Dick, 2008 From the Publisher Proceedings of October 2007 conference sponsored by the NASA History Division and the National Air and Space Museum to commemorate the 50th anniversary of the Sputnik 1 launch in October 1957 and the dawn of the space age *Dawn of the Space Age* Robin Kerrod, 2004-07-04 Introduces the early history of space flight including the Chinese invention of the rocket the pioneering ideas of Tsiolkovsky the early experiments of Goddard and various rocket and satellite launchings up through 1967 *The Space Age* Pam Holden, 2006-08-08 We are living in the Space Age What do we know about space The Earth is our planet It is in space with many other planets Scientists are still discovering new planets People have always seen the sun the moon and millions of stars But now space is being explored We can learn about the size of the planets and what it is like to travel in space **The Long Space Age** Alexander MacDonald, 2017-04-25 An economic historian traces uncovers the story of privately funded space exploration from early 19th century astronomical observatories to SpaceX The standard historical narrative of American space exploration begins during the Cold War with the federal government s efforts to beat the Soviet Union in the Space Race Given this framing the more recent emergence of private sector space exploration appears to be a new and controversial phenomenon But as Alexander MacDonald argues in *The Long Space Age* privately funded space exploration had been happening in the United States long before we tried to put a man on the moon Since the early 19th century private observatories had been making discoveries and developing technologies that led directly to NASA s epochal 20th century achievements And their efforts were no less ambitious for their time than SpaceX and Blue Origin are in today s resurgent space industry *The Long Space Age* examines the economic history of this centuries long development from those first American observatories to the International Space Station [Guide to the Space Age](#) Carl W. Besserer, Hazel C. Besserer, 2012-06-01 [Strange Sounds](#) Timothy D Taylor, 2014-01-02 In *Strange Sounds* Timothy D Taylor explains the wonder and anxiety provoked by a technological revolution that began in the 1940s and gathers steam daily Taylor discusses the ultural role of technology its

use in making music and the inevitable concerns about authenticity that arise from electronic music Informative and highly entertaining for both music fans and scholars *Strange Sounds* is a provocative look at how we perform listen to and understand music today Spacewear Barbara Brownie, 2019-01-10 Today we are living in the New Space Age where mass commercial space travel is almost within our grasp This otherworldly possibility has opened up new cultural images of space both real and fictional and has caused fashion design and spacesuit engineering to intersect in new exciting ways *Spacewear* traverses this uncharted territory by exploring the changing imagination of space in fashion and fashion in space from the first Space Age to the 21st century Exploring how space travel has stylistically and technologically framed fashion design on earth and how we need to revisit established design practices for the weightless environment *Spacewear* connects the catwalk and the space station This book draws together speculative fantasies in sci fi films such as *Star Trek* and *2001 A Space Odyssey* with the engineered spacesuits *Biosuit* and the NASA *Z 2* and with catwalk interpretations by the likes of Alexander McQueen Hussein Chalayan Andr Courr ges and Iris van Herpen While the development of commercial space agencies has led to new concerns for style in garments for outer space that re think fundamental design principles such as drape high fashion has experimented with new possibilities for weightlessness that extend far beyond the 1960s vision of Space Age metallic fabrics and helmet style headwear Brownie takes the reader on a fascinating journey from fantasy to function and to form deepening our understanding of this new category of fashion that is prompting new approaches to garment design and construction both on earth and in outer space Board of Contract Appeals Decisions United States. Findlay, 1993-09-22 The American West conjures up images of pastoral tranquility and wide open spaces but by 1970 the Far West was the most urbanized section of the country Exploring four intriguing cityscapes Disneyland Stanford Industrial Park Sun City and the 1962 Seattle World s Fair John Findlay shows how each created a sense of cohesion and sustained people s belief in their superior urban environment This first book length study of the urban West after 1940 argues that Westerners deliberately tried to build cities that differed radically from their eastern counterparts In 1954 Walt Disney began building the world s first theme park using Hollywood s movie making techniques The creators of Stanford Industrial Park were more hesitant in their approach to a conceptually organized environment but by the mid 1960s the Park was the nation s prototypical research park and the intellectual downtown for the high technology region that became Silicon Valley In 1960 on the outskirts of Phoenix Del E Webb built Sun City the largest most influential retirement community in the United States Another innovative cityscape arose from the 1962 Seattle World s Fair and provided a futuristic somewhat fanciful vision of modern life These four became magic lands that provided an antidote to the apparent chaos of their respective urban milieus Exemplars of a new lifestyle they are landmarks on the changing cultural landscape of postwar America Critical issues in the history of spaceflight Steven J. overlooked element in 20th century literary forms and genres including Beat literature Black American literature second wave feminist fiction science fiction and postmodernist fiction Through close readings of dozens of literary texts alongside print and television ads from this period Dini shows how U S writers have unearthed the paradoxes inherent to claims of appliances capacity to give back time to their user transport them into a technologically progressive future or return them to some pastoral past In so doing she reveals literary appliances role in raising questions about gender norms and sexuality racial exclusion and erasure class anxieties the ramifications of mechanization the perils and possibilities of conformity the limitations of patriotism and the inevitable fallacy of utopian thinking while both shaping and radically disrupting the literary forms in which they operated
