Regional Science in Business Graham Clarke, Moss Madden, 2013-03-09 Graham Clarke and Moss Madden 1 1 Background In the mid 1990s there were a number of papers in regional science that questioned the relevance and purpose of the entire sub discipline Bailly and Coffey 1994 for example talked of regional science in crisis They argued that there were two fundamental problems First regional science was too theoretical in the sense that many of its products were models that could neither be calibrated too complex or operationalised too abstract in the real world They suggested that regional science had not sufficiently demonstrated that it can address real world problems and subsequently lacked a focus on relevant policy issues Second they argued that regional science had become too narrow in focus and had moved away too far from real people and their daily concerns or struggles in life This was not the first time we had witnessed these sorts of arguments both from outside the discipline and from within Sayer 1976 was perhaps the first to argue for a shift from a model based focus in regional science to one based on political economy Breheny 1984 criticised the deep ignorance among

regional scientists of the nature of practical policy making and implementation see also Rodwin 1987 for similar views in the mid 1980s Such self reflection is a feature of many disciplines as they reach maturity There have been many similar reflections in geography Johnston 1996 Barnes 1996 and economics see the collection in the January edition of the Economic Journal 1991 **Knowledge, Complexity and Innovation Systems** Manfred M. Fischer, Josef Fröhlich, 2013-11-27 In

recent years there has been growing scientific interest in the triangular relationship between knowledge complexity and innovation systems The concept of innovation systems carries the idea that innovations do not originate as isolated discrete phenomena but are generated through the interaction of a number of actors or agents This set of actors and interactions possess certain specific characteristics that tend to remain over time Such characteristics are also shared by national regional sectoral and technological interaction systems They can all be represented as sets of institutional actors and interactions whose ultimate goal is the production and diffusion of knowledge The major theoretical and policy problem posed by these systems is that knowledge is generated not only by individuals and organisations but also by the often complex pattern of interaction between them To understand how organisations create new products new production techniques and new organisational forms is important An even more fundamental need is to understand how organisations create new knowledge if this knowledge creation lies in the mobilisation and conversion of tacit knowledge Although much has been written about the importance of knowledge in management little attention has been paid to how knowledge is created and how the knowledge creation process is managed The third component of the research triangle concerns complexity National Transport Models Lars Lundqvist, Lars-Göran Mattsson, 2013-11-11 National and European transport

models become increasingly important The broadening of national transport policy from strategic infrastructure investments to infrastructure management strengthens the need for advanced and more policy sensitive tools of analysis The increase of interregional and international mobility requires forecasting tools that go beyond the urban or regional level The competition for national infrastructure investments among regions and for Trans European investments among nations has to be resolved by decisions and decision support systems at the appropriate spatial level Environmental impacts transcend regional and national boundaries and transport policies affecting these environmental impacts involve all spatial levels This volume presents the state of the art and prospects of a sample of the most advanced national and European transport models within a comparative framework *Socioeconomic Environmental Policies and Evaluations in Regional Science* Hiroyuki

Econometric Modelling of European Money Demand Engelbert Plassmann, 2012-12-06 The introduction of a single European currency constitutes a remarkable instance of internationalization of monetary policy Whether a concomitant internationalization can be detected also in the econometric foundations of monetary policy is the topic dealt with in this book The basic theoretical ingredients comprise a data driven approach to econometric modelling and a generalized approach to cross sectional aggregation The empirical result is a data consistent structural money demand function isolated within a properly identified dynamic macroeconomic system for Europe The book itself evolved from a research project within the former Sonderforschungsbereich SFB 178 Internationalization of the Economy at the University of Konstanz Its finalization entails a due amount of gratitude to be extended into several directions I am personally indebted first of all to my academic supervisor Professor Dr Nikolaus Laufer for originally inspiring this work and for meticulously perusing its

eventual result Professor Dr Winfried Pohlmeier as a second supervisor provided valuable confidence bounds around an earlier draft The comments of both supervisors contributed substantially to the present shape of the book I am institutionally indebted to the University of Konstanz notably its Faculty of Economics and Statistics for continuous provision of an excellent research environment and to the Deutsche Forschungsgemeinschaft in Bonn for generous sponsorship of the former SFB whose financial support during that period is gratefully acknowledged I am also indebted to Dresdner Bank AG Frankfurt Risk Methodology Trading for benign tolerance of all distractions associated with the preparation of the final manuscript

The NEBI YEARBOOK 2003 Pertti Joenniemi, Lars Hedegaard, Heikki Eskelinen, Bjarne Lindström, Karin Peschel, Carl-Einar Stalvant, 2012-12-06 Björn Tore Godal Norwegian Ambassador to Germany Chairman of the Editorial Advisory Board Several of the contributions to the present volume of The NEBI Yearbook have been inspired by the fact that roughly speaking ten years have passed since the first steps were taken to initiate cross border co operation in the Barents and Baltic Sea areas One of the most important co operative organisations in the European Northeast i e The Council of the Baltic Sea States was launched in 1992 The Barents Euro Arctic Council was established in 1993 An avalanche of co operative and cross border initiatives has since hit this part of Europe with all kinds of actors participating states regional and municipal authorities universities national organisations businesses and private interests Even international organisations and actors from outside the immediate NEBI area have taken a special interest in this dynamic part of the world Among the most important is the European Union whose Finnish inspired Northern Dimension initiative has become a permanent fixture As many of the chapters in NEBI 2003 testify integration in the NEBI area across old political and ideological borders and cultural and socio economic divides that are among the most pronounced anywhere in the world has on the whole been a great success

Utility and Production Pablo Coto-Millán, 2012-12-06 This book is different from the first edition There are three entirely new chapters 2 6 and 9 I have also included new sections in chapters 1 4 and 8 Moreover the remaining chapters 3 5 and 7 have been revised and updated In chapters 2 and 6 I felt it was necessary to include the main alternative theories of consumer and company behaviour along with the neo classical models The book contains four chapters of theory 1 2 5 and 6 and four chapters with theoretical and empirical applications 3 4 7 and 8 Finally chapter nine looks at choices made under conditions of uncertainty September 2002 P Coto Millan Preface to the First Edition Grateful acknowledgment is made to CICYT Comision Interministerial de Ciencia y Tecnologia National Plan R D Projects N TXT96 2467 and N TXT98 1453 for its financial support This text presents the economic theories on Utility and Production In addition such theories are used to explain the real problems of consumers and firms and several studies carried out by the author are displayed Some collaboration by other professors of Economics is mentioned in the corresponding footnotes The responsibility for errors and omissions however rests entirely upon the author In chapters 1 and 4 of the book I try to present the theory of Utility and Production Chapter 3 presents new functional forms and two empirical applications on demand

functions and systems In chapters 2 and 5 the main theorems and properties presented in chapters 1 and 4 are applied

Business Cycles in the Contemporary World Bernd Süßmuth, 2012-12-06 The book provides a thorough and sophisticated descriptive analysis of business cycles in a historical perspective The study is based on the latest available time series as well as latest techniques from the frequency domain A combined univariate and bivariate analysis is conducted on the national as well as supranational G7 and Euro Area wide level Issues of stability volatility and cyclicity are investigated jointly An extensive analysis of US manufacturing investment series on the fairly disaggregated four digit level highlights the limits of linear models to capture the sectoral aggregation process Synchronization is modelled by a mode locking mechanism of industrial investment cycles induced by informational externalities The model in its stochastic version is numerically simulated to assess an agreement between model and data

Struggling for Leadership: Antwerp-Rotterdam Port Competition between 1870 -2000 Reginald Loyen, Erik Buyst, Greta Devos, 2012-12-06 The present volume contains the proceedings of an international conference on the economic history of the seaports of Antwerp and Rotterdam 1870 2000 This venue was held at Antwerp on 10 11 May 2001 and was hosted by the Antwerp Port Authority This international conference aimed at confronting the development of both ports In the course of the last century and a half economic growth in the ports of Antwerp and Rotterdam has been staggering Maritime economic historians economists and geographers alike have investigated the development of both ports extensively but separately So far only a limited number of attempts have been made to analyse Rotterdam Antwerp port history from a comparative perspective The papers presented at the conference provide a challenging starting point to certain how and why both ports reacted differently to virtually the same economic and political stimuli By bringing together both historians economists and lawyers with different fields of interest we have attempted to put the history of the ports of Antwerp and Rotterdam in a broader international and comparative perspective

The Role of Financial Markets in the Transition Process Emilio Colombo, John Driffill, 2012-12-06 Financial Markets play an important role in economic development channeling saving to investments and facilitating growth In Eastern Europe financial markets were initially much underdeveloped and lacked the skills and infrastructure they needed to be efficient having not acquired them in the pre transition era The book offers a both theoretical and empirical analysis of financial markets in transitional economies It investigates financial markets in Hungary the Czech Republic and Poland and their role in the developments in the 1990s
