**Timeless Adventures** Brian J. Robb, 2023-10-05 This critical history of Doctor Who covers the series 60 years from the creation of the show to its triumph as Britain s number one TV drama Opening with an in depth account of the creation of the series within the BBC of the early 1960s each decade of the show is tackled through a unique political and pop cultural historical viewpoint exploring the links between contemporary Britain and the stories Doctor Who told and how such links kept the show popular with a mass television audience Timeless Adventures reveals how Doctor Who is at its strongest when it reflects the political and cultural concerns of a mass British audience the 1960s 1970s and 21st Century and at its weakest when catering to a narrow fan based audience as in the 1980s The book also addresses the cancellation of the show in the late 1980s following the series becoming increasingly self obsessed and the ways in which a narrowly focused dedicated fandom contributed to the show s demise and yet was also instrumental in its regeneration for the 21st Century under Russell T Davies and analyses the new

series to reveal what has made it so popular reflecting real world issues like consumerism and dieting

utopia dystopia      **Space Exploration on Film** Paul Meehan, 2022-05-10 Over the course of several decades scientific fact has overtaken science fiction as humankind's understanding of the universe has expanded. Mirroring this development, the cinematic depictions of space exploration over the last century have evolved from whimsical sci-fi fantasies to more fact-based portrayals. This book chronologically examines 75 films that depict voyages into outer space and offers the historical, cultural, and scientific context of each. These films range from Georges Méliès' fantastical *A Trip to the Moon* to speculative science fiction works such as *2001: A Space Odyssey*, *Solaris*, and *Contact*, and fact-based accounts of actual space missions as depicted in *The Right Stuff*, *Apollo 13*, *Salyut 7*, and *First Man*. Each film is analyzed not only in terms of its direction, screenplay, and other cinematic aspects but also its scientific and historical accuracy. The works of acclaimed directors including Fritz Lang, George Pal, Stanley Kubrick, Andrei Tarkovsky, Robert Wise, Ron Howard, Robert Zemeckis, Ridley Scott, and Christopher Nolan are accorded special attention for their memorable contributions to this vital and evolving subgenre of science fiction film.
