Decolonising Heritage in South Asia Himanshu Prabha Ray, 2018-09-05 This volume cross examines the stability of heritage as a concept It interrogates the past which materialises through multi layered narratives on monuments and other objects that sustain cultural diversity It seeks to understand how interpretations of monuments as texts are affected at the local level of experience even as institutions such as UNESCO work to globalise and fix constructs of stable and universal heritage Shifting away from a largely Eurocentric concept associated with architecture and monumental archaeology this book reassesses how local and regional heritage needs to be balanced with the global and transnational It argues that material objects and monuments are not static embodiments of culture but are rather a medium through which identity power and society are produced and reproduced This is especially relevant in South and Southeast Asian contexts where debates over heritage often have local regional and national political implications and consequences Reevaluating how traditional valuation of monuments and cultural landscapes could help aid sustainability and long term preservation of the heritage this book will be useful for scholars and researchers of South and Southeast Asian history heritage studies archaeology cultural studies tourism studies and political history as well **General Technical Report NE**, 1980

Bibliographic Guide to Technology New York Public Library. Research Libraries, 1978 **Into the Black** Peter J. Westwick, 2008-10-01 In the decades since the mid 1970s the Jet Propulsion Laboratory in Pasadena California has led the quest to explore the farthest reaches of the solar system JPL spacecraft Voyager Magellan Galileo the Mars rovers and others have brought the planets into close view JPL satellites and instruments also shed new light on the structure and dynamics of earth itself while their orbiting observatories opened new vistas on the cosmos This comprehensive book recounts the

extraordinary story of the lab's accomplishments, failures, and evolution from 1976 to the present day. This history of JPL encompasses far more than the story of the events and individuals that have shaped the institution. It also engages wider questions about relations between civilian and military space programs, the place of science and technology in American politics, and the impact of the work at JPL on the way we imagine the place of humankind in the universe.
