Sociological Foundations of Education Claire Maxwell, Miri Yemini, Laura Engel, 2023-03-23 This volume introduces sociology as a foundational discipline of education Education is a central structuring mechanism in shaping societies making it a core focus for sociology Sociologists study education in its broadest sense as occurring within families communities and provided by institutions The purposes of formal education are contested and these contestations shape broader power

relations locally nationally and globally Sociologists disaggregate processes within education to examine empirically and theoretically the various levels at which they operate This allows them to describe and make sense of the ways that relations of inequality are developed reproduced or unsettled and how these shape individual and group experiences and outcomes About the Educational Foundations series Education as an academic field taught at universities around the world emerged from a range of older foundational disciplines The Educational Foundations series comprises six volumes each covering one of the foundational disciplines of philosophy history sociology policy studies economics and law This is the first reference work to provide an authoritative and up to date account of all six disciplines showing how each field s ideas methods theories and approaches can contribute to research and practice in education today The six volumes cover the same set of key topics within education which also form the chapter titles Mapping the Field Purposes of Education Curriculum Schools and Education Systems Learning and Human Development Teaching and Teacher Education Assessment and Evaluation This structure allows readers to study the volumes in isolation by discipline or laterally by topic and facilitates a comparative thematic reading of chapters across the volumes Throughout the series attention is paid to how the disciplines comprising the educational foundations speak to social justice concerns such as gender and racial equality
