Space Flight Tim Furniss,1989-04-01 **Human Spaceflight** Joseph A. Angelo,2014-05-14 Presents an introduction to human space exploration discussing the evolution of space technology that has allowed the human race to go from merely orbiting the Earth to landing on the Moon and living for months in a space station **U.S. Human Spaceflight** Judy A. Rumerman,1998 **NASA Historical Data Book: NASA launch systems, space transportation, human spaceflight, and space science, 1979-1988** Jane Van Nimmen,1988 **Space Flight** Tim Furniss,1985 **Spaceflight** Michael J. Neufeld,2018-10-16 A concise history of spaceflight from military rocketry through Sputnik Apollo robots in space space culture and human spaceflight today Spaceflight is one of the greatest human achievements of the twentieth century The Soviets launched Sputnik the first satellite in 1957 less than twelve years later the American Apollo astronauts landed on the Moon In this volume of the MIT Press Essential Knowledge series Michael Neufeld offers a concise history of spaceflight mapping the full spectrum of activities that humans have developed in space Neufeld explains that the space program should not be equated only with human spaceflight Since the 1960s unmanned military and commercial spacecraft have been orbiting near the Earth and robotic deep space explorers have sent back stunning images of faraway planets Neufeld begins with the origins of space ideas and the discovery that rocketry could be used for spaceflight He then discusses the Soviet U S Cold War space race and reminds us that NASA resisted adding female astronauts even after the Soviets sent the first female cosmonaut into orbit He analyzes the two rationales for the Apollo program prestige and scientific discovery this last something of an afterthought He describes the internationalization and privatization of human spaceflight after the Cold War the cultural influence of space science fiction including Star Trek and Star Wars space tourism for the ultra rich and the popular desire to go into space Whether we become a multiplanet species as some predict or continue to call Earth home this book offers a useful primer *Guide to Federal Records in the National Archives of the United States: Record groups 171-515* United States. National Archives and Records Administration,1995 [Air University Library Index to Military Periodicals](#),1965 [Soviet Space Programs: 1981-1987: Piloted Space Activities, Launch Vehicles, Launch Sites, and Tracking Support](#) Congressional Service,2016-09 **The Early Days of Space Exploration** Daniel E. Harmon,2017-07-15 Since ancient times people have envisioned the possibility of space travel Spaceflight finally became a reality after many centuries of scientific study on two fronts astronomy and flight Theories about the solar system were proposed tested and revised Instruments for examining the night skies were invented and improved Flight was accomplished as a result of countless experiments some of them deadly This resource traces space exploration one of the most exciting pursuits in history from the legend of Icarus to the reality of Sputnik **Spaceflight Revolution** James R. Hansen,1995 *China's Space Program - From Conception to Manned Spaceflight* Brian Harvey,2004-07-15 This book is designed for publication straight after the launch of China s first manned spacecraft The precursor mission Shenzhou flew unmanned in November

1999 in line with the predictions of The Chinese Space Programme From Conception to Future Capabilities 1998 the first edition of this retitled book China's Space Program From Conception to Manned Spaceflight builds on the 1998 title to take account of the first manned flight in October 2003 It also brings the reader up to date with other developments in the Chinese space programme over from 1998 to the manned flight and looks forward to China's future plans and ambitions

The Race to the Moon Chronicled in Stamps, Postcards, and Postmarks Umberto Cavallaro,2018-10-05

The story of the famed race to the Moon between the US and the USSR has been told countless times The strategies of these two superpowers have often been paralleled in a way that highlights their fight for dominance and efforts to develop needed new technologies This book will show how beneath these surface similarities the two competing nations employed very different core tactics It provides a new perspective of the history of the space race by analyzing that history through philately that is from the images on postage stamps post cards and letters in circulation at that time Through this fascinating historical visual record the author shows how the propaganda heavy approach of the USSR eventually lost out to the more pragmatic approach of the United States

From Cave Art to Hubble Jonathan Powell,2019-11-20 Since ancient times humans have been engaged in a continual quest to find meaning in and make sense of sights and events in the night sky Cultures spread around the world recorded their earliest efforts in artwork made directly on the natural landscapes around them and from there they developed more and more sophisticated techniques for observing and documenting astronomy This book brings readers on an astronomical journey through the ages offering a history of how our species has recorded and interpreted the night sky over time From cave art to parchment scribe to modern X ray mapping of the sky it chronicles the ever quickening development of tools that informed and at times entirely toppled our understanding of the natural world Our documentation and recording techniques formed the bedrock for increasingly complex forays into astronomy and celestial mechanics which are addressed within these chapters Additionally the book explores how nature itself has recorded the skies in its own way

which can be unraveled through ongoing geological and archaeological studies This tale of human discovery and ingenuity over the ages will appeal to anybody interested in the field of astronomy and its rich cultural history **To The Stars**

Umberto Cavallaro,2023-05-23 This book is the second edition of Women Spacefarers and tells the fascinating stories of the valiant women who broke down barriers to join the space program Beginning with the orbital flight of USSR cosmonaut Valentina Tereshkova in 1963 and continuing to the present day it covers the many female players who have had a central role in the greatest adventure of our time The book includes the biographies of and in some cases interviews with the brave women who have flown in space For each entry the author contextualizes the spacefarer s accomplishments in light of the political and cultural climate of the time The second edition features fifteen additional profiles on figures such as Jessica Meir and Wally Funk new interview material a new thematic structure based on each woman s science specialty and role an expanded glossary and more The result is a gallery of pioneering women who reached for the stars women who with exceptional skill hard work and dedication reached impressive careers as accomplished pilots researchers engineers and managers and left a legacy of strength for all aspiring spacefarers
