**Medical Tourism** Colin

Michael Hall, 2013 Medical and health tourism is a significant area of growth in the export of medical health and tourism services. Although spas and improved well being have long been part of the tourist experience, health tourism now includes travel for medical purposes ranging from cosmetic and dental surgery through to transplants and infertility treatment. Many countries including China, Cuba, Hungary, India, Thailand, Malaysia, and Singapore actively promote and compete for the medical tourist dollar, while many developed countries also provide niche private services. However, the field of medical tourism is increasingly being subject to scrutiny and debate, particularly as a result of concerns over regulatory, ethical, and wider health issues. Drawing on a range of theoretical and methodological perspectives, this book is one of the first to critically address the substantial political, philosophical, and ethical issues that arise out of the transnational practices of medical tourism. Through a series of chapters, the book engages with key issues such as the role of regulatory and policy structures in influencing medical and health tourism related mobilities. These issues are investigated by considering a range of developing and developed countries, medical systems, and health economic perspectives. The book adopts a multi-layered perspective to not only investigate the business and marketing practices of medical and health tourism but places these within a broader framework of contemporary globalisation policy and practice. By doing so, it opens up debate of the ethical space in which medical and health tourism operates, as well as reinforces the wide-ranging perspectives that exist on the subject in both the public and academic imagination. This significant contribution will be of interest to students, academics, in tourism and medical policy, trade, and economic development fields.
