Beyond Matter, Within Space Livia Nolasco-Rózsás, Marianne Schädler, 2024-08-28 Exhibition spaces are physical places of knowledge production and exchange. Their spatial properties play an important role in contextualizing information. Virtual stagings of exhibitions should therefore retain these properties. The Beyond Matter research project 2019-23 aims to unravel the intertwining of physical and virtual structures and their impact on spatial aspects in art production, curating, and art education and thus to identify ways to preserve cultural heritage in the digital age. This publication offers a comprehensive overview of the diverse research activities, exhibition and book projects, and symposia that have taken place or emerged in the course of the international Beyond Matter project at the various partner institutions. The Iranian Space Endeavor Parviz Tarikhi, 2014-07-19 Provides a detailed look at the events and policies surrounding the Iranian space endeavor. For those who see the trend of progress and movement of the Iranian space endeavor from the outside, it can be difficult to understand what goes on behind the scenes. However, for one who observes these events firsthand, they take on a very different meaning. In this book, the author brings new and different profiles of Iran's space endeavor to light. Iran claims to be the ninth leading country in the world, capable of manufacturing satellites and launching them. It plans to land an astronaut on the Moon within a decade and says its own president plans to be the first Iranian astronaut to travel into space. The author explains in this book that not all of these claims are quite as they seem. In addition to technical explanations, the book also includes historical, legal, social, and cultural aspects of Iran's space program as well. It is the author's goal to create a tangible feeling of Iran's space endeavor for the readers. *Space, Time, and Other*, 2016-05-23 This book by the late Fred Kersten, known to many as the translator of Edmund Husserl's *Ideas I*, takes up the challenge of Husserl's phenomenology as the will to return to the matters themselves, providing extensive methodological reflections before proceeding to a series of painstaking phenomenological analyses based on a number of evocative examples.
