

A blurry, artistic photograph of rain falling on a dark surface. The background is a bright, out-of-focus light source, possibly a window or a lamp, creating a soft glow. The rain is captured as a series of white, streaky droplets against the dark, textured surface. The overall mood is serene and atmospheric.

Smell Of The Rain

Smell Of The Rain:

Your Nose Knows James Knox Millen, 2000-10 WE HOLD That the real division and conflict in man's mind is between his primitive still paramount animal brain now as ab initio under smell dominance and his lately acquired super imposed consciousness under eye and ear control That there are no physical signs of degeneracy in the nose nosebrain apparatus It can and unceasingly does receive incredibly faint intero and exteroceptive smell messages for the most part subconsciously That the mystery of why a specific odor affects different persons differently and the same person differently at different times can be explained by the realization that man's animal brain is concerned solely with the organism's own condition welfare needs that it is continually advised thereof by exhaled air and blood borne messages and that no external odor stimulus is ever received except in fusion with and hence altered by these varying inward messages AND OUR HYPOTHESIS IS 1 Sleeping or awake man has a functioning sense of smell acted upon by combinations always of objective and subjective odors 2 Smell messages consciously tabooed are subconsciously accepted 3 The total of these acceptances past and present is the Subconscious And principally 4 The automatic actions of the body are smell responses **Oneota Flow** David S.

debut author Ayja Bounous explores threats to the winters and watershed in the face of climate change and the far reaching impacts of a diminishing snowpack on the American West not only from ecological and economic perspectives but also in regard to emotional and psychological health as she realizes how deeply her personal relationships are tied to the snow covered mountains of Utah's Wasatch range AYJA BOUNOUS is a Utah native and avid skier She holds an MA in Environmental Humanities from the University of Utah and bachelor's degrees in Music and Environmental Studies from Santa Clara University She lives in Salt Lake City Utah

American Indian Literature, Environmental Justice, and Ecocriticism Joni Adamson, 2001-01-01 Although much contemporary American Indian literature examines the relationship between humans and the land most Native authors do not set their work in the pristine wilderness celebrated by mainstream nature writers Instead they focus on settings such as reservations open pit mines and contested borderlands Drawing on her own teaching experience among Native Americans and on lessons learned from such recent scenes of confrontation as Chiapas and Black Mesa Joni Adamson explores why what counts as nature is often very different for multicultural writers and activist groups than it is for mainstream environmentalists This powerful book is one of the first to examine the intersections between literature and the environment from the perspective of the oppressions of race class gender and nature and the first to review American Indian literature from the standpoint of environmental justice and ecocriticism By examining such texts as Sherman Alexie's short stories and Leslie Marmon Silko's novel *Almanac of the Dead* Adamson contends that these works in addition to being literary are examples of ecological criticism that expand Euro American concepts of nature and place Adamson shows that when we begin exploring the differences that shape diverse cultural and literary representations of nature we discover the challenge they present to mainstream American culture environmentalism and literature By comparing the work of Native authors such as Simon Ortiz with that of environmental writers such as Edward Abbey she reveals opportunities for more multicultural conceptions of nature and the environment More than a work of literary criticism this is a book about the search to find ways to understand our cultural and historical differences and similarities in order to arrive at a better agreement of what the human role in nature is and should be It exposes the blind spots in early ecocriticism and shows the possibilities for building common ground a middle place where writers scholars teachers and environmentalists might come together to work for social and environmental change
