**Tele-services for the 21st Century** G. Haskell, Michael J. Rycroft, 2012-12-06 Recent developments in telecommunications have led to new developments in tele services particularly tele health and tele education for the benefit of those living in either the developed world or the less developed world The benefits accrue to individuals and also to society at large An international and interdisciplinary Symposium was organized by the International Space University to bring together technical and non technical people to consider the future applications of space techniques to tele services The Proceedings of this Symposium are essential reading for all who need to appreciate the broad range of issues involved in this developing area      **Understanding Media Cultures** Nick Stevenson, 2002-04-02 The Second Edition of this book provides a comprehensive overview of the ways in which social theory has attempted to theorize the importance of the media in contemporary society Understanding Media Cultures is now fully revised and takes account of the recent theoretical developments associated with New Media and Information Society as well as the audience and the public sphere      **The Concept of State Jurisdiction in International Space Law** Imre Anthony Csabafi, 2012-12-06 Dr Csabafi in his clearly and concisely written book sets out to confront the most pressing jurisdictional problems arising from the exploration and use of outer space problems which the authors of the Outer Space Treaty of 27th January 1967 have not attempted to solve He has recognized that in view of the lack of sufficient knowledge of technological capabilities present and anticipated of the utilization of outer space and its political economic and social implications the time is not yet ripe for the elaboration of specific rules to govern most of the highly complex issues in this context Apart from the lack of sufficient knowledge and experience the achievement of a consensus on rules regarding jurisdiction in outer space is further hampered by the strongly divergent interpretations of the fundamental principles of the Outer Space Treaty namely the principle of freedom of outer space for exploration and use and the principle of non appropriation of outer space In various parts of his study Dr Csabafi has on the basis of a thorough study of the preparatory work of the Outer Space Treaty expressed his views on the meaning of these principles      **The Nature of Space** Milton Santos, 2021-07-21 In The Nature of Space pioneering Afro Brazilian geographer Milton Santos attends to globalization writ large and how local and global orders intersect in the construction of space Santos offers a theory of human space based on relationships between time and ontology He argues that when geographers consider the inseparability of time and space they can then transcend fragmented realities and partial truths without trying to theorize their way around them Based on these premises Santos examines the role of space which he defines as indissoluble systems of objects and systems of actions in social processes while providing a geographic contribution to the production of a critical social theory      **Ethics Handbook for the Space Odyssey** Jacques Arnould, 2020-04-01 With his particular questioning style Jacques Arnould takes us on a journey through the history of space

exploration and utilisation from a multidisciplinary perspective This book deals with philosophical and societal questions national and international policy legal and responsibility aspects By asking the right questions Jacques helps us understand many of the questions most humans ask themselves about why what for whom for how long and how humanity will or should expand its presence in and benefit from outer space The French CNES is the first space agency that decided to employ an expert in the ethics of space activities and the International Space University and the University of South Australia are the only where space ethics is regularly taught in its programs as part of its unique multidisciplinary curricula *Space of Service to Humanity* G. **Real Space** Paul Levinson, 2014-01-21 Is planet earth the end of the line or is space itself the next stop Cyberspace It s incredible taking us to any part of the planet we want to visit But as Paul Levinson shows in his brilliant new book when it comes to transport we re still stuck in the past preferring to take our bodies with us Whether it s trains yachts scooters or pogo sticks we re compelled to keep moving our movements curtailed only by the earth itself In our imaginations however we soar way past the limits of current technology With a lucid but reflective style that takes in everything from robots and science fiction to religion and philosophy Paul Levinson asks why there is a deep seated human desire to know what s out there Why after getting a man on the moon did the US space program develop so slowly In a world where space is constantly repackaged how do we know what real space is Is our desire to get into space natural or a religious craving and is it a modern phenomenon or did our ancestors also dream of escaping the clutches of Mother Earth Jam packed with exciting innovative even revolutionary thinking about our future Realspace is essential reading for everyone who has ever sat at their desk gazed into the distance and imagined boarding a space shuttle Remembering the Space Age Steven J. Economies of Signs and Space Professor Scott M Lash, Scott Lash John Urry, Professor John Urry, 1993-12-09 This is a novel account of social change that supplants conventional understandings of society and presents a sociology that takes as its main unit of analysis flows through time and across space Developing a comparative analysis of the UK and US the new Germany and Japan Lash and Urry show how restructuration after organized capitalism has its basis in increasingly reflexive social actors and organizations The consequence is not only the much vaunted postmodern condition but also a growth in reflexivity In exploring this new reflexive world the authors argue that today's economies are increasingly ones of signs information symbols images desire and of space where both signs and social subjects refugees financiers tourists and flâneurs are mobile over ever greater distances at ever greater speeds
