Labor Developments in the U.S.S.R. Edmund Nash, 1966 **Russian Trade Unions and Industrial Relations in Transition** S. Ashwin, S. Clarke, 2002-11-14 Many commentators expected the Russian trade unions to collapse along with the system of which they were an integral part but the trade unions survived the storms of the Yeltsin era by adopting a strategy of social partnership This book based on case study and survey research in eight Russian regions provides a detailed account of the development of trade unionism in Russia since the collapse of the soviet system Against the background of the role of the trade unions in the soviet system the book reviews the political role structure and functions of the trade unions development of social partnership at federal and regional levels and provides a detailed account of the activity of the trade unions at the level of enterprise The book concludes with a critical assessment of the Russian unions strategy of social partnership and locates it in comparative perspective Trade Unions in Russia and Ukraine S. the USSR, 1917-1928 Jay B. Sorenson, 2009-12-01 The Russian Revolution excited men and captured their imaginations It seemed to herald the fulfillment of the nineteenth century socialist movement Socialists believed that with the proper use of technocracy they could scourge poverty and hunger from the earth They felt that a social system based on equality and social justice could overcome the traditional division of each society into rich and poor They were convinced that they could overcome social problems that seething and bubbling beneath the surface threatened to be as destructive as wars fought between great powers These were the ideals and objectives of both 1917 revolutions They were exciting and contagious The Russians were seen by many as being on the threshold of a new and great experiment one which would lead the world to peace democracy and security the dream of ages Support grew quickly A worldwide movement committed to the extension of the ideological and moral principles of the Revolution and to the defense of the Soviet Union grew and became a significant factor in world politics It did not turn out that way Much of the story of this tragedy is to be found in labor struggles the split between the Communist Party the trade unions and the workers The labor movement which had been pushing for a democratic alternative turned against the Bolsheviks soon after 1917 and labor opposition left the Bolsheviks at the crossroads of history The Bolsheviks had to choose between dictatorship or democracy Under Lenin's guidance they opted for minority dictatorship the outcome of which was tyranny over the very people in whose name they fought This classic volume originally published in 1969 has not been surpassed as a description of how and why this occurred Jay B Sorenson professor emeritus of political science at the University of New Mexico has been a Professor of Government at Smith College and an Associate of the Harvard University Russian Research Center He is the author of Japanese Policy and Nuclear Arms and Uranium Mining and Milling and Environmental Protection Mitigation of Regulatory Problems **BLS Report** ,1964

George C. Guins, 2012-12-06 Soviet power rests on two main supports the complete economic dependence of the citizens upon the state and the unlimited political control of the government over the economic social and even cultural life History knows various kinds of despotisms dictatorships and regimentations of economic activity but the U S S R represents a unique kind of dictatorship based on the one party system and integral planning with the specific goal of realization of communism Mankind had never before known such a system Even the best of possible comparisons the analogy with the period of Ptolemies in Egypt is good only in so far as it concerns the regimentation of all kind of economic activity There was in the past no ideology pretending to be adjusted to the needs of the toiling masses no planning system on the same scale and no Communist party apparatus As concerns the modern world the comparative method is necessary for giving the most graphical characterization of the differences between the Western democracies with their ethical traditions rule of law and the principle of the inviolability of individual rights and on the other hand the Soviet monolithic state with its unscrupulous policy extremities of regimentations and drastic penalties **Foreign Labor Trends** ,1995 *Bulletin of the United States Bureau of Labor Statistics* ,1913 Reports and Documents United States.
