Soviet Oil And Security Interests In The Barents Sea:

Soviet Oil and Security Interests in the Barents Sea Helge Ole Bergesen, Arild Moe, Willy Østreng, 1987 Assesses the importance of the Barents Sea as an energy option for the Soviet Union focusing on domestic demand for oil and also the needs of foreign trade and discusses the conflicting military and civilian interests in the Barents Sea **Soviet Oil and Security Interests in the Barents Sea** Helge Ole Bergesen, Arild Moe, Willy Østreng, 1987 Assesses the importance of the Barents Sea as an energy option for the Soviet Union focusing on domestic demand for oil and also the needs of foreign trade and discusses the conflicting military and civilian interests in the Barents Sea The Oil Industry and Government Strategy in the North Sea Oystein Noreng, 2016-03-02 Originally published in 1980 this book presents a comparative analysis of British and Norwegian oil policies focusing on the interdependence and bargaining relationship between governments and oil companies as well as the policy choices concerns and constraints for the two governments The perspective is largely that of a government planner whose main concerns are the long term and complex interests of the state orderly development as well as social and political stability **Geopolitics and Security in the Arctic** Rolf Tamnes, Kristine Offerdal, 2014-07-11 Written by a group of leading experts on Arctic affairs this book offers a historically informed and comprehensive study of the geopolitics and security challenges of the Arctic The key aim of the work is to identify the conditions for cooperation stability and peace in the Arctic and to reach beyond simple description and expectation in order to explore in depth some of the main factors that will determine the future of international relations in the region Furthermore it addresses key topics such as the geopolitical significance of the Arctic and the importance of oil and gas resources in the Arctic The book also investigates what the main characteristics of governance in the Arctic are and how institutions and regimes can promote stability and security in the region The volume maintains two layers of focus The first relates to the dynamics within the Arctic and the second to developments outside the region highlighting that we cannot understand the Arctic in isolation from global developments such as energy markets security conflicts and NATO Russian antagonism This book will be of much interest to students of Arctic politics security studies geopolitics Russian and Scandinavian politics and international relations in general *Marine Mineral Resources* Fillmore C. F. Earney, 2012-11-12 During the past century scientists world statesmen and international entrepreneurs have become increasingly aware of the potential of the oceans as a source of minerals This book provides an authoritative picture of the current state of marine mineral extraction A major work of reference it will be essential reading for both those engaged in maritime studies and for professional organisations involved in the extraction of underwater minerals Arctic Alternatives Franklyn Griffiths, 1992-09-15 Discusses the problems that must be resolved if the peoples of the Arctic countries are to develop their region away from militarism and towards civility **The Age of the Arctic** Gail Osherenko, Oran R. Young, 2005-06-08 This book will be essential reading for all interested in this important region of the world **The Future History of the Arctic** Charles Emmerson, 2010-03-02 Long at the margins of global

affairs and at the edge of our mental map of the world the Arctic has found its way to the center of the issues which will challenge and define our world in the twenty first century energy security and the struggle for natural resources climate change and its uncertain speed and consequences the return of great power competition the remaking of global trade patterns In *The Future History of the Arctic* geopolitics expert Charles Emmerson weaves together the history of the region with reportage and reflection revealing a vast and complex area of the globe loaded with opportunity and rich in challenges He defines the forces which have shaped the Arctic s history and introduces the players in politics business science and society who are struggling to mold its future The Arctic is coming of age This engrossing book tells the story of how that is happening and how it might happen through the stories of those who live there those who study it and those who will determine its destiny

Arctic Politics Oran R. Young, 2000-10-03 Long recognized by naturalists and adventurers as a dramatically unique region the Arctic has recently emerged as an area of increasing political strategic and economic importance The Arctic is both one of the world s largest and smallest regions encompassing 15% of the earth s land mass yet inhabited by fewer than 1% of the world s population Its physical vastness is coupled with a wealth of natural resources in oil alone the Far North contributes that majority of Russia s production and 25% of US output At the same time the Circumpolar North is home to diverse indigenous peoples and cultures thus setting the stage for conflicts of international scope In this collection of essays Oran Young provides a foundation for studying the politics of the Arctic as a distinctive international region Expanding the traditional approach to area studies he examines the Far North not only for its unique features but also as an arena within which to develop new approaches to various issues of worldwide interest Young challenges persistent stereotypes that marginalize the region moving beyond the romanticism of many observers to arrive at an understanding of the complex social and ecological systems of the Far North In doing so Young thoughtfully establishes the Arctic as an area of international importance both in its own right and in relation to other geopolitical regions

Encyclopedia of the Arctic Mark Nuttall, 2005-09-23 With detailed essays on the Arctic s environment wildlife climate history exploration resources economics politics indigenous cultures and languages conservation initiatives and more this Encyclopedia is the only major work and comprehensive reference on this vast complex changing and increasingly important part of the globe Including 305 maps This Encyclopedia is not only an interdisciplinary work of reference for all those involved in teaching or researching Arctic issues but a fascinating and comprehensive resource for residents of the Arctic and all those concerned with global environmental issues sustainability science and human interactions with the environment

The Law of Maritime Boundary Delimitation Alex G. Oude Elferink, 2021-09-27 This volume presents an analysis of the maritime boundary delimitations of the Russian Federation The focus of this analysis is the relationship between state practice and the rules of public international law applicable to the delimitation of maritime zones between neighboring states A first part establishes the contents of the law in this field The main part of the work concerns an analysis of the position of the Russian Federation on

the rules of maritime delimitation law and the practice of this state in relation to the delimitation of specific maritime boundaries with neighboring states The case study of the Russian Federation illustrates the significance of international law for the delimitation of maritime boundaries while at the same time indicating the limits of the influence of the law on state behavior

Making Russia and Turkey Great Again? Norman A. Graham, Folke Lindahl, Timur Kocaoglu, 2021-03-19 This study analyzes theoretically and empirically the background of the rise to power of Vladimir Putin in Russia and Recep Tayyip Erdogan in Turkey It situates this analysis in the contexts of the historical assessment of the fragility of liberal democracy and the persistence and growth of authoritarianism populism and dictatorship in many parts of the world The authors argue that the question whether Putin and Erdogan can make Russia and Turkey great again is hard to confirm personal ambition for power and wealth is certainly key to an understanding of both rulers They each squandered opportunities to build from free and fair democratic electoral legitimacy and economic progress The prospect for restored national greatness depends on how they can handle the economic and political challenges they now face and will continue to face in the near future in a climate of global pandemic and economic recession Both rulers so far have succeeded in maintaining and increasing their powers and influence in their respective regions but neither has made real contributions to regional stability and order Chaos seems to be growing and the EU and the U S thus far seem unable to provide coherent responses to mitigate the impact of their adventurism and disruption

Climate and Geo-Sciences A.L. Berger, S. Schneider, J.Cl. Duplessy, 2012-12-06 It has been widely recognized recently that in order to make scientific progress on large and important problems eg carbon dioxide effects on climate viability of various sites for nuclear waste disposal etc it is necessary to integrate knowledge from wide ranging sets of disciplines This is certainly true in the climate sciences for progress in understanding the cause of the ice ages or the effects of industrial pollution on the future climate or even the

likelihood of severe climatic consequences in the aftermath of nuclear war All require state of the art input from many geoscience disciplines climatology oceanography meteorology chemistry ecology glaciology geology astronomy space technology computer technology mathematics etc Major international meetings have called for interaction of such geoscience disciplines to solve real world problems To move beyond the rhetorical level the NATO Special Programme on Global Transport Mechanisms in the Geo Sciences whose activities started in 1983 decided to organise his closing symposium on such a topic which focus on the relationship between climate and geo sciences This symposium was held at the end of May 1988 at the Universite Catholique de Louvain Louvain la Neuve Belgium One hundred and thirty participants from the 16 NATO countries and a number of non NATO countries assembled for the Symposium Another feature was the attendance by special invitation of 16 promising young scientists who might well become leading scientists on climate and geo sciences in their respective countries in the next century Problems of Communism ,1989 *Neptune's Domain* Martin Ira Glassner,2024-05-01 First published in 1990 Neptune s Domain is organized around one unifying theme the geographic aspects of the new Law of the Sea as expressed primarily in the United Nations Convention on the Law of the Sea The first two chapters provide essential background information Chapters 3 through 9 explain relevant provisions of the Convention The next two chapters cover topics excluded from the Convention and the last three chapters are more analytical and future oriented All students and scholars concerned with the human use of the marine environment will welcome this book whether they be geographers political scientists or lawyers *State* ,1988 **The Soviet Arctic** Pier Horensma,2003-09-02 The Soviet Arctic is the first book to consider Soviet policy in this area from an historian s point of view Horensma assesses the importance of historic legacies to current Soviet Arctic policy and their consequences on an international level The book also discusses the significance of historic precedents in the determination of polar sovereignty
