

# Russia and China seal historic gas deal

China and Russia have signed a gas deal valued in excess of \$400bn, securing a new source of gas for China, the world's top energy user, and a new market for Russia as Europe looks elsewhere for its energy

**Pipeline construction:** Issue of whether China will pay lump sum up front in order to fund infrastructure costs remains unresolved

Specialists**

## **Soviet Negotiating Strategy The East West Gas Pipeline Deal 1980 1984:**

Soviet Negotiating Strategy Thane Gustafson, Rand Corporation, 1985 Because the East West gas pipeline was an issue for the Soviets in the areas of domestic economic policy East West diplomacy and foreign economic relations and because of intense attention given to the pipeline affair in both East and West it provides a rare window on Soviet decisionmaking This report draws on the extensive coverage of pipeline negotiations and of Soviet energy policy in the Western and Soviet press supplemented by the author's interviews with many of the West European executives and officials who participated in the bargaining with the Soviet side It considers the Soviet strategy their motives and their actions when motives clashed and the place of the pipeline in the context of internal and external Soviet policies The analysis reveals that while it seemed expertly crafted to take maximum advantage of the diplomatic and commercial opportunities available at the beginning of 1980 in fact Soviet negotiating behavior was frequently hesitant contradictory and improvised Soviet actions were governed at least as much by internal objectives and constraints as by external ones *Export Pipelines from the CIS Region*

Andreas, 2014-04-15 This timely collection offers fresh perspectives to the analysis of the New Great Game the fight for access to the Caspian Sea region's energy resources To date the export of the Caspian crude oil and natural gas has only been assessed geopolitically which oversimplifies the political dynamics of the region and neglects to acknowledge the Caspian countries as actors in their own right **International Negotiations: A Bibliography** Amos Lakos, 2019-02-22

The international system comprises a plurality of sovereign states often pursuing conflicting interests One means of resolving or managing conflicts between those states is diplomatic bargaining or negotiation In the last fifteen years the study of negotiation has attracted researchers from various disciplines in the social sciences and the vol **Russian Energy Power**

**and Foreign Relations** Jeronim Perovic, Robert W. Orttung, Andreas Wenger, 2009-02-20 This book examines Russia's new assertiveness and the role of energy as a key factor in shaping the country's behavior in international relations and in building political and economic power domestically since the 1990s Energy transformed Russia's fortunes after its decline during the 1990s The wealth generated from energy exports sparked economic recovery and political stabilization and has significantly contributed to Russia's assertiveness as a great power Energy has been a key factor in shaping Russia's foreign relations in both the Eurasian and global context This development raises a host of questions for both Russia and the West about the stability of the Russian economy how Russia will use the power it gains from its energy wealth and how the West should react to Russia's new found political weight Given that energy is likely to remain at the top of the global political agenda for some time to come and Russia's role as a key energy supplier to Europe is unlikely to diminish soon this book sheds light on one of the key security concerns of the 21st century where is Russia headed and how does energy affect the changing dynamics of Russia's relations with Europe the US and the Asia Pacific region This book will be of interest to students of Russian politics energy security international relations and foreign policy in general Jeronim Perovic is a senior

researcher at the Center for Security Studies at ETH Zurich Robert Orttung is a visiting scholar at the Center for Security Studies at the Swiss Federal Institute of Technology ETH in Zurich and a senior fellow at the Jefferson Institute Andreas Wenger is professor of international security policy and director of the Center for Security Studies at ETH Zurich **Energy and Power** Stephen G. Gross, 2023 In *Energy and Power* Stephen G. Gross offers the first comprehensive history of German energy and climate policy from World War II to the present He shows how debates over energy profoundly shaped the course of German history and influenced the landmark developments that define modern Europe Moving beyond conventional economic theory this book gives a novel explanation for why energy transitions happen Further it provides a powerful lens to move beyond conventional debates on Germany's East West divide or its postwar engagement with the Holocaust to explore how this nation has shaped the contemporary world in other important ways Pipeline Politics Bruce W. Jentleson, 2019-05-15 When the controversy over the Siberian natural gas pipeline erupted in 1982 it was not the first time that the issue of East West energy trade had brought the United States into conflict with its Western European allies It was however the first time that the United States lacked the leverage necessary to change its allies policies In addition American political opposition more closely resembled the politics of the 1980 grain embargo than the anti energy trade consensus of earlier decades How are these changes to be explained What have their consequences been for American economic coercive power against the Soviet Union Bruce Jentleson addresses these and other crucial questions in this comprehensive and incisive study Soviet Diplomacy and Negotiating Behavior Library of Congress. Congressional Research Service. Office of Senior Specialists, 1988 **International Political Economy and Socialism** Marie Lavigne, 1991-03-14 This book first published in 1991 is a revised and updated version of Professor Marie Lavigne's best seller *Economie Internationale des Pays Socialistes* The New Geopolitics of Natural Gas Agnia Grigas, 2017-04-24 As the United States aggressively expands its exports of liquefied natural gas it stands poised to become an energy superpower This unanticipated reality is rewriting the conventional rules of intercontinental gas trade and realigning strategic relations among the United States the European Union Russia China and beyond as Agnia Grigas shows Crisis amid Plenty Thane Gustafson, 2014-07-14 Although the Soviet Union has the most abundant energy reserves of any country energy policy has been the single most disruptive factor in its industry since the mid 1970s This major case study treats the paradox of the energy crisis as an essential part of larger economic problems of the Soviet Union and as a key issue in determining the fate of the Gorbachev reforms Originally published in 1989 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 **Natural Gas and Geopolitics** David G. Victor, Amy M.

Jaffe, Mark H. Hayes, 2006-06-29 By most estimates global consumption of natural gas a cleaner burning alternative to coal and oil will double by 2030 However in North America Europe China and South and East Asia which are the areas of highest expected demand the projected consumption of gas is expected to far outstrip indigenous supplies Delivering gas from the world's major reserves to the future demand centres will require a major expansion of inter regional cross border gas transport infrastructures This book investigates the implications of this shift utilizing historical case studies as well as advanced economic modelling to examine the interplay between economic and political factors in the development of natural gas resources The contributors aim to shed light on the political challenges which may accompany a shift to a gas fed world

*Red Gas* P. Högselius, 2012-12-28 This book applies a systems and risk perspective on international energy relations author Per H gselius investigates how and why governments businesses engineers and other actors sought to promote and oppose the establishment of an extensive East West natural gas regime that seemed to overthrow the fundamental logic of the Cold War *Cold War Energy* Jeronim Perović, 2017-02-28 This book examines the role of Soviet energy during the Cold War Based on hitherto little known documents from Western and Eastern European archives it combines the story of Soviet oil and gas with general Cold War history This volume breaks new ground by framing Soviet energy in a multi national context taking into account not only the view from Moscow but also the perspectives of communist Eastern Europe the US NATO as well as several Western European countries namely Italy France and West Germany This book challenges some of the long standing assumptions of East West bloc relations as well as shedding new light on relations within the blocs regarding the issue of energy By bringing together a range of junior and senior historians and specialists from Europe Russia and the US this book represents a pioneering endeavour to approach the role of Soviet energy during the Cold War in transnational perspective **Siberia and the Soviet Far East** Rodger Swearingen, 1987 Collection of essays on Siberia and its past present and future roles in the Soviet and global economies The Reagan Revolution II Richard C.

Thornton, 2004-02 How President Reagan successfully rebuilt the Western Alliance particularly in relations with the United Kingdom West Germany and Japan *Soviet Oil and Gas Exports to the West* Jonathan P. Stern, 1987 Global Energy Politics Thijs Van de Graaf, Benjamin K. Sovacool, 2020-05-07 Ever since the Industrial Revolution energy has been a key driver of world politics From the oil crises of the 1970s to today's rapid expansion of renewable energy sources every shift in global energy patterns has important repercussions for international relations In this new book Thijs Van de Graaf and Benjamin Sovacool uncover the intricate ways in which our energy systems have shaped global outcomes in four key areas of world politics security the economy the environment and global justice Moving beyond the narrow geopolitical focus that has dominated much of the discussion on global energy politics they also deftly trace the connections between energy environmental politics and community activism The authors argue that we are on the cusp of a global energy shift that promises to be no less transformative for the pursuit of wealth and power in world politics than the historical shifts from

wood to coal and from coal to oil This ongoing energy transformation will not only upend the global balance of power it could also fundamentally transfer political authority away from the nation state empowering citizens regions and local communities Global Energy Politics will be an essential resource for students of the social sciences grappling with the major energy issues of our times
