Spatial Perspectives On Problems And Policies:

Social Areas in Cities: Spatial perspectives on problems and policies David T. Herbert, Ronald John Johnston, 1976

Spatial Perspectives on Problems and Policies, 1979 Regional Problems and Policies in Latin America Juan R.

Cuadrado-Roura, Patricio Aroca, 2014-01-07 This contributed volume is the first book in English to offer a current and critical vision of regional problems and policies in the countries of Latin America. The book is in three main parts: a general overview of regional processes and trends in Latin America as a whole; country level coverage of seven individual countries and comparative analyses of common major problems such as migration, education, labor, poverty, decentralization, exports and foreign direct investments. Written by renowned academics and experts from the region, the book seeks to provide a better understanding of regional challenges and trends, regional disparities that exist in many Latin American countries, and the increasing importance of metropolitan areas.

Rural Change and Public Policy William P. Avery, Richard E. Lonsdale, Ivan Volgyes, 2013-10-22 Rural Change and Public Policy: Eastern Europe, Latin America and Australia examines rural change and related public policies in three contrasting areas of the world to identify common problems and gain insight and understanding of the change process. This book is organized into five parts encompassing 15 chapters. Part I provides a conceptual background useful in examining rural development issues in an international perspective, focusing on economic development. Usually the central question in public policy deliberations on rural areas. This part also emphasizes the interdependence between rural and urban areas as well as the importance of rural-urban regional inequity considerations. Part II deals with the critical role of government in influencing and directing rural change, while Part III surveys some of the changing attitudes and attitudinal responses of rural residents experiencing social, political, educational and/or economic change. Part IV considers the broad issue of rural workers and employment opportunities, a critical issue in rural societies. Part V looks into the problems of land utilization and land tenure.

Social areas in cities. Volume II David T. Herbert,

Social Science and Social Policy Martin I. A. Bulmer, 2021-12-29 First published in 1986, *Social Science and Social Policy* addresses major questions concerned with the social utility of social science. The book is divided into four parts. The first part considers the place of social science in the policy-making process and criticizes the rational model which gives a central place to analysis. In part two, five different methodologies for policy research are considered: the use of continuous surveys, public opinion polls, social indicators, evaluation research, and social experimentations, and the use of qualitative methods. The advantages and drawbacks of each are considered with extensive use of examples. In the third part, the role of theory is examined. Particular attention is paid to the issue of health inequality. In part four, general questions are raised about the use and abuse of social science, including questions about how it can be most effectively disseminated to make maximum impact. The book is aimed at a general readership and requires no special methodological expertise. It will appeal particularly to undergraduates and graduate students taking courses in social policy, public policy, applied sociology, and a

range of applied social sciences such as criminology health studies education and social work Social Areas in Cities: Spatial perspectives on problems and policies David Herbert, Ronald John Johnston, 1976 *Policy Integration for Complex Environmental Problems* Helen Briassoulis, 2017-07-05 The quest for policy integration crystallized in the 1990s as awareness was growing that the current supply of narrow sectoral and little coordinated or even overlapping and conflicting policies could not cope efficiently and effectively with contemporary complex cross cutting and interdependent socio environmental problems Combining and coordinating policies properly promises to address this institutional misfit add value to policies support planning at national and sub national levels and facilitate the transition to sustainable development more generally This book proposes a comprehensive conceptualization of policy integration and negotiates pertinent theoretical methodological and applied issues from the perspective of selected EU policies rural development regional development transport social economic environmental water resources and biodiversity policy Mediterranean desertification an exceptionally complex socio environmental problem is used as an illustrative example as the idea for this book transpired while researching the topic of policy making to combat desertification in the context of MEDACTION an EU funded research project **WorldMinds: Geographical Perspectives on 100 Problems** Donald G. Janelle, Barney Warf, Kathy Hansen, 2004-05-31 Geography today is a vibrant amalgam of theories methods and data about past current and emerging worlds Geography and the geographers who produce it dwell at the intersection of the natural sciences the social sciences and the humanities and various admixtures of their theories methods and data constitute the 100 chapters included in WorldMinds Arrayed under the rubrics of politics and power human wellbeing cities livelihood ecosystems human environment interactions hazards natural systems new methods and human perceptions these 100 short essays reveal and exemplify the conceptual and topical richness of contemporary North American geography As is evident in these rubrics and essays geography today is a many splendored enterprise ranging as the editors note from feminist deconstruction to fluvial geomorphology Geographers have something strikingly valuable to say about many if not most of the problems that confront individuals and groups in locales and regions ranging from the plots of smallholders to the entire globe The diverse chapters of WorldMinds well illustrate some of the key geographical perspectives that contribute usefully to the broader understanding of common problems **The Handbook of Maritime Economics and Business** Costas Grammenos, 2013-07-04 This book is the founding title in the Grammenos Library The diversity of the subjects covered is unique and the results of research developed over many years are not only comprehensive but also have important implications on real life issues in maritime business The new edition covers a vast number of topics including Shipping Economics and Maritime Nexus International Seaborne Trade Economics of Shipping Market and Shipping Cycles Economics of Shipping Sectors Issues in Liner Shipping Economics of Maritime Safety and Seafaring Labour Market National and International Shipping Policies Aspects of Shipping Management and Operations Shipping Investment and Finance Port

Economics and Management Aspects of International Logistics **GIS and Evidence-Based Policy Making** Stephen Wise, Max Craglia, 2007-12-28 Although much has been written on evidence based policy making this is the first volume to address the potential of GIS in this arena GIS and Evidence Based Policy Making covers the development of new methodological approaches emphasizing the identification of spatial patterns in social phenomena It examines organizational issues including the **Cities In Space** Prof David Herbert, Dr Colin Thomas, 2013-11-26 This is the third major revision of a text first published in 1982 with the title Urban Geography A First Approach and in 1990 as Cities in Space City as Place The study of urban geography remains an important part of the geographical curriculum both in schools and in higher education This book analyses life in an urban society and in a world which is being transformed by the processes of urbanization to study urban geography is to study environments and phenomena significant to our everyday lives This is an introductory text which aims to present both more traditional and newer approaches to urban geography in an accessible and educational way

Policies and Plans for Rural People (Routledge Revivals) Paul Cloke, 2013-10-18 This edited collection first published in 1988 was the first title to bring international perspectives into the field of rural planning Using a comparative approach and a broad range of case studies including Britain Scandinavia the U S S R and New Zealand the authors review the major problems faced within rural areas and policy responses to these problems Each study deals with the political and institutional frameworks involved in the management of rural areas and the means by which policies have been implemented With an introduction from Paul Cloke that places rural policies and plans within the context of the state this reissue will be of great value to any students with an interest in the planning and organisation of rural communities across the world **The Geography of Contemporary China** Terry Cannon, Alan Jenkins, 2002-09-26 The 1989 student massacre reaffirmed the position of the Chinese government This book provides an introduction to modern China and a survey of the last decade of administrative geopolitical demographic and economic development **Housing, Markets and Policy** Peter Malpass, Rob Rowlands, 2009-09-10 This book of specially commissioned essays by distinguished housing scholars addresses the big issues in contemporary debates about housing and housing policy in the UK Setting out a distinctive and coherent analysis it steers a course between those accounts that rely on economic theory and analysis and those that emphasize policy It is informed by the idea that the 1970s was a pivotal decade in the second half of the twentieth century and that since that time there has been a profound transformation in the housing system and housing policy in the UK The contributors describe analyze and explain aspects of that transformation as a basis for understanding the present and thinking about the future The analysis of housing is set within an understanding of the wider changes affecting the economy and the welfare state since the crises of the mid 1970s *Place-Based Evaluation for Integrated Land-Use Management* Johan Woltjer, Ernest Alexander, Matthias Ruth, 2016-03-03 In recent years there has been an increasing emphasis placed on local and regional integration in major planning projects and infrastructure development including roads rail and waterways This emphasis is not only on

integrating various projects but also integrating them with related issues such as housing industry environment and water. In other words, land use planning and infrastructure management have become more spatially oriented. This book brings together experts in the fields of spatial planning, land use, and infrastructure management to explore the emerging agenda of spatially oriented integrated evaluation. It weaves together the latest theories, case studies, methods, policy, and practice to examine and assess the values, impacts, benefits, and the overall success in integrated land use management. In doing so, the book clarifies the nature and roles of evaluation and puts forward guidance for future policy and practice.

Globalisation, Policy and Shipping Selkou, Evangelia, Roe, Michael, 2022-10-07 Thoroughly revised and updated, this second edition provides a contemporary analysis of policy and governance developments in the shipping sector across the late twentieth and early twenty-first centuries. It particularly focuses on developments in the EU and the continued intensification of globalisation, sustainability, and social awareness.

Urban Problems (Routledge Revivals) Michael Pacione, 2014-06-03 Urban problems and their resolution represent one of the major challenges for planners and decision makers in the modern world. This book, first published in 1990, makes a major contribution to the field, presenting an international and interdisciplinary approach to the challenges presented by the urban environment. The coverage is comprehensive, ranging from the economic and political dimensions of the capitalist system to the issues of poverty and deprivation and questions about housing equity. This is an essential reference guide to social, economic, and environmental problems in urban areas, which is of great value to students of planning, urban studies, geography, and sociology.

An Introduction to Statistical Problem Solving in Geography J. Chapman McGrew, Jr., Charles B. Monroe, 2009-04-22 Written for undergraduate geography majors and entry-level graduate students with limited backgrounds in statistical analysis and methods, McGrew and Monroe provide a comprehensive and understandable introduction to statistical methods in a problem-solving framework. Engaging examples and problems are drawn from a variety of topical areas in both human and physical geography and are fully integrated into the text. Without compromising statistical rigor or oversimplifying, the authors stress the importance of written narratives that explain each statistical technique. After introducing basic statistical concepts and terminology, the authors focus on nonspatial and spatial descriptive statistics. They transition to inferential problem solving, including probability sampling and estimation, before delving deeper into inferential statistics for geographic problem solving. The final chapters examine the related techniques of correlation and regression. A list of major goals and objectives is included at the end of each chapter, allowing students to monitor their own progress and mastery of geographic statistical materials. An epilogue offering over 150 geographic situations gives students a chance to figure out which statistical technique should be used for a particular situation.

GIS in Public Health Practice Massimo Craglia, Ravi Maheswaran, 2016-04-19 Significant advances in the evaluation and use of geographic information have had a major effect on key elements of public health. Strides in mapping technology, as well as the availability and accuracy of health information, enable public health practitioners to link and analyze data in new ways at
