Kitchenspace Maria Elisa Christie,2009-08-17 Throughout the world the kitchen is the heart of family and community life Yet while everyone has a story to tell about their grandmother s kitchen the myriad activities that go on in this usually female world are often devalued and little scholarly attention has been paid to this crucial space in which family gender and community relations are forged and maintained To give the kitchen the prominence and respect it merits Maria Elisa Christie here offers a pioneering ethnography of kitchenspace in three central Mexican communities Xochimilco Ocotepc and Tetecala Christie coined the term kitchenspace to encompass both the inside kitchen area in which everyday meals for the family are made and the larger outside cooking area in which elaborate meals for community fiestas are prepared by many women working together She explores how both kinds of meal preparation create bonds among family and community members In particular she shows how women s work in preparing food for fiestas gives women status in their communities and creates social networks of reciprocal obligation In a culture rigidly stratified by gender Christie concludes kitchenspace gives women a source of power and a place in which to transmit the traditions and beliefs of older generations through quasi sacramental food rites
