Soviet Scene A Geographical Perspective:

The Soviet Scene James H. Bater, 1989-01 This book is a concise introduction to the complexities of the Soviet system focusing on issues of general concern It looks at the processes of decision making the continuities and changes between Imperial and Soviet Russia and the divergences between ideals and reality in the Soviet Union Russia and the Post-Soviet Scene James H. Bater, 1996 This successor to Bater's highly acclaimed *The Soviet Scene* presents a survey of the contemporary human geography of the former Soviet Union A central theme in the book's organization and content is historical continuity and change Bater argues that an appreciation of the former Soviet Union's past is imperative to an understanding of the present Summerfolk Stephen Lovell, 2016-05-19 The dacha is a sometimes beloved sometimes scorned Russian dwelling Alexander Pushkin summered in one Joseph Stalin lived in one for the last twenty years of his life and contemporary Russian families still escape the city to spend time in them Stephen Lovell's generously illustrated book is the first social and cultural history of the dacha Lovell traces the dwelling's origins as a villa for the court elite in the early eighteenth century through its nineteenth century role as the emblem of a middle class lifestyle its place under communist rule and its post Soviet incarnation A fascinating work rich in detail *Summerfolk* explores the ways in which Russia's turbulent past has shaped the function of the dacha and attitudes toward it The book also demonstrates the crucial role that the dacha has played in the development of Russia's two most important cities Moscow and St Petersburg by providing residents with a refuge from the squalid and crowded metropolis Like the suburbs in other nations the dacha form of settlement served to alleviate social anxieties about urban growth Lovell shows that the dacha is defined less by its physical location usually one or two hours distance from a large city yet apart from the rural hinterland than by the routines values and ideologies of its inhabitants Drawing on sources as diverse as architectural pattern books memoirs paintings fiction and newspapers he examines how dachniki summerfolk have freed themselves from the workplace cultivated domestic space and created informal yet intense intellectual communities He also reflects on the disdain that many Russians have felt toward the dacha and their association of its lifestyle with physical idleness private property and unproductive use of the land Russian attitudes toward the dacha are Lovell asserts constantly evolving The word dacha has evoked both delight in and hostility to leisure It has implied both the rejection of agricultural labor and more recently a return to the soil In *Summerfolk* the dacha is a unique vantage point from which to observe the Russian social landscape and Russian life in the private sphere

Small-Town Russia Anne White, 2004-08-12 This book examines a number of key questions about social change in contemporary Russia issues such as how people survive when they are not paid for months on end the New Poor the falling birth rate why so many Russian men die in middle age whether regional identities are becoming stronger and how people's sense of Russianness has developed since the creation of the Russian Federation in 1992 It examines these issues by looking at actual experiences in three small Russian towns It includes a great deal of original ethnographic research and by looking

at real places overall provides a good sense of how different aspects of social change are interlinked and how they actually affect real people's lives

EU Enlargement and the Environment JoAnn Carmin, Stacy D. VanDeveer, 2023-05-31 This volume focuses attention on key environmental and institutional changes associated with eastern expansion of the European Union assessing and challenging prevailing views about the outcomes and processes of this historic development Looking at four central themes capacity changes and limitations the EU's mixed messages and conflicting priorities non state actor roles and developments and the exchange of ideas and information the volume shows that enlargement will change the EU not just make it bigger and that EU officials and programs are improving aspects of environmental policy in CEE countries even as they are making others less sustainable This book was previously published as a special issue of the journal Environmental Politics

The Dead City Paul Dobraszczyk, 2017-06-30 The Dead City unearths meanings from such depictions of ruination and decay looking at representations of both thriving cities and ones which are struggling abandoned or simply in transition It reveals that ruination presents a complex opportunity to envision new futures for a city whether that is by rewriting its past or throwing off old assumptions and proposing radical change Seen in a certain light for example urban ruin and decay are a challenge to capitalist narratives of unbounded progress They can equally imply that power structures thought to be deeply ingrained are temporary contingent and even fragile Examining ruins in Chernobyl Detroit London Manchester and Varosha this book demonstrates that how we discuss and depict urban decline is intimately connected to the histories economic forces power structures and communities of a given city as well as to conflicting visions for its future

Intermarium Marek Jan Chodakiewicz, 2017-09-08 History and collective memories influence a nation its culture and institutions hence its domestic politics and foreign policy That is the case in the Intermarium the land between the Baltic and Black Seas in Eastern Europe The area is the last unabashed rampart of Western Civilization in the East and a point of convergence of disparate cultures Marek Jan Chodakiewicz focuses on the Intermarium for several reasons Most importantly because as the inheritor of the freedom and rights stemming from the legacy of the Polish Lithuanian Ruthenian Commonwealth it is culturally and ideologically compatible with American national interests It is also a gateway to both East and West Since the Intermarium is the most stable part of the post Soviet area Chodakiewicz argues that the United States should focus on solidifying its influence there The ongoing political and economic success of the Intermarium states under American sponsorship undermines the totalitarian enemies of freedom all over the world As such the area can act as a springboard to addressing the rest of the successor states including those in the Caucasus Central Asia and the Russian Federation Intermarium has operated successfully for several centuries It is the most inclusive political concept within the framework of the

Commonwealth By reintroducing the concept of the Intermarium into intellectual discourse the author highlights the autonomous and independent nature of the area This is a brilliant and innovative addition to European Studies and World Culture

Curtains of Iron and Gold Heikki Eskelinen,Ilkka Liikanen,Jukka Oksa,2019-01-15 First published in 1999 this book examines the construction of new political economic and mental borders in post Cold War Europe Various national and regional settings are analyzed along the old East West divide In post Cold War Europe the East West divide no longer exists in the form of the clear cut Iron Curtain separating two security blocs two politico economic systems and two ideologically and culturally distinct worlds Still it remains clearly discernible both in the form of unrelenting politico cultural differences and as an economic Golden Curtain At the same time a more complicated system of intersecting political economic and mental borders keeps developing Today there are various scales of interaction which produce distinctive national regional and local experiences of borders In this book the construction of new political economic and mental borders is analysed by specialists from both sides of the former East West divide The future of European borders is discussed in various national and regional settings from the Barents Region in the North to the Old Habsburgian lands in Mitteleuropa

Politics of Forests Jakob Donner-Amnell,2017-03-02 Bringing together case studies from Canada the Nordic countries and Russia this book is the first to provide a comparative examination of the current transformations in the forest industry regimes and the challenges they make for the communities dependent on this industry Questioning how globalization has influenced forest regimes the book focuses on individual forest companies and argues that they are the main motors of the industry s internationalization often without taking due consideration of the complex interrelations between society the environment and forest trade During the current phase of globalization the sphere of material production within the forest industry has increasingly been modified by more speculative signals from the market Both the growing role of investor interests as well as the broader societal demands for greening the production chain have forced managers to be more sensitive to the performance profile and image of their companies In conclusion the book highlights instances of processes working towards homogenization and diversity and suggests that while Anglo American management practice is increasingly important across the northern forest regions it is also meeting with resistance due to

How Russia Is Not Ruled Allen C. Lynch,2005-01-10 The state remains as important to Russia s prospects as ever This is so not only because as in any society an effectively functioning state administration is necessary to the proper functioning of a complex economy and legal system but also because in Russian circumstances factors of economic geography tend to increase costs of production compared to the rest of the world These mutually reinforcing factors include the extreme severity of the climate the immense distances to be covered the dislocation between European population centers and Siberian natural resource centers and the inevitable predominance of relatively costly land transportation over sea borne transportation As a result it is questionable whether Russia can exist as a world civilization under predominantly liberal economic circumstances in a unified liberal global capital market large scale private direct capital investment will not be directed to massive outdoor infrastructure projects typical of state investment in the Soviet period **Cities of the World** Stanley D.
