X-Planes Manfred Griehl, 2012-10-24 Renowned German aviation specialist Manfred Griehl has collected a unique and valuable selection of photographs of Luftwaffe projects that never made it into battle They remained on the drawing board or at prototype stage either because they were deemed unsuitable or the developers simply ran out of time and the projects never went into production Most photographs come from the development sites and testing grounds of the major manufacturers of Nazi Germany companies such as Dornier Junkers Focke Wulf and Heinkel all received funding from the government to develop bigger and faster aircraft A huge amount of private testing went on with major organizations such as Daimler Benz BMW and Siemens investing huge amounts in new engine systems and other advances such as radar This book also details the innumerable alterations that were made to existing service aircraft to equip them for new roles There are examples of Fw190s developed for the delivery of chemical and toxic weapons the high altitude Junkers EF 61 the early prototype WNF 342 helicopter as well as numerous examples of developmental jet fighters that could very well have been realized had it not been for the effectiveness of the Allied bombing campaign in restricting the supply of necessary materials

far ahead were the German scientists And of even greater interest why and how There have been other books about advanced German wartime aeronautics yet few authors have fully examined the detail of the designs and their relevance to the fighter and bomber legends of the 1950s and 60s let alone the current crop of military and civil all wing or blended wing aircraft This book charts the story from it origins through current day innovations and beyond into the all wing future of tomorrow **Smithsonian: Spaceflight, 2nd Edition** Giles Sparrow,2019-04-02 This compelling story of exploration charts and celebrates humankind in space from Sputnik s launch in 1957 through the Apollo Moon landings and the International Space Station to future missions to Mars and beyond Spaceflight chronicles how in the half century that followed Sputnik the world was revolutionized by space travel and exploration The opening up of Earth s orbit to satellites led to a revolution in communications monitoring of the environment and materials science For the human imagination the impact has been even greater the voyages of robotic space probes have transformed our view of the Solar System while Earth orbiting satellites and missions to the Moon have forever changed our view of ourselves This book is a celebration of human ingenuity and imagination From the work of pioneers like Wernher von Braun Yuri Gagarin and Neil Armstrong to the triumphs and tragedies that followed it reveals the people science and technology that have propelled us into the Space Age
