**Spectrality and Survivance** Marija Grech, 2022-05-16 The notion of the Anthropocene is founded on the premise that traces of human activity on the earth will remain legible in the geological strata for millions of years to come showing evidence of an anthropogenic signature inscribed in the rock by the human species Spectrality and Survivance shows how embedded in this understanding of the Anthropocene is a speculative and specular gesture that transforms the notion of the future into an anthropocentric reflection of the present prohibiting any true engagement with the possibility of a non anthropocentric and post anthropocenic world In this volume Marija Grech develops an alternative conceptual paradigm from which to think the Anthropocene beyond any limited notion of human language human thought human systems of meaning or even a human world Grech considers how the geological trace of the Anthropocene might be said to survive outside of the possibility of any human readership and how the very survival of the human in and beyond the Anthropocene might necessitate such thought      **Space and Personality** Archibald Allan, 1913      **An Exploration of Space 1999**

Essig, Steve McCarter, 2017-01-12. This book is about building craft for space travel, space travel not in the far distant future but in the immediate future. There is no question that we have the technology to build and power a large craft capable of traversing the galaxy and for now this book will focus on achieving the goal of intragalactic travel. We will describe various methods of power generation and propulsion, delineate the materials and technology for construction, discuss the building of the spacecraft from the outside in, and show what is required to sustain life on the craft for extended periods of time. While we will go into some detail on each of these, pointing out advantages and disadvantages to components and methods, this is not nor is it intended to be a highly technical book to be used by specialists. Rather, it is intended to inform the general readership about what is possible and perhaps what is not in building and operating spacecraft for long distance and long duration travel with current and available means. **Sci-Fi Boxed Set: 160+ Space Adventures, Lost Worlds, Dystopian Novels & Apocalyptic Tales** Jules Verne, Mark Twain, Robert Louis Stevenson, James Fenimore
