S. Stolfi,2015-11-06 A category of military art called naval operational art exists in the Soviet Union For the Soviets the art is the scientific skill of planning and conducting the interlinked engagements strikes and maneuvers that comprise the modern naval operation The Soviets exercise naval operational art according to principles of the art which the Soviets emphasize with a stiff formalism that can be exploited by the West This study describes the art and its style and suggests Soviet naval war fighting scenarios based on the application of the principle of naval operational art

The Evolution of Soviet Operational Art, 1927-1991 David M. Glantz,Harold S. Orenstein,2013-09-13 The Soviet military concept of operational art and the associated theories such as war of annihilations deep battle and deep operations have been observed by the West since World War II The Soviet government hid their military theoretical work behind a veil of secrecy Here the Soviet theories are revealed in the words of those who created them in peacetime and applied them in war *The Basic Principles of Operational Art and Tactics* V. strategy and tactics and is called on to work out the theory and practice of preparing and conducting contemporary operations This book focusing on operational art and tactics does not deal with either doctrine which represents the official Soviet view of the nature of a future war or strategy since the most important aspect of strategy is policy In U S terms the book treats operations tactics laws of war and laws of armed conflict The Evolution of Soviet Operational Art, 1927-1991: Operational art, 1965-1991 David M. Howard, 2014-08-15 This thesis considers the extent to which Soviet ascendancy over Germany by late 1943 can be attributed to a resurgence of operational art Discussion begins with an overview of operational art and the development of the theory up to 1937 It explains the significant differences between Soviet and western terminology and discusses the writings of key Russian and Soviet theorists as well as the opinions of contemporary

historians The thesis proceeds to examine two campaigns First the Soviet Winter 1942 43 offensives and German counteroffensives This period saw the surrender of the German 6th Army at Stalingrad but ended in operational defeat for the Red Army Turning to the campaigns of summer 1943 that began with Operation CITADEL the thesis examines the struggle better known as the Battle of Kursk This study includes the Soviet 1943 summer offensives and concludes in October 1943 by which time the Germans had suffered a significant operational and strategic defeat The thesis analyses the extent to which the reemergence of operational art was responsible for the reversal in Soviet fortunes It also discusses other factors that contributed to Soviet success and to German failures

Soviet Operational Art Joseph H. Purvis, U.S. Army Command and General Staff College. School of Advanced Military Studies, 1989 The monograph discusses the described shift in Soviet military doctrine from the offense to the defense Of particular emphasis is the impact of any such change at the operational level Abstract

The Evolution of Soviet Operational Art, 1927-1991: Operational art, 1927-1964 David M. Glantz, 1995 Soviet military theoretical theories are revealed in the words of those who created them in peacetime and applied them in war This collection of texts has been taken from formerly classified material in the official Red Army General staff journal

The Evolution of Operational Art Brigade Commander Georgii Isserson, 2013-12 One can argue that the development of true doctrine required the formal adoption of the concept of operational art Prior to the Great War no army in the world possessed a codified body of thought that enabled senior military commanders to visualize the aggregate effects of tactical engagements across time and space By 1918 after a dramatic revision of drill regulations into something approaching true doctrine the German army was furthest in realizing this goal Ultimately though the Germans could not translate tactical success into strategic victory because they could not resource military operations in sufficient depth to render local successes decisive Understanding that the character of warfare in 1918 was radically different from 1914 would have enabled Ludendorff to see the flaws in the MICHAEL offensives and perhaps mitigate them And although the interwar German Army spent a great deal of effort reflecting on the lessons of 1914 1918 German understanding of the operational art remained incomplete The separate and unequal Allied efforts against Nazi Germany in World War II followed immediately by the superpower competition of the Cold War created a significant gap in American officers understanding of the factors that contributed to Soviet victories on the Eastern Front As a result in the decades following the war the concept of operational art was recognized and adopted by the US Army almost as a proprietary creation In the 1990s however Western military historians and theorists discovered that the Soviets had gotten there first Bruce Menning's translation of Georgii Samoilovich Isserson's 1936 treatise *The Evolution of Operational Art* is the best example available of the distillation of Soviet military thought before the Second World War Isserson Tukhachevsky Shaposhnikov and others like them were founding members of a focused military Enlightenment whose goal was to change the way armies and leaders thought about war Moreover unlike contemporaries such as B H Liddell Hart or Billy Mitchell they had the opportunity to build their ideas into the modern Soviet

Army and see their doctrine survive despite the existential challenges of Stalin's purges and the German invasion **The Great Patriotic War and the Maturation of Soviet Operational Art: 1941-1945** David M. Glantz, ARMY COMBINED ARMS CENTER FORT LEAVENWORTH KS SOVIET ARMY STUDIES OFFICE., U.S. Army Combined Arms Command. Soviet Army Studies Office, 1987 This report examines the development of the Soviet Army's operational art against the Germans during World War 2 It examines the reconstruction and reorganization of the Soviet military forces after Hitler's invasion the development and coordination of military tactics on the various fronts and the deployment of forces for defense or a Hack in several battles
