Space Assurance Or Space Domination The Case Against Weaponizing Space:

Space Assurance Or Space Dominance?: THE CASE AGAINST WEAPONIZING SPACE. Michael Krepon, 2022

Space Assurance Or Space Dominance? Michael Krepon, Christopher Clary, 2003 While space has long been utilized to assist military operations it has not been weaponized A new report by the Henry L Stimson Center Space Assurance or Space Dominance The Case Against Weaponizing Space argues that the surest way for the United States to lose the military advantages now enjoyed in space is to turn the heavens into a shooting gallery The Stimson report concludes that U S military and economic security is best served by avoiding the flight testing and deployment of space weaponry The pursuit of space dominance could impair global commerce produce long lasting environmental debris in space and harm alliance ties as well as relations between the United States and Russia and China the two countries whose help is most needed to stop and reverse proliferation The quest to dominate space could prompt low cost low tech countermeasures in the form of space mines and other anti satellite devices Potential adversaries in space would be faced with the dilemma of shooting first or risk being shot The quest to secure dominion over space would therefore elevate into the heavens the hair trigger postures that plagued U S and Soviet officials during the Cold War

The Politics of Space Security James Moltz, 2011-06-29 The past five decades have witnessed often fierce international rivalry in space but also surprising military restraint Now with an increasing number of countries capable of harming U S space assets experts and officials have renewed a long standing debate over the best route to space security Some argue that space defenses will be needed to protect critical military and civilian satellites Others argue that space should be a sanctuary from deployed weapons and military conflict particularly given the worsening threat posed by orbital space debris Moltz puts this debate into historical context by explaining the main trends in military space developments since Sputnik their underlying causes and the factors that are likely to influence their future course This new edition provides analysis of the Obama administration s space policy and the rise of new actors including China India and Iran His conclusion offers a unique perspective on the mutual risks militaries face in space and the need for all countries to commit to interdependent environmentally focused space security

Toward a Theory of Spacepower Charles D. Lutes, 2011-03-07 This volume is a product of the efforts of the Institute for National Strategic Studies Spacepower Theory Project Team which was tasked by the Department of Defense to create a theoretical framework for examining spacepower and its relationship to the achievement of national objectives The team was charged with considering the space domain in a broad and holistic way incorporating a wide range of perspectives from U S and international space actors engaged in scientific commercial intelligence and military enterprises This collection of papers commissioned by the team serves as a starting point for continued discourse on ways to extend modify refine and integrate a broad range of viewpoints about human initiated space activity its relationship to our globalized society and its economic political and security interactions It will equip practitioners scholars students and citizens with the historical background and

conceptual framework to navigate through and assess the challenges and opportunities of an increasingly complex space environment

Arms and Influence Jeffrey S. Lantis, 2016-07-27 Arms and Influence explores the complex relationship between technology policymaking and international norms Modern technological innovations such as the atomic bomb armed unmanned aerial vehicles UAVs and advanced reconnaissance satellites have fostered debates about the boundaries of international norms and legitimate standards of behavior These advances allow governments new opportunities for action around the world and have in turn prompted a broader effort to redefine international standards in areas such as self defense sovereignty and preemptive strikes In this book Jeffrey S Lantis develops a new theory of norm change and identifies its stages including redefinition involving domestic political deliberations and constructive norm substitution in multilateral institutions He deftly takes some of the most controversial new developments in military technologies and embeds them in international relations theory The case evidence he presents suggests that periods of change are underway across numerous different issue areas

Miller, 2009-01-30 Experts consider whether American primacy will endure or if the future holds a multipolar world of several great powers The unprecedented military economic and political power of the United States has led some observers to declare that we live in a unipolar world in which America enjoys primacy or even hegemony At the same time public opinion polls abroad reveal high levels of anti Americanism and many foreign governments criticize U S policies *Primacy and Its Discontents* explores the sources of American primacy including the uses of U S military power and the likely duration of unipolarity It offers theoretical arguments for why the rest of the world will or will not align against the United States Several chapters argue that the United States is not immune to the long standing tendency of states to balance against power while others contend that wise U S policies the growing role of international institutions and the spread of liberal democracy can limit anti American balancing The final chapters debate whether countries are already engaging in soft balancing against the United States The contributors offer alternative prescriptions for U S foreign policy ranging from vigorous efforts to maintain American primacy to acceptance of a multipolar world of several great powers Contributors Gerard Alexander Stephen Brooks John G Ikenberry Christopher Layne Keir Lieber John Owen IV Robert Pape T V Paul Barry Posen Kenneth Waltz William Wohlforth **The Oxford Handbook of Space Security** Saadia M.
