Death Work Vincent E. Henry, 2004-04-01 In this fascinating new book Vincent Henry a 21 year veteran of the NYPD who recently retired to become a university professor explores the psychological transformations and adaptations that result from police officers encounters with death Police can encounter death frequently in the course of their duties and these encounters may range from casual contacts with the deaths of others to the most profound and personally consequential confrontations with their own mortality Using the survivor psychology model as its theoretical base this insightful and provocative research ventures into a previously unexplored area of police psychology to illuminate and explore the new modes of adaptation thought and feeling that result from various types of death encounters in police work The psychology of survival asserts that the psychological world of the survivor one who has come in close physical or psychic contact with death but nevertheless managed to live is characterized by five themes psychic numbing death guilt the death imprint suspicion of counterfeit nurturance and the struggle to make meaning These themes become manifest in the survivor's behavior permeating his or her lifestyle and worldview Drawing on extensive interviews with police officers in five nominal categories rookie officers patrol sergeants crime scene technicians homicide detectives and officers who survived a mortal combat situation in which an assailant or another officer died Henry identifies the impact such death encounters have upon the individual the police organization and the occupational culture of policing He has produced a comprehensive and highly textured interpretation of police psychology and police behavior bolstered by the unique insights that come from his personal experience as an officer his intimate familiarity with the subtleties and nuances of the police culture's value and belief systems and his meticulous research and rigorous method Death Work provides a unique prism through which to view the individual organizational and social dynamics of contemporary urban policing With a foreword by Robert Jay Lifton and a chapter devoted to the local police response to the World Trade Center attacks Death Work will be of interest to psychologists and criminal justice experts as well as police officers eager to gain insight into their unique relationship to death

Space Case Stuart Gibbs, 2014-09-16 It's a murder mystery on the moon in this humorous and suspenseful space adventure from the author of Belly Up and Spy School that The New York Times Book Review called a delightful and brilliantly constructed middle grade thriller Like his fellow lunarnauts otherwise known as Moonies living on Moon Base Alpha twelve year old Dashiell Gibson is famous the world over for being one of the first humans to live on the moon And he's bored out of his mind Kids aren't allowed on the lunar surface meaning they're trapped inside the tiny moon base with next to nothing to occupy their time and the only other kid Dash's age spends all his time hooked into virtual reality games Then Moon Base Alpha's top scientist turns up dead Dash senses there's foul play afoot but no one believes him Everyone agrees Dr Holtz went onto the lunar surface without his helmet properly affixed simple as that But Dr Holtz was on the verge of an important new discovery Dash

finds out and it's a secret that could change everything for the Moonies a secret someone just might kill to keep

Genealogies Of Interacting Particle Systems Matthias Birkner, Rongfeng Sun, Jan M Swart, 2020-02-24 Interacting particle systems are Markov processes involving infinitely many interacting components Since their introduction in the 1970s researchers have found many applications in statistical physics and population biology Genealogies which follow the origin of the state of a site backwards in time play an important role in their studies especially for the biologically motivated systems The program Genealogies of Interacting Particle Systems held at the Institute for Mathematical Sciences National University of Singapore from 17 July to 18 Aug 2017 brought together experts and young researchers interested in this modern topic Central to the program were learning sessions where lecturers presented work outside of their own research as well as a normal workshop This is reflected in the present volume which contains two types of articles Written by respected researchers including experts in the field such as Steve Evans member of the US National Academy of Sciences as well as Anton Wakolbinger Andreas Greven and many others this volume will no doubt be a valuable contribution to the probability community Advancements in Smart City and Intelligent Building Qiansheng Fang, Quanmin Zhu, Feng Qiao, 2019-04-03

The book entitled Advancements in Smart City and Intelligent Building is the Proceedings of the International Conference on Smart City and Intelligent Building ICSCIB 2018 held in Hefei China September 15 16 2018 It contains 58 papers in total categorized into 8 different tracks on Building Energy Efficiency Construction Robot and Automation Intelligent Community and Urban Safety Intelligentization of Heating Ventilation Air Conditioning System Information Technology and Intelligent Transportation Systems New Generation Intelligent Building Platform Techniques Smart Home and Utility and Smart Underground Space which cover a wide range areas of smart cities and intelligent buildings ICSCIB2018 provided an international forum for professionals academics and researchers to present the latest developments from interdisciplinary theoretical studies computational algorithm developments and engineering applications in smart cities and smart buildings This academic event featured many opportunities to network with colleagues from around the world in a wonderful environment Its program covered invitation and presentations from scientists researchers and practitioners who have been working in the related areas to establish platforms for collaborative research projects in these fields The conference invited leaders from industry and academia to exchange and share their experiences present research results explore collaborations and to spark new ideas with the aim of developing new projects and exploiting new technology in these fields and bridge theoretical studies and emerging applications in various science and engineering branches This book addresses the recent development and achievement in the field of smart city and intelligent building It is primarily intended for researchers and students for undergraduate and postgraduate programs in the background of multiple disciplines including computer science information systems information technology automatic control and automation electrical and electronic engineering and telecommunications who wish to develop and share their ideas knowledge and new findings in smart city and intelligent

building Numerical Ecology P. Legendre,Loic F J Legendre,1998-11-25 The book describes and discusses the numerical methods which are successfully being used for analysing ecological data using a clear and comprehensive approach These methods are derived from the fields of mathematical physics parametric and nonparametric statistics information theory numerical taxonomy archaeology psychometry sociometry econometry and others Compared to the first edition of Numerical Ecology this second edition includes three new chapters dealing with the analysis of semiquantitative data canonical analysis and spatial analysis New sections have been added to almost all other chapters There are sections listing available computer programs and packages at the end of several chapters As in the previous English and French editions there are numerous examples from the ecological literature and the choice of methods is facilitated by several synoptic tables **Quantum Reality** Nick Herbert,2011-09-21 This clearly explained layman s introduction to quantum physics is an accessible excursion into metaphysics and the meaning of reality Herbert exposes the quantum world and the scientific and philosophical controversy about its interpretation *Indefinite-Quadratic Estimation and Control* Babak Hassibi,Ali H. Sayed,Thomas Kailath,1999-01-01 Presents a unified mathematical framework for a wide range of problems in estimation and control

Indefinite Inner Product Spaces, Schur Analysis, and Differential Equations Daniel Alpay,Bernd Kirstein,2018-01-30 This volume which is dedicated to Heinz Langer includes biographical material and carefully selected papers Heinz Langer has made fundamental contributions to operator theory In particular he has studied the domains of operator pencils and nonlinear eigenvalue problems the theory of indefinite inner product spaces operator theory in Pontryagin and Krein spaces and applications to mathematical physics His works include studies on and applications of Schur analysis in the indefinite setting where the factorization theorems put forward by Krein and Langer for generalized Schur functions and by Dijksma Langer Luger Shondin play a key role The contributions in this volume reflect Heinz Langer s chief research interests and will appeal to a broad readership whose work involves operator theory **Specifications and Drawings of Patents Issued from the United States Patent Office** United States. Patent Office,1906 **Introduction to the Theory of Games** J. C. C. McKinsey,2012-11-14 This comprehensive overview of the mathematical theory of games illustrates applications to situations involving conflicts of interest including economic social political and military contexts Advanced calculus a prerequisite Includes 51 figures and 8 tables 1952 edition **Agent-Based Modelling for Criminological Theory Testing and Development** Henk Elffers,Charlotte Gerritsen,2020-11-30 Agent Based Modelling for Criminological Theory Testing and Development addresses the question whether and how we can use simulation methods in order to test criminological theories and if they fail to be corroborated how we can use simulation to mend and further develop theories It is by no means immediately obvious how results being observed in an artificial environment have any relevance for what is going on in the real world By using the concept of a stylized fact the contributors bridge the gap between artificial and real world With backgrounds in criminology or artificial intelligence AI these contributors present

agent based model studies that test aspects of various theories including crime pattern theory guardianship in action theory near repeat theory routine activity theory and general deterrence theory All six simulation models presented have been specially developed for the book Contributors have specified the theory identified stylized facts developed an agent based simulation model let it run and interpreted whether the chosen stylized fact is occurring in their model and what we should conclude from congruence or incongruence between simulation and expectations based on the theory under scrutiny The final chapter discusses what can be learnt from these six enterprises The book will be of great interest to scholars of criminology in particular computational criminologists and theoretical criminologists and AI with an emphasis on AI for generative social processes and more widely researchers in social science in general It will also be valuable for master s courses in quantitative criminology

Unilateral Variational Analysis In Banach Spaces (In 2 Parts) Lionel Thibault,2023-02-14 The monograph provides a detailed and comprehensive presentation of the rich and beautiful theory of unilateral variational analysis in infinite dimensions It is divided into two volumes named Part I and Part II Starting with the convergence of sets and the semilimits and semicontinuities of multimappings the first volume develops the theories of tangent cones of subdifferentials of convexity and duality in locally convex spaces of extended mean value inequalities in absence of differentiability of metric regularity of constrained optimization problems The second volume is devoted to special classes of non smooth functions and sets It expands the theory of subsmooth functions and sets of semiconvex functions and multimappings of primal lower regular functions of singularities of non smooth mappings of prox regular functions and sets in general spaces of differentiability of projection mapping and others for prox regular sets Both volumes I and II contain for each chapter extensive comments covering related developments and historical comments Connected area fields of the material are optimization optimal control variational inequalities differential inclusions mechanics economics The book is intended for PhD students researchers and practitioners using unilateral variational analysis tools

Eye Movements and Psychological Processes Richard A. Monty,John W. Senders,2017-03-27 In the 10 years prior to publication the quantity of research on eye movements as they pertain to psychological processes had been increasing at a rapid rate Originally published in 1976 the editors purpose was to bring together investigators representing different theoretical positions and methodological approaches to present their recent findings to debate the theoretical points of view and to identify and discuss the major research problems on eye movements at the time An attempt was made to invite participants ranging all the way from promising graduate students through the established authorities in the field The result was an intensive three day session with meetings from early morning until late into the evening with much opportunity for formal and informal group discussion The edited papers and transcripts of the discussions are the contents of this book

Proceedings of the 4th International Conference on Performance Based Design in Earthquake Geotechnical Engineering (Beijing 2022) Lanmin Wang,Jian-Min Zhang,Rui Wang,2022-09-19 The 4th International Conference on Performance based Design

in Earthquake Geotechnical Engineering PBD IV is held in Beijing China The PBD IV Conference is organized under the auspices of the International Society of Soil Mechanics and Geotechnical Engineering Technical Committee TC203 on Earthquake Geotechnical Engineering and Associated Problems ISSMGE TC203 The PBD I PBD II and PBD III events in Japan 2009 Italy 2012 and Canada 2017 respectively were highly successful events for the international earthquake geotechnical engineering community The PBD events have been excellent companions to the International Conference on Earthquake Geotechnical Engineering ICEGE series that TC203 has held in Japan 1995 Portugal 1999 USA 2004 Greece 2007 Chile 2011 New Zealand 2015 and Italy 2019 The goal of PBD IV is to provide an open forum for delegates to interact with their international colleagues and advance performance based design research and practices for earthquake geotechnical engineering

Nearly Zero Energy Building Refurbishment Fernando Pacheco Torgal, Marina Mistretta, Artūras Kaklauskas, Claes G. Granqvist, Luisa F. Cabeza, 2013-10-22 The recast of the Energy Performance of Buildings Directive EPBD was adopted by the European Parliament and the Council of the European Union on 19 May 2010 For new buildings the recast fixes 2020 as the deadline for all new buildings to be nearly zero energy and even sooner for public buildings by the end of 2018 This book gives practitioner an important tool to tackle the challenges of building refurbishment towards nearly zero energy This book is welcome at this time and sets the scene for professionals whether practitioners or researchers to learn more about how we can make whether old or new buildings more efficient and effective in terms of energy performance

Mathematical Analysis and Numerical Methods for Science and Technology Robert Dautray, Jacques-Louis Lions, 2012-12-06 299 G t and to obtain the corresponding properties of its Laplace transform called the resolvent of $A R p A p l l$ whose existence is linked with the spectrum of A The functional space framework used will be for simplicity a Banach space 3 To summarise we wish to extend definition 2 for bounded operators $A i e G t \exp tA$ to unbounded operators A over X where X is now a Banach space Plan of the Chapter We shall see in this chapter that this enterprise is possible that it gives us in addition to what is demanded above some supplementary information in a number of areas a new explicit expression of the solution the regularity of the solution taking into account some conditions on the given data $u u_1 f$ etc with the notion of a strong solution o asymptotic properties of the solutions In order to treat these problems we go through the following stages in 1 we shall study the principal properties of operators of semigroups $G t$ acting in the space X particularly the existence of an upper exponential bound in t of the norm of $G t$ In 2 we shall study the functions $u E X$ for which $t G t u$ is differentiable

Issues in Calculus, Mathematical Analysis, and Nonlinear Research: 2013 Edition, 2013-05-01 Issues in Calculus Mathematical Analysis and Nonlinear Research 2013 Edition is a ScholarlyEditions book that delivers timely authoritative and comprehensive information about Mathematical Analysis The editors have built Issues in Calculus Mathematical Analysis and Nonlinear Research 2013 Edition on the vast information databases of ScholarlyNews You can expect the information about Mathematical Analysis in this book to be deeper than what you can

access anywhere else as well as consistently reliable authoritative informed and relevant The content of Issues in Calculus Mathematical Analysis and Nonlinear Research 2013 Edition has been produced by the world s leading scientists engineers analysts research institutions and companies All of the content is from peer reviewed sources and all of it is written assembled and edited by the editors at ScholarlyEditions and available exclusively from us You now have a source you can cite with authority confidence and credibility More information is available at <http://www.ScholarlyEditions.com> **Passive**

Macromodeling Stefano Grivet-Talocia, Bjorn Gustavsen, 2015-12-07 Offers an overview of state of the art passive macromodeling techniques with an emphasis on black box approaches This book offers coverage of developments in linear macromodeling with a focus on effective proven methods After starting with a definition of the fundamental properties that must characterize models of physical systems the authors discuss several prominent passive macromodeling algorithms for lumped and distributed systems and compare them under accuracy efficiency and robustness standpoints The book includes chapters with standard background material such as linear time invariant circuits and systems basic discretization of field equations state space systems as well as appendices collecting basic facts from linear algebra optimization templates and signals and transforms The text also covers more technical and advanced topics intended for the specialist which may be skipped at first reading Provides coverage of black box passive macromodeling an approach developed by the authors Elaborates on main concepts and results in a mathematically precise way using easy to understand language Illustrates macromodeling concepts through dedicated examples Includes a comprehensive set of end of chapter problems and exercises Passive Macromodeling Theory and Applications serves as a reference for senior or graduate level courses in electrical engineering programs and to engineers in the fields of numerical modeling simulation design and optimization of electrical electronic systems Stefano Grivet Talocia PhD is an Associate Professor of Circuit Theory at the Politecnico di Torino in Turin Italy and President of IdemWorks Dr Grivet Talocia is author of over 150 technical papers published in international journals and conference proceedings He invented several algorithms in the area of passive macromodeling making them available through IdemWorks Bj rn Gustavsen PhD is a Chief Research Scientist in Energy Systems at SINTEF Energy Research in Trondheim Norway More than ten years ago Dr Gustavsen developed the original version of the vector fitting method with Prof Semlyen at the University of Toronto The vector fitting method is one of the most widespread approaches for model extraction Dr Gustavsen is also an IEEE fellow *Reliable Knowledge Discovery* Honghua Dai, James N. K. Liu, Evgueni Smirnov, 2012-02-23 Reliable Knowledge Discovery focuses on theory methods and techniques for RKDD a new sub field of KDD It studies the theory and methods to assure the reliability and trustworthiness of discovered knowledge and to maintain the stability and consistency of knowledge discovery processes RKDD has a broad spectrum of applications especially in critical domains like medicine finance and military Reliable Knowledge Discovery also presents methods and techniques for designing robust knowledge discovery processes Approaches to assessing the reliability of the discovered knowledge are

introduced Particular attention is paid to methods for reliable feature selection reliable graph discovery reliable classification and stream mining Estimating the data trustworthiness is covered in this volume as well Case studies are provided in many chapters Reliable Knowledge Discovery is designed for researchers and advanced level students focused on computer science and electrical engineering as a secondary text or reference Professionals working in this related field and KDD application developers will also find this book useful

This is likewise one of the factors by obtaining the soft documents of this **Space Case** by online. You might not require more mature to spend to go to the books introduction as well as search for them.
