Space In The Tropics From Convicts To Rockets In French Guiana:

Diary of an Overland Journey to Colorado, 1863 Collection contains a daily logbook written by a man from Linneus Mo traveling in a party by wagon train from St Joseph Mo to Denver Colo via the South Platte route in 1863 typed transcript partly in summary form Space in the Tropics Peter Redfield, 2000-12-19 This title compares the current space programme in French Guiana to the earlier penal colony of Devil s Island highlighting cultural realignments in nature behind the evolution of global technology in a tropical rainforest Space in the Tropics Peter Redfield, 2000-12-19 Rockets roar into space bearing roughly half the world s commercial satellites from the same South American coastal rainforest where convicts once did time on infamous Devil s Island What makes *Space in the Tropics* enthralling is anthropologist Peter Redfield s ability to draw from these two disparate European projects in French Guiana a gleaming web of ideas about the intersections of nature and culture In comparing the Franco European Ariane rocket program with the earlier penal experiment Redfield connects the myth of Robinson Crusoe nineteenth century prison reform the Dreyfus Affair tropical medicine postwar exploration of outer space satellite technology development and ecotourism with a focus on place and the incorporation of this particular place into greater extended systems Examining the wider context of the Ariane program he argues that technology and nature must be understood within a greater ecology of displacement and makes a case for the importance of margins in understanding the trajectories of modern life *The Map in the Machine* Luis F. Alvarez Leon, 2024-04-30 Digital technologies have changed how we shop work play and communicate reshaping our societies and economies To understand digital capitalism we need to grasp how advances in geospatial technologies underpin the construction operation and refinement of markets for digital goods and services In *The Map in the Machine* Luis F Alvarez Leon examines these advances from MapQuest and Google Maps to the rise of IP geolocation ridesharing and a new Earth Observation satellite ecosystem He develops a geographical theory of digital capitalism centered on the processes of location valuation and marketization to provide a new vantage point from which to better understand and intervene in the dominant techno economic paradigm of our time By centering the spatiality of digital capitalism Alvarez Leon shows how this system is the product not of seemingly intangible information clouds but rather of a vast array of technologies practices and infrastructures deeply rooted in place mediated by geography and open to contestation and change **Earth, Cosmos and Culture** Oliver Tristan Dunnett, 2021-04-19 This book traces the development of diverse British cultures of outer space utilizing key geographical concepts such as landscape place and national identity It examines the early visionary ideas of writers H G Wells and Olaf Stapledon the ambitious British space programme of the 1960s and narrations of British cultural identity that accompanied the space missions of Helen Sharman Beagle 2 and Tim Peake The exploration of British cultures of outer space throughout the book helps understand the emergence of the British Interplanetary Society It also explains its significance in pre war and post war periods through an analysis of the roles of influential figures such as Arthur C Clarke

and Patrick Moore The chapters explore utopian and dystopian representations of space exploration examine the mysterious phenomenon of UFO culture and consider plans for humanity's imagined future across interstellar space Throughout the book geography is advocated as a home for critical studies of outer space illuminating its significance in terms of the reciprocal relationships between exploration and the sublime science and the imagination Earth and cosmos As an emergent field of research in the social sciences this book makes an excellent contribution to the study of the outer space in Britain and abroad developing a distinctive kind of outer spatial geography with major implications for future teaching and research

Exploring Ethnography of Outer Space Jenia Gorbanenko, David (Jeeva) Jeevendrampillai, Adryon Kozel, 2025-01-31 This book explores new methods and perspectives in the anthropology of outer space For the past ten years scholarship of outer space has grown significantly in the social sciences Now an international community of anthropologists is starting to produce significant contributions to this work This is pushing the conversations around the future of humanity technology and outer space beyond the realm of speculative theory into concrete challenges to established norms within anthropology Each chapter in this volume introduces a unique take on what constitutes an ethnographic field in anthropology They signal a re imagination of the central concept for the discipline and offer a timely meditation on the shift in anthropology's understanding of fieldwork from its inception until now The volume consists of eleven ethnographic chapters plus an introduction by the editors and two invited responses Each of the main body chapters presents a distinct approach to situating outer space empirically on Earth By bringing together emerging and established scholars this book ultimately posits that an anthropological approach to outer space requires creative approaches to ethnography that are no longer exclusively premised on a co presence with the people under study A primer of innovative ethnographies and an ideal companion to courses on methods this volume will provide students with a body of accessible contemporary work on futurisms and outer space In addition this book will serve as a snapshot of a moment in ethnographically innovative anthropology that will be relevant to a wider academic audience through its exegesis of new methods for the study of distributed communities The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives ShareAlike CC BY NC SA 4.0 license
