Space People:

Space, people and technology Amira Osman, Geci Karuri-Sebina, 2023-08-25 In this book there is a call on built environment professionals to reflect on the role of narrative in shaping space influencing people and making decisions about technology. It is argued that by changing the narrative and methods of representations new imaginaries can be generated and the scope of what is possible is significantly broadened. Contextualized narratives, vocabularies and metaphors can evoke new thinking and new practice. This book looks for examples where professionals and communities have jointly worked together from the precinct to the site level. The authors are especially inspired by the ideas of tinkering, muddling through, engaging with the mess and gnarly planning concepts that encourage experimentation and engagement with real life contexts, learning through doing, policy change through evolutionary processes and a hands on approach. This book aims to elevate our understanding of the concepts of people centred participation and co production, co creation by shifting the debate from the esoteric to the applied and contextual. We believe that practice can only be transformed by transforming thinking. Through the development of our own philosophies emerging from and rooted in context we may shift thinking and practice towards people, community and care.

Open Space: People Space Catharine Ward Thompson, Penny Travlou, 2007-09-07 Highly visual and containing contributions from leading names in landscape architecture and design, this volume provides a rare insight into people's engagement with the outdoor environment, looking at the ways in which the design of spaces and places meets people's needs and desires in the twenty first century. Embracing issues of social inclusion, recreation and environmental quality, the editors explore innovative ways to develop an understanding of how the landscape, urban or rural, can contribute to health and quality of life. **Open Space: People Space** examines the nature and value of people's access to outdoor environments. Led by Edinburgh's OPENspace research centre, the debate focuses on current research to support good design for open space and brings expertise from a range of disciplines to look at an analysis of policy and planning issues and challenges, understanding the nature and experience of exclusion, the development of evidence based inclusive design, innovative research approaches which focus on people's access to open space and the implications of that experience. Invaluable to policy makers, researchers, urban designers, landscape architects, planners, managers and students, it is also essential reading for those working in child development, health care and community development.

Space and Time in Mediterranean Prehistory Stella Souvatzi,Athena Hadji,2013-10-15 Space and Time in Mediterranean Prehistory addresses these two concepts as interrelated rather than as separate categories and as a means for understanding past social relations at different scales The need for this volume was realised through four main observations the ever growing interest in space and spatiality across the social sciences the comparative theoretical and methodological neglect of time and temporality the lack in the existing literature of an explicit and balanced focus on both space and time and the large amount of new information coming from prehistoric Mediterranean It focuses on the active and interactive role of space and time in the production of any social environment drawing equally on contemporary theory and on case studies from Mediterranean prehistory Space and Time in Mediterranean Prehistory seeks to break down the space time continuum often assumed rather than inferred into space time units and to uncover the varying and variable interrelations of space and time in prehistoric societies across the Mediterranean The volume is a response to the dissatisfaction with traditional views of space and time in prehistory and revisits these concepts to develop a timely integrative conceptual and analytical framework for the study of space and time in archaeology

Hindu Sacred Space in the Netherlands Priya Swamy, 2024-09-19 This book asks us to consider what is absent rather than what is present when studying religions Priya Swamy argues that absent religious spaces are in themselves abstract locations that painfully memorialize feelings of shame oppression and marginalization She shows that these traumas of absence the complex entwined and emotional responses to absent spaces can be articulated through mob violence and destruction but also anticolonial struggles or human rights issues This study focusses on the absence of temples across the global Hindu diaspora taking the tumultuous narrative of the Devi Dhaam community in Amsterdam Southeast as a central location to detail the over thirty year struggle to build a Hindu temple in a neighbourhood of vibrant mosques and churches In 2010 their makeshift space was pulled away from them provoking tears among elderly devotees rage among board members and devastation in the wider community Leaving their goddess with no place to live some devotees feared for the dangerous repercussions that would follow from uprooting a divine presence from its home By exploring the ways in which the trauma of absent religious spaces has become a formative aspect of localized but also globalized Hindu identity this book rethinks the way that empty lots piles of rubble and abandoned buildings around the world are themselves powerful monuments to the trauma of absent temple spaces that mobilize campaigns for Hindu spaces *Mountain Meadows Massacre* Richard E. Turley, Janiece L. Johnson, LaJean Purcell Carruth, 2017-06-22 On September 11 1857 a group of Mormons aided by Paiute Indians brutally murdered some 120 men women and children traveling through a remote region of southwestern Utah Within weeks news of the atrocity spread across the United States But it took until 1874 seventeen years later before a grand jury finally issued indictments against nine of the perpetrators Mountain Meadows Massacre chronicles the prolonged legal battle to gain justice for the victims The editors of this two volume collection of documents have combed public and private manuscript collections from across the United States to reconstruct the complex legal proceedings that occurred in the massacre s aftermath This exhaustively researched compilation covers a nearly forty year history of investigation and prosecution from the first reports of the massacre to the dismissal of the last indictment in 1896 Of special importance in Volume 2 are the transcripts of legal proceedings against John D Lee many of which the editors have transcribed anew from the shorthand The two trials against Lee led to his confession conviction and ultimately his execution on the massacre site in 1877 all documented in this volume Historians have long debated the circumstances surrounding the Mountain Meadows Massacre one of the most disturbing and controversial events in American history and painful questions linger to this day This invaluable exhaustively researched collection allows readers the opportunity to form their own conclusions about the forces behind this dark moment in western U S history [Handbook on Knowledge Management 2](#) C. W. Holsapple, 2003 The chapters are organized into eight major sections The second volume consists of the sections technologies for knowledge management outcomes of knowledge management knowledge management in action and the KM horizon Novices and experts alike should find it a useful reference *Fighting for Space* Amy Shira Teitel, 2020-02-18

Spaceflight historian Amy Shira Teitel tells the riveting story of the female pilots who each dreamed of being the first American woman in space. When the space age dawned in the late 1950s, Jackie Cochran held more propeller and jet flying records than any pilot of the twentieth century man or woman. She had led the Women's Auxiliary Service Pilots during the Second World War, was the first woman to break the sound barrier, ran her own luxury cosmetics company, and counted multiple presidents among her personal friends. She was more qualified than any woman in the world to make the leap from atmosphere to orbit. Yet it was Jerrie Cobb, twenty-five years Jackie's junior and a record holding pilot in her own right, who finagled her way into taking the same medical tests as the Mercury astronauts. The prospect of flying in space quickly became her obsession. While the American and international media spun the shocking story of a woman astronaut program, Jackie and Jerrie struggled to gain control of the narrative, each hoping to turn the rumored program into their own ideal reality, an issue that ultimately went all the way to Congress. This dual biography of audacious trailblazers Jackie Cochran and Jerrie Cobb presents these fascinating and fearless women in all their glory and grit, using their stories as guides through the shifting social, political, and technical landscape of the time.
