Ali Madanipour, 2010-01-21 Public spaces mirror the complexities of urban societies as historic social bonds have weakened and cities have become collections of individuals public open spaces have also changed from being embedded in the social fabric of the city to being a part of more impersonal and fragmented urban environments Can making public spaces help overcome this fragmentation where accessible spaces are created through inclusive processes This book offers

some answers to this question through analysing the process of urban design and development in international case studies in which the changing character level of accessibility and the tensions of making public spaces are explored The book uses a coherent theoretical outlook to investigate a series of case studies crossing the cultural divides to examine the similarities and differences of public space in different urban contexts and its critical analysis of the process of development management and use of public space with all its tensions and conflicts While each case study investigates the specificities of a particular city the book outlines some general themes in global urban processes It shows how public spaces are a key theme in urban design and development everywhere how they are appreciated and used by the people of these cities but also being contested by and under pressure from different stakeholders

and artists take up critical spatial practice Bridging ideas from multiple countries and approaches to design scholarship each chapter seeks to find places of convergence for the multiple strands that form around themes of practice equality methods theory ethics pedagogy and representation Rendell s foreword and postscript provide context for these themes and suggest a way forward in today s challenging changing times *Critical Qualitative Research and Social Justice* Penny A.
