Soviet Military Power 1987:

Soviet Military Power, 1987, 1987 Soviet Military Power 1987 reviews new development in the USSR's armed forces over the past year and places these in the context of current doctrine and strategy. These developments again underscore that the USSR is building new generations of offensive strategic and theater nuclear forces as well as conventional land sea and air forces and strategic defense forces going far beyond legitimate requirements for defense. *Soviet Military Power*,

Soviet Military Power, 1987 **Soviet Military Operational Art** Colonel David M. Glantz, 2012-11-12 David Glantz examines the Soviet study of war the re emergence of the operation level and its connection with deep battle the evolution of the Soviet theory of operations in depth before 1941 and its refinement and application in the European theatre and the Far East between 1941 and 1945 *The Army Command Post and Defense Reshaping 1987-1997* Mark D. Sherry, 2008 The Army Command Post and Defense Reshaping 1987-1997 Mark D. Sherry, 2010-11-29 The U S Army underwent a decade of significant transformation between 1987 and 1997 that affected strategy force requirements structure and basing requirements. The end of the Cold War provided the initial impetus for defense reshaping and drove the pace and depth of change. Reductions in forces and installations and deferred procurement of the next generation of military equipment overlapped with efforts to adapt the Army to a new global security environment. Soviet Military Operational Art David M. Glantz, 1991 David Glantz examines the Soviet study of war the re emergence of the operation level the evolution of the Soviet theory of operations in depth before 1941 and its application in the European theatre and the Far East between 1941 and 1945 Air University Library Index to Military Periodicals, 1987 Russian civil-military relations and the origins of the second Chechen war Sz&ászdi, Lajos F., 2008-08-29 This book has relevance for those interested in understanding Russia's course in international relations under the leadership of Vladimir Putin. This book will inform the reader and is especially relevant in light of the events of 2008 in the Caucasus and the war in Georgia in particular. The author explains the ideology of Neo Eurasianism which in turn inspires the policy thinking of the Kremlin. Also studied is Putin's origins in the KGB from the previous posts of Secretary of the Security Council and Director of the FSB and his rise to power in the crucial year of 1999 when he became Russian Prime Minister. The author highlights the continuing trend of appointing high ranking officers of the Russian intelligence community to senior positions in the government studying this in the context of Russian civil military intelligence relations. The author reached the conclusion back in 2003 that the members of Russian intelligence hold the reins of power above the civilian and military elements of the Russian government. The author returns to the Kosovo Crisis of 1999 discussing also the motives that led the Kremlin and Putin to invade Chechnya for a second time in a decade. Parallels can be drawn to the 2008 Russian invasion of Georgia and the roots of the Neo Eurasianist ideology that is behind the two invasions are examined. Posen, 2014-01-13 In this sobering book Barry R Posen demonstrates how the interplay between conventional military operations and nuclear forces could in conflicts among states armed with both conventional and nuclear weaponry inadvertently produce pressures for nuclear escalation Knowledge of these hidden pressures he believes may help some future decision maker avoid catastrophe Building a formidable argument that moves with cumulative force he details the way in which escalation could occur not by mindless accident or by deliberate preference for nuclear escalation but rather as a natural accompaniment of land naval or air warfare at the conventional level Posen bases his analysis on an empirical study of the east west military competition in Europe during the 1980s using a conceptual framework drawn from international relations theory organization theory and strategic theory The

lessons of his book however go well beyond the east west competition Since his observations are relevant to all military competitions between states armed with both conventional and nuclear weaponry his book speaks to some of the problems that attend the proliferation of nuclear weapons in longstanding regional conflicts Optimism that small and medium nuclear powers can easily achieve stable nuclear balances is he believes unwarranted **Security at Sea** Stockholm International Peace Research Institute,1990 Since the Second World War five navies are known to have acquired nuclear weapons and naval forces and activities around the world have become increasingly important and dangerous However there has been no serious consideration of naval arms control for more than forty years SIPRI gathered together a group of experts from eight nations to consider the problems of naval forces and the possibilities for arms control This book is a product of that conference and it presents for the first time a broad and detailed assessment of the dangers of the naval arms race problems with arms control possible approaches confidence building measures and verification technologies
