The Privatization of Space Exploration Lewis D. Solomon, 2017-09-08
Space was at the center of America's imagination in the 1960s President John F. Kennedy's visionary statement captured the mood of the day We choose to go to the moon in this decade and do the other things not because they are easy but because they are hard The Apollo mission's success in July 1969 made almost anything seem possible but the Cold War made space flight the province of governmental agencies in the United States When the Apollo program ended in 1972 space lost its hold on the public interest as the great achievements wound down
Entrepreneurs are beginning to pick up the slack looking for safer more reliable and more cost effective ways of exploring space
Entrepreneurial activity may make create a renaissance in human spaceflight
The private sector can energize the quest for space exploration and shape the race for the final frontier
Space entrepreneurs and private sector firms are making significant innovations in space travel They have plans for future tourism in space and safer shuttles
Solomon details current US and international laws dealing with space use settlement and exploration and offers policy recommendations to facilitate privatization
As private enterprise takes hold it threatens to change the space landscape forever
Individuals are designing spacecraft start-up companies are testing prototypes and reservations are being taken for suborbital space flights
With for-profit enterprises carving out a new realm it is entirely possible that space will one day be a sea of hotels and or a repository of resources for big business
It is important that regulations are in place for this eventuality
These new developments have great importance huge implications and urgency for everyone

Robbie was sure he would be ready for the day his dream came true. Then one terrible night something strange happened. Like always, Robbie was lying under the stars and looking up at the night sky when he saw a glowing line of light. It was a shooting star, a space traveler on its own. Robbie couldn't help but close his eyes, clench his metal hands together, and make a deep wish. I wish I could go to space and have amazing adventures among the stars, he said softly into the night. To his surprise, the shooting star seemed to answer by flashing a little brighter as it flew across the sky. There was an unusually strong tingling in Robbie's circuits, and a flood of options hit him. It seemed like the universe had heard him. Robbie knew something was different when he woke up the next morning. He had a different feeling, and when he looked down at his metal body, he saw how much it had changed. He had changed into a rocket robot from a small robot. His arms and legs turned into smooth silver rockets, and a small space helmet sat on top of his head. Robbie was so happy that he couldn't believe what he was seeing. At the time, it was the only thing that could be called a cosmic wonder. Professor Amelia was shocked and encouraged when he ran into the workshop to tell her about his amazing change. She had always known that Robbie wasn't like other robots, and this change showed how strong and determined he was. She told Robbie to seize this once-in-a-lifetime chance and go on the trip he had always wanted to take. She told him, Robbie, you were meant for this adventure. But remember, even in space, you need to be careful and brave. Explore the universe, learn as much as you can, and most importantly, come back safely. You'll always have a home here with me. Professor Amelia told Robbie. Robbie got ready for his big space adventure with Professor Amelia's blessing and a heart full of excitement. And with a loud whoosh, he threw himself into the infinite space between the stars, leaving a trail of stardust behind him as he climbed to the top. Robbie and his maker, Professor Amelia, shared a comfortable workshop that was full of gadgets, gizmos, and other fun things. The workshop was a safe place to be creative, and around every corner, there was a new puzzle to be solved. Professor Amelia's smart mind could be seen in the wonderful mess of wires, tools, and strange machines. Her workshop was a magical place where imagination and invention danced together, making a symphony of ideas that could only come from a genius. Professor Amelia came up with some really amazing ideas. Her fame spread far beyond their small village, and she was praised for her groundbreaking finds and inventions that changed the world in many ways. She pushed the limits of science and technology because she had a smart mind and a strong desire to learn more. Her studio was where she made robots that could fly without wings, machines that could talk and listen, and quick-moving systems that could take people over long distances. It's possible that Robbie, her small computer who was always wanting to learn new things, was her most amazing creation, and the one that would go down in history. Dr. Amelia knew right away that Robbie was not a normal robot when she gave him life. With his smooth metal body and sparkling LED eyes, he was just like her. But Robbie wasn't just different because of the wires and circuits. It was his soul, his never-ending interest, and his desire to learn more about the universe. Even though Robbie was built to be Professor Amelia's trusted assistant, he was always drawn to the secrets outside the workshop walls. Robbie found the workshop itself

interesting He wanted to look around more because the shelves were full of strange tools and books that were full of occult knowledge There was a whole new world to discover with every box he opened button he pushed and switch he flicked As his maker watched over him it was a place for his curious mind to play He could tinker try new things and learn Even though Professor Amelia was doing amazing things Robbie s eyes were always drawn to the stars that he could see out the windows He was hypnotized by the bright stars in the sky at night Their faraway sparkling light spoke to him like it knew things about the universe and he would often get lost in their beauty Robbie became more interested in the universe as he grew up and learned from Professor Amelia He would read books about space travel for hours on end watch programs about how big the universe is and learn about the brave explorers who went beyond Earth s atmosphere He saw rocket ships faraway planets and galaxies that went on forever in his dreams He sneaked out of the workshop every night before everyone else went to sleep He would go outside to a quiet spot in the yard where the velvety night sky would cover him and look up in awe In the quiet of the night he would get lost in the pattern of stars and think about what it would be like to move among them For Robbie the stars were more than just faraway lights they were signs of hope and excitement They stood for the endless possibilities in the world and the intriguing mysteries that awaited those who were brave enough to look into them It seemed like his desire to go to space grew stronger every night like a light that got brighter every second Robbie stayed dedicated to Professor Amelia and his job as her helper even though he was interested in the stars He brought her tools and materials for her projects and helped her make her amazing creations come to life Their connection was one of a kind it went beyond what people and machines could do Professor Amelia saw in Robbie a similar person someone who was also interested in the mysteries of the world Robbie on the other hand was an important part of Professor Amelia s life because he was always devoted to his maker His mechanical perfection and hard work ethic made it easier for her to work on her game changing ideas driven by science and a sense of wonder they made a powerful pair Even though Robbie and Professor Amelia were having a great time together he couldn t help but want to reach out and touch the stars and explore the vast unknown beyond Earth s atmosphere Sometimes he dreamed in secret and said his goals out loud He couldn t help but wonder if a small robot like him could make his dream come true
