**Space for Science** Simon Schwartzman, 2010-11-01

**The Economic and Social History of Brazil since 1889**

Francisco Vidal Luna, Herbert S. Klein, 2014-03-31 This is the first complete economic and social history of Brazil in the modern period in any language It provides a detailed analysis of the evolution of the Brazilian society and economy from the end of the empire in 1889 to the present day The authors elucidate the basic trends that have defined modern Brazilian society and economy In this period Brazil moved from being a mostly rural traditional agriculture society with only light industry and low levels of human capital to a modern literate and industrial nation It has also transformed itself into one of the world's most important agricultural exporters How and why this occurred is explained in this important survey

**The Cambridge History of Science: Volume 8, Modern Science in National, Transnational, and Global Context** Hugh

Richard Slotten, Ronald L. Numbers, David N. Livingstone, 2020-04-09 This volume in the highly respected Cambridge History of Science series is devoted to exploring the history of modern science using national transnational and global frames of reference Organized by topic and culture its essays by distinguished scholars offer the most comprehensive and up to date nondisciplinary history of modern science currently available Essays are grouped together in separate sections that represent larger regions Europe Africa the Middle East South Asia East and Southeast Asia the United States Canada Australia New Zealand Oceania and Latin America Each of these regional groupings ends with a separate essay reflecting on the analysis in the preceding chapters Intended to provide a balanced and inclusive treatment of the modern world contributors analyze the history of science not only in local national and regional contexts but also with respect to the circulation of knowledge tools methods people and artifacts across national borders

*Globalizing Physics* Roberto Lalli, Jaume Navarro, 2024-07-09 This is an open access book available under the terms of a CC BY NC ND 4.0 International licence It is free to read on the Oxford Academic platform and offered as a free PDF download from OUP and selected open access locations Following the centenary of the International Union of Pure and Applied Physics this volume features contributions from leading science historians from around the world on the changing roles of the institution in international affairs from its foundation in 1922 to the present The case studies presented in this volume show the multitude of functions that IUPAP had and how these were related to the changing international political contexts The book is divided into three parts The first discusses the interwar period demonstrating how the exclusion of communities of the Central Powers from international scientific institutions imposed by victorious allied countries made IUPAP ineffective until the end of World War II The second part analyzes the changing roles assumed by IUPAP starting from its complete renovation after World War II Case studies covering the role of IUPAP in physics education in metrology in joint commissions with other unions and in defining the complex relations between pure and applied physics provide examples of IUPAP's impact on the world of science Part III squarely addresses the science diplomacy aspects of IUPAP during the Cold War highlighting the importance of IUPAP in furthering diplomatic

goals and explaining the origin of the pursuit of the free circulation of scientists as the activity that characterized the main function of international unions during the Cold War Highlighting how often scientific agendas and political imperatives were entangled in the activities of IUPAP the book analyzes the work of the Union as exercises of science diplomacy thus contributing to the current debate on the use of science and technology in international relations

**Science, Society and Power** James Fairhead, Melissa Leach, 2003-10-16 In this book James Fairhead and Melissa Leach bring science to the heart of debates about globalisation exploring transformations in global science and contrasting effects in Guinea one of the world's poorest countries and Trinidad a more prosperous industrialised and urbanised island The book focuses on environment forestry and conservation sciences that are central to these countries and involve resources that many depend upon for their livelihoods It examines the relationships between policies bureaucracies and particular types of scientific enquiry and explores how ordinary people the media and educational practices engage with this In particular it shows how science becomes part of struggles over power resources and legitimacy The authors take a unique ethnographic perspective linking approaches in anthropology development and science studies They address critically prominent debates in each and explore opportunities for new forms of participation public engagement and transformation in the social relations of science

**Science in the Twentieth Century** John Krige, Dominique Pestre, 2013-11-19 With over forty chapters written by leading scholars this comprehensive volume represents the best work in America Europe and Asia Geographical diversity of the authors is reflected in the different perspectives devoted to the subject and all major disciplinary developments are covered There are also sections concerning the countries that have made the most significant contributions the relationship between science and industry the importance of instrumentation and the cultural influence of scientific modes of thought Students and professionals will come to appreciate how and why science has developed as with any other human activity it is subject to the dynamics of society and politics

**The Literature of Soil Science** Peter McDonald, 1994 A collection of 14 discussions of the past and present literature about soil science The topics include a historical survey bibliometrics introduction into developing countries societies and their publishing influence information systems core monographs primary journals maps and other aspects

**Companion to Science in the Twentieth Century** John Krige, Dominique Pestre, 2003 This work on science in the 20th century represents work in America Europe and Asia It includes such topics as the countries that have made the most significant contributions the relationship between science and industry and the importance of instrumentation

**The History of Brazil** Robert M. Levine, 2003-10-15 Brazil is a vast complex country with great potential but an uneven history This concise one volume history will introduce readers to the history of Brazil from its origins to today It emphasizes current affairs including Brazil's return to democracy

after more than two decades of military rule and the economic consequences of adopting free market policies as part of the creation of the global marketplace The history of Brazil unfolds in narrative chronological chapters beginning with the Portuguese conquest and continues up to the present day Levine's book is a good starting point for anyone interested in moving beyond the popular conception of Brazil as the land of Carnival and samba Publishers Weekly

**Handbook of Science and Technology Studies** Sheila Jasanoff, Gerald E Markle, James C Peterson, Trevor Pinch, 2001-11-01 This volume represents the social constructivist turn of the field It is evident that social constructivism made a major impact on the field during the 1970s and 1980s The diverse papers included here highlight the role of ethnography in STS In addition we are exposed to new perspectives of the multicultural and gendered nature of knowledge production Science Technology and Society For the most current comprehensive resource in this rapidly evolving field look no further than the Revised Edition of the Handbook of Science and Technology Studies This masterful volume is the first resource in more than 15 years to define summarize and synthesize this complex multidisciplinary international field Tightly edited with contributions by an internationally recognized team of leading scholars this volume addresses the crucial contemporary issues both traditional and nonconventional social studies political studies and humanistic studies in this changing field Containing theoretical essays extensive literature reviews and detailed case studies this remarkable volume clearly sets the standard for the field It does nothing less than establish itself as the benchmark one that will carry the field well into the next century The long awaited Handbook of Science and Technology Studies sponsored by the Society for Social Studies of Science is a truly substantial work both in size and in the breadth of its many contributions It is a rich and valuable guide to much that is transpiring in the field of Science and Technology Studies In the editors words it is an unconventional but arresting atlas of the field at a particular moment in its history Science Technology Society This book is not only an important resource for practitioners but it also may help to spark the curiosity of those who are outside the field including scientists and engineers themselves and so pull the half seen world of science and technology studies even more fully into the light of day American Scientist The book as a whole is an impressive testimony to the vitality of a burgeoning field New Scientist It reflects the international and interdisciplinary nature of the society An excellent resource Choice

**Research Handbook on Innovation Governance for Emerging Economies** Stefan Kuhlmann, Gonzalo Ordóñez-Matamoras, 2017-01-27 Although in recent years some emerging economies have improved their performance in terms of R D investment outputs and innovative capacity these countries are still blighted by extreme poverty inequality and social exclusion Hence emerging countries are exposed to conditions which differ quite substantially from the dominant OECD model of innovation policy for development and welfare This Research Handbook contributes to the debate by looking at how innovation theory policy and practice interact and explains different types of configurations in countries that are characterized by two contrasting but mutually reinforcing features systemic failure and resourcefulness Focusing on innovation governance and public policies it aims to

understand related governance failures and to explore options for alternative more efficient approaches

**Higher Education in Brazil**, 2002 For years Brazil has had a system of higher education which has not adequately met the needs of the Brazilian companies or prospective students In comparison to other countries in the region Brazilian universities have enrolled a significantly smaller percentage of the eligible students have not produced an adequately trained work force and have been cost prohibitive for lower income students Both economic and societal pressures are now forcing changes upon the educational system Together with the Minister for Education members of the National Education Council and others World Bank staff participated in an assessment of options to improve higher education over the next two or three decades This study describes the educational system provides an economic perspective and contains specific policy recommendations resulting from the assessment

Companion Encyclopedia of Science in the Twentieth Century John Krige, Dominique Pestre, 2013-11-05 With over forty chapters written by leading scholars this comprehensive volume represents the best work in America Europe and Asia Geographical diversity of the authors is reflected in the different perspectives devoted to the subject and all major disciplinary developments are covered There are also sections concerning the countries that have made the most significant contributions the relationship between science and industry the importance of instrumentation and the cultural influence of scientific modes of thought Students and professionals will come to appreciate how and why science has developed as with any other human activity it is subject to the dynamics of society and politics

**Brazil in the Making** Carmen Nava, Ludwig Lauerhass, 2006-03-10 This innovative volume traces Brazil s singular character exploring both the remarkable richness and cohesion of the national culture and the contradictions and tensions that have developed over time What shared experiences give its citizens their sense of being Brazilian What memories bind them together What metaphors and stereotypes of identity have emerged Which groups are privileged over others in idealized representations of the nation The contributors a multidisciplinary group of U S and Brazilian scholars offer a fresh look at questions that have been asked since the early nineteenth century and that continue to drive nationalist discourse today Their chapters explore Brazilian identity through an innovative framework that brings in seldom considered aspects of art music and visual images offering a compelling analysis of how nationalism functions as a social political and cultural construction in Latin America Contributions by Cristina Antunes Dain Borges Val ria Costa e Silva James Green Efrain Kristal Ludwig Lauerhass Jr Cristina Magaldi Elizabeth A Marchant Jos Mindlin Carmen Nava Jos Luis Passos Robert Stam and Val ria Torres

**Science, Development, and Environment in Brazil** Luis Eduardo Aragón, Weine Karlsson, Åke Magnusson, Latinamerika-institutet i Stockholm, 1995

*Science and Technology in Central and Eastern Europe* Anthony Tillet, Barry Lesser, 2014-02-04 The political upheavals in the former Soviet Union and its satellite states in Central and Eastern Europe have produced profound social educational and economic changes Once a centerpiece of the communist state the study of science and technology in

the university has now fallen victim to economic and social disarray Support for the teaching and funding of science and technology is of primary importance for the economic health of any modern nation The ten chapters of this work examine what happens to a scientific and technological establishment that suddenly has to make its own way as exemplified in many countries worldwide today *The Global Future of Higher Education and the Academic Profession* P. Altbach,G.

Androushchak,Y. Kuzminov,M. Yudkevich,L. Reisberg,2013-02-05 This is the first book to critically analyze the future of higher education systems in the four BRIC countries Brazil Russia India and China and the USA analyzing academic salaries contracts and working conditions and how national policy will affect the academic profession in each context *Practicing Social Science* Devorah Kalekin-Fishman,2016-12-01 How is the process of globalization effecting changes in the structure of knowledge in sociology This path breaking volume looks at the human dimension of developments in the discipline by compiling a set of interviews that exemplify the life and work of a sociologist today Their ideas and conceptualizations show to what extent a paradigm shift has taken root answering questions such as whether sociology still remains a differentiated relatively autonomous social science The chosen interviewees are about equally divided according to gender and have been selected from among professional sociologists in different parts of the globe with an emphasis on areas that are under represented in English publications such as East Asia Latin America and Africa Analysis focuses on changes which are becoming clear from the on going confrontation between traditional sociology which emerged as a project of modernity and the sociology practiced by sociologists who are called upon to adapt the discipline to the upheavals of the twenty first century
