims and achievements of national and international design organizations in light of their subsequent histories and their global remits The Cold War period is central to the book while many chapters draw on post colonial perspectives to interpret how transnational networks and negotiations took place at events and congresses and through publication *Science and Industrialization in the U.S.S.R.* Robert A. Lewis, 2016-08-16 **Science Policy in the United States** ,1980 **Science, Technology, and Everyday Life, 1870-1950** Colin Chant, Richard Bessel, 1989 Eloquent Spaces adopts the twin analytic of meaning and community to write a fresh history of building in early India It presents a new perspective on the principles and practices of early Indian architecture Defining it broadly over a range of space uses the book argues for architecture as a form of cultural production as well as public consumption Ten essays by leading archaeologists architects historians and philosophers examining different architectural sites and landscapes including Sanchi Moodabidri Srinagar Chidambaram Patan Konark Basgo and Puri demonstrate the need to look beyond the built form to its spirit beyond aesthetics to cognition and thereby to integrating architecture with its myriad living contexts The volume captures some of the semantic diversity inherent in premodern Indian traditions of civic building both sacred and secular

which were however unified in their insistence on enacting meaning and a transcendent validity over and above utility and beauty of form The book is a quest for a culturally rooted architecture as an alternative to the growing crisis of disembeddedness that informs modern praxis This volume will be of interest to scholars and practitioners of architecture ancient Indian history philosophy art history and cultural studies **The Socialist Sixties** Anne E. Gorsuch, Diane P. Koenker, 2021-12-22 A very engaging collection of essays that adds much to an evolving literature on the social history of the Soviet Union and broader socialist societies Choice The 1960s have reemerged in scholarly and popular culture as a protean moment of cultural revolution and social transformation In this volume socialist societies in the Second World the Soviet Union East European countries and Cuba are the springboard for exploring global interconnections and cultural cross pollination between communist and capitalist countries and within the communist world Themes explored include flows of people and media the emergence of a flourishing youth culture sharing of songs films and personal experiences through tourism and international festivals and the rise of a socialist consumer culture and an esthetics of modernity Challenging traditional categories of analysis and periodization this book brings the sixties problematic to Soviet studies while introducing the socialist experience into scholarly conversations traditionally dominated by First World perspectives

Soviet Product Quality Malcolm R. Hill, Richard McKay, 1988-06-18 ***Restructuring the Soviet Economy*** David A. Dyker, 2002-01-31 Restructuring the Soviet Economy examines the Soviet leadership's most urgent question how to revitalize the soviet economy David Dyker argues that the current impasse can only be understood in the context of the failure of 60 years of central planning He analyses both the problems besetting the centrally planned system and those that have paralysed perestroika and assesses whether the most ambitious attempt ever to reform the Soviet economy will succeed

The Struggle for Utopia Victor Margolin, 1997 Focusing on the difficult relationship between art and social change Margolin brings important new insights to our understanding of the avant garde's role in a period of great political complexity ***Reluctant Cold Warriors*** Vladimir Kontorovich, 2019-09-02 Scholars attribute the collapse of the Soviet Union in part to the militarization of its economy But during the Cold War economic studies of the USSR largely neglected the military sector of the Soviet economy its dominant and most successful part This is all the more puzzling in that academic study of the Soviet economy in the US was specifically created to help fight the Cold War If the rival superpower maintained the peacetime war economy why did experts fail to tell us when it mattered Vladimir Kontorovich shows how Western economists came up with strained non military interpretations of several important aspects of the Soviet economy which the Soviets themselves acknowledged to have military significance Such civilianization suggests that the neglect of the military sector was not forced on scholars of the Soviet economy by secrecy it was their choice The explanation of this choice in *Reluctant Cold Warriors* raises many questions about the internal workings of economic Sovietology and its intellectual and political background Are peripheral academic fields mimicking the agenda of the discipline's mainstream more likely to

produce faulty scholarship Did the search for the essence of socialism distract researchers from the actual Soviet economy Were economic Sovietologists under political pressure and if so in what direction This book answers these questions in a way that has broad relevance for national security uses of social science today *European Cities & Technology* David C. Goodman, Colin Chant, 1999 This text explores one of the most fundamental changes in the history of human society the transition from rural to urban ways of living It covers a range of urban technologies including new building materials and designs Department of Defense Appropriations for 1970 United States. Congress. House. Committee on Appropriations. Subcommittee on Department of Defense, 1969 **Russia and Eastern Europe, 1789-1985** Raymond Pearson, 1989

Japan's Economic Involvement in Eastern Europe and Eurasia Raymond Hutchings, 1999-03-22 The book describes Japanese economic activities in all the countries of Eastern Europe and the former Soviet Union FSU predominantly since the break up of the Soviet Union Japanese investment aid trade advice or other contacts also reciprocal actions are related in substantial detail Analogous activities are also outlined for the immediately preceding periods The earlier history of the Russian Japanese relationship is outlined The economic and investment environment is set in the necessary political cultural and historic contexts *Scientific and Technical Aerospace Reports* , 1993 **Soviet Studies Guide** Tania Kohn, 1992
