Remapping the Humanities Mary Garrett,Heidi

Gottfried,Sandra F. VanBurkleo,2008 An innovative collection demonstrating the rich potential for interdisciplinary learning found within the network of university based humanities centers Remapping the Humanities celebrates the tenth anniversary of the Wayne State University Humanities Center by bringing together essays that illustrate the richness of public conversations developed in interdisciplinary humanities centers The contributors to this collection represent more than a dozen disciplines including philosophy English political science history law comparative literature and Spanish and taken

together their essays illustrate an ongoing remapping of the intellectual landscape as scholars from across university departments engage one another in unpredictable ways This volume is divided into four thematic sections Identity and Community Remembering and Forgetting Nationalism and Globalism and Toward Post Modernity Yet the essays deliberately represent a range of theoretical perspectives that interact synergistically such as feminism and postcolonial studies or literary criticism and art history They also tackle topics as varied as the formation of the modern family in France and the inculcation of civic virtue in American cities and they draw freely from different sources of evidence like newspaper accounts popular literature paintings and diaries Remapping the Humanities includes unique touches such as a portfolio of full color images and an audio CD of Celtic inspired jazz In addition a preface by Walter Edwards academic director of the Humanities Center at Wayne State University gives some background on this institution and the work being done there The importance of Remapping the Humanities ultimately lies in its refusal to say that learning has ended and the example it provides of the value of calculated ferment and intellectual instability Educators involved with or wanting to learn more about interdisciplinary research will appreciate this unique collection

A Casual Revolution Jesper Juul, 2012-02-10 How casual games like Guitar Hero Bejeweled and those for Nintendo Wii are expanding the audience for video games We used to think that video games were mostly for young men but with the success of the Nintendo Wii and the proliferation of games in browsers cell phone games and social games video games changed fundamentally in the years from 2000 to 2010 These new casual games are now played by men and women young and old Players need not possess an intimate knowledge of video game history or devote weeks or months to play At the same time many players of casual games show a dedication and skill that is anything but casual In *A Casual Revolution* Jesper Juul describes this as a reinvention of video games and of our image of video game players and explores what this tells us about the players the games and their interaction With this reinvention of video games the game industry reconnects with a general audience Many of today's casual game players once enjoyed Pac Man Tetris and other early games only to drop out when video games became more time consuming and complex Juul shows that it is only by understanding what a game requires of players what players bring to a game how the game industry works and how video games have developed historically that we can understand what makes video games fun and why we choose to play or not to play them Important Notice The digital edition of this book is missing some of the images found in the physical edition
