The Soviet Volunteers William E. Odom, 2015-03-08 Founded in 1927 the Society of Friends of Defense and Aviation Chemical Construction or Osoaviakhim became the largest mass voluntary association in the Soviet Union before World War II Conceived in Bolshevik rhetoric about the creativity of the toiling masses this novel organizational scheme gradually acquired bureaucratic substance and played a significant role in making the civilian masses administratively accessible for elementary programs in military training and chemical and aviation technology William E Odom's study of Osoaviakhim in its first decade seeks not only to recount the history of its development but more importantly to demonstrate that the Soviet experience can be analyzed using the language and concepts of Western social science In particular the author argues that concepts from organization theory offer promising opportunities to relate Soviet area studies to the broader concerns of comparative politics and that middle range generalizations about politics within bureaucracies may prove very helpful in explaining who gets what when and how in the Soviet polity Originally published in 1974 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

*Civil-military Relations In Communist Systems* Dale R. Herspring, 2019-04-11 This book represents the first attempt to deal with the problem of how to conceptualize the civil military relations of communist systems within a common intellectual framework The opening chapters present three major constructs originally designed for analyzing civil military relations in the USSR the interest group approach the institutional congruence approach and the participatory model In subsequent chapters the utility of these approaches is tested against a wide variety of communist systems including those of Cuba the USSR China Romania Hungary the GDR and Poland In probing these issues for the first time the authors shed considerable light on the transnational differences and similarities among communist systems and the dynamics of civil military relations in all communist systems

*Cooperation under Fire* Jeffrey W. Legro, 2013-09-12 Why do nations cooperate even as they try to destroy each other Jeffrey Legro explores this question in the context of World War II the total war that in fact wasn t During the war combatant states attempted to sustain agreements limiting the use of three forms of combat considered barbarous submarine attacks against civilian ships strategic bombing of civilian targets and chemical warfare Looking at how these restraints worked or failed to work between such fierce enemies as Hitler s Third Reich and Churchill s Britain Legro offers a new understanding of the dynamics of World War II and the sources of international cooperation While traditional explanations of cooperation focus on the relations between actors Cooperation under Fire examines what warring nations seek and why they seek it the preference formation that undergirds international interaction Scholars and statesmen debate whether it is the balance of power or the influence of international norms that most directly shapes foreign policy goals Critically assessing both explanations Legro argues that it was rather the organizational cultures of military bureaucracies their beliefs and customs in waging war that decided national priorities for limiting the use of force in World War II Drawing on documents from Germany Britain the United States and the former Soviet Union Legro provides a compelling account of how military cultures molded state preferences and affected the success of cooperation In its clear and cogent analysis this book has significant implications for the theory and practice of international relations

Rieber,2022-08-23 An authoritative account of Stalin as a wartime leader showing how his paradoxical policies of mass mobilization and repression affected all aspects of Soviet society The Second World War was the defining moment in the history of the Soviet Union With Stalin at the helm it emerged victorious at a huge economic and human cost But even before the fighting had ended Stalin began to turn against the architects of success In this original and comprehensive study Alfred J Rieber examines Stalin as a wartime leader arguing that his policies were profoundly paradoxical In preparation for the war Stalin mobilized the whole of Soviet society in pursuit of his military goals and intensified the centralization of his power Yet at the same time his use of terror weakened the forces vital to the defense of the country In his efforts to rebuild the country after the devastating losses and destruction he suppressed groups that had contributed immeasurably to victory His steady ruthless leadership cultivated a legacy that was to burden the Soviet Union and Russia to the present day     *Power and the Sacred in Revolutionary Russia* Glennys Young,2010-11 After the 1917 Revolution in Russia the Bolsheviks launched a massive assault on religion Although we know a great deal about how the Bolsheviks went about doing this propaganda persecution of clergy and laity seizing church property scholars have not devoted much attention to the other side of the story the people who were being persecuted and how they responded to their persecutors Glennys Young shows how ordinary Russian peasants devised ways of asserting their religious faith during the difficult period of New Economic Policy 1921-28 when the Party state was ideologically obsessed with eradicating religion Faced with persecution torture and the creation of antireligious organizations such as the League of the Godless Orthodox clergy and laity organized themselves against the Bolsheviks They revived factional politics even using the village soviets the intended cornerstone of Soviet power in the countryside to defend their religious interests When they achieved some degree of success in their resistance the Bolsheviks were forced to respond and adapt their strategies a conclusion that scholars have not put forward previously Based on extensive research in archives and published sources Young's book will force historians of Soviet Russia to confront religious issues as central to rural politics Her work also draws upon cultural anthropology and theories of peasant politics making it of great interest to any scholars studying the processes of secularization and desacralization in other cultures
