Commercial Space Exploration

Clelia Iacomino, 2019-05-22 This book offers a comprehensive overview of current space exploration in terms of geopolitical and commercial aspects Despite multiple attempts to foster commercial activities in the field of space exploration for decades the domain largely continued to be funded and led by governments in the form of national and international programmes However the situation changed with the retirement of the Space Shuttle and the introduction of NASA's Commercial Orbital Transportation Services COTS programme which employed an innovative procurement scheme based on competitive performance based fixed price milestones The success of this programme marked an important milestone in the evolution of the relationship between government and industry The growing opportunities for private actors to make more prominent contributions to space exploration also lie in the New Space ecosystem a sectoral transformation characterised by a substantial increase in private

investment and the emergence of commercial efforts to develop disruptive concepts and address new markets The Penguin Book of Outer Space Exploration John Logsdon, 2018-09-11 The fascinating story of how NASA sent humans to explore outer space told through a treasure trove of historical documents publishing in celebration of NASA's 60th anniversary and with a foreword by Bill Nye An extremely useful and thought provoking documentary journey through the maze of space history There is no wiser or more experienced navigator through the twists and turns and ups and downs than John Logsdon James Hansen New York Times bestselling author of First Man now a feature film starring Ryan Gosling and Claire Foy Among all the technological accomplishments of the last century none has captured our imagination more deeply than the movement of humans into outer space From Sputnik to SpaceX the story of that journey including the inside history of our voyages to the moon depicted in First Man is told as never before in The Penguin Book of Outer Space Exploration Renowned space historian John Logsdon traces the greatest moments in human spaceflight by weaving together essential fascinating documents from NASA's history with his expert narrative guidance Beginning with rocket genius Wernher von Braun's vision for voyaging to Mars and closing with Elon Musk's contemporary plan to get there this volume traces major events like the founding of NASA the first American astronauts in space the Apollo moon landings the Challenger disaster the daring Hubble Telescope repairs and more In these pages we such gems as Eisenhower's reactions to Sputnik the original NASA astronaut application John Glenn's reflections on zero gravity Kennedy's directives to go to the moon discussions on what Neil Armstrong's first famous first words should be firsthand accounts of spaceflight and so much more
