**Sovereignty and Jurisdiction in Airspace and Outer Space** Gbenga Oduntan, 2011-09-12 Sovereignty and jurisdiction are legal doctrines of a complex nature which have been subject to differing interpretations by scholars in legal literature The tridimensionality of state territory recognised under customary international law subsists until the present but there are other territories that do not or cannot belong to any state or political entity which also must be accounted for in legal theory The issues surrounding sovereignty and jurisdiction are likely to become ever more pressing as globalisation growing pressure on resources and the need for energy and national security become acute and the resolution of special delimitation

disputes seems likely to become a vital question in the twenty first century As a result of the fast pace of technological developments in air and space activities and the massive increases in air transportation satellite communications and space exploration the need for scholars and practitioners to sharpen their appreciation of the legal and political issues becomes crucial This book will focus primarily on the issues of sovereignty jurisdiction and control in airspace and outer space and their effects on public and private activities but it will also look at related issues pertaining to the Seas and Antarctica Commercial exploitation resource control and the international regime regulating contractual obligations in relation to transportation of goods and services over all forms of territory will be examined to the extent that they are necessary to explain jurisdictional rights and duties over territory Older problems of international law such as crimes in the air and airspace trespass are treated along with newer developments such as space tourism as well as growing demand for private ownership and involvement in outer space exploitation The book goes on to consider the distinction between airspace and outer space and puts forward legal criteria which would allow for the resolution of the spatial delimitation dispute These criteria would determine where in spatial terms the exclusive sovereignty of airspace ends and where outer space the province of all mankind begins and contribute to the jurisprudence of territorial sovereignty and jurisdiction *Space 1999 and Critical Theory* John K. Balor, 2017-11-11

The television series SPACE 1999 was in its first series shaped by the late sixties and early seventies counterculture movements making SPACE 1999 into an example of how certain SF scholars see a natural alignment between science fiction and critical theory However due to changes in the political climate SPACE 1999 went through an ideological reversal in its second series As a result the schizophrenic nature of the series has ever since caused debate This book is written on an idealistic basis It is sold at the lowest price the publisher was willing to accept A free e book version can be downloaded at [www.lulu.com](http://www.lulu.com)

**The Stench of Space** Keevy McAlavy, 2012-11-06 When you do everything right and the universe ends it s a tragedy When you do everything wrong and the universe ends it s fun From the editor A preposterous grouping of obviously random characters thrown together in a haphazard adventure made up without any forethought what so ever Cringe as incompetent self styled newspaper reporter Rogicphil Suflipinic is tasked to save the universe from a bunch of idiots who happen to live on a planet we are asked to believe is made of deodorant Don t waste your time reading this book as you d be better off licking stamps

**At Home in Space** Ben Evans, 2011-09-28 This volume like the others not only focuses upon the individual missions within the decade but also upon key challenges facing human space exploration at specific points within those years from the problems of simply breathing and eating in space to the challenges of venturing outside in a pressurized spacesuit the development of newer and better space toilets and the difficulties of locomotion on the Moon The Eighties was a time when traveling into space far more commonplace Examining in detail the American and Soviet fronts Ben Evans gives a comprehensive analysis of the varying fortunes of the U S space shuttle in the Eighties including its early test flights and commercial flights its problems the 51L tragedy and its aftermath and the

resumption of operations with STS 26 The U S story ends with STS 37 in April 1991 In the Soviet sphere two pivotal space station efforts Salyut 7 and its successor Mir are considered showing how they were alike and different Hijacking United States. Paul D. Taillon,2002-06-30 Terrorism and its manifestations continue to evolve becoming deadlier and more menacing This study considers the evolution of terrorism since 1968 and how airlines and governments have attempted to deal with this form of violence through a series of nonforce strategies Using historical examples we see how governments particularly the United States attempted to counter politically motivated aerial hijacking with metal detectors legal means and finally in frustration counterviolence operations to subdue terrorists As nations witnessed aerial hijacking and sieges the requirement for paramilitary and military counterterrorist forces became a necessity Through use of examples from Israel Entebbe 1976 West Germany Mogadishu 1977 and Egypt Malta 1985 Taillon concludes that cooperation ranging from shared intelligence to forward base access and observers can provide significant advantages in dealing with low intensity operations He hopes to highlight those key aspects of cooperation at an international level which have at least in part been vital to successful counterterrorist operations in the past and as we witnessed again in the campaign in Afghanistan are destined to remain so in the future Hand and Mind David McNeill,1992-08-15 A research subject is shown a cartoon like the 1950 Canary Row a classic Sylvester and Tweedy Bird caper that features Sylvester climbing up a downspout swallowing a bowling ball and slamming into a brick wall After watching the cartoon the subject is videotaped recounting the story from memory to a listener who has not seen the cartoon Painstaking analysis of the videotapes revealed that although the research subjects children as well as adults some neurologically impaired represented a wide variety of linguistic groupings the gestures of people speaking English and a half dozen other languages manifest the same principles Relying on data from more than ten years of research McNeill shows that gestures do not simply form a part of what is said and meant but have an impact on thought itself *Space Science and*

*the Arab World* Jörg Matthias Determann, 2018-01-29 When Sultan bin Salman left Earth on the shuttle Discovery in 1985 he became the first Arab first Muslim and first member of a royal family in space Twenty five years later the discovery of a planet 500 light years away by the Qatar Exoplanet Survey subsequently named Qatar 1b was evidence of the cutting edge space science projects taking place across the Middle East This book identifies the individuals institutions and national ideologies that enabled Arab astronomers and researchers to gain support for space exploration when Middle East governments lacked interest Jorg Matthias Determann shows that the conquest of space became associated with national prestige security economic growth and the idea of an Arab renaissance more generally Equally important to this success were international collaborations to benefit from American and Soviet expertise and technology Arab scientists and officials had to commit to global governance of space and the common interests of humanity Challenging the view that the golden age of Arabic science and cosmopolitanism was situated in the medieval period Determann tells the story of the new discoveries and scientific collaborations taking place from the 19th century to the present day An innovative contribution to Middle East studies and history of science the book also appeals to increased business media and political interest in the Arab space industry

getting home Can the Doctor save them      *Hijacked on a Moon Trek: Saturn Night Fever* Diane Vallere, 2018-09-18 Enjoy this humorous outer space mystery adventure with uniform lieutenant Sylvia Stryker and a supporting cast of quirky aliens by national bestselling author Diane Vallere Sylvia Stryker has found her footing in the Moon Unit Corporation but it ll take more than fancy dance moves for this amateur sleuth to stay alive on this hilarious rescue mission in space from national bestselling author Diane Vallere Space sleuth Sylvia Stryker wants more from her day job aboard a Moon Unit than to manage crew uniforms In her time between moon treks she turns to hunky hero Neptune for lessons in security training But when a hijacked space pod lands by their training site and the body of an intergalactic courier is discovered inside Sylvia s newly acquired skills are put to the test The courier was a friend who shared her interest in back channel business and his death seems like a message or worse a warning Determined to seek justice Sylvia and Neptune assemble a team But there s more to this trek through the stars than expected including fifty rambunctious aliens accidentally beamed aboard the ship some very nasty space pirates and one suspicious member of the staff who thought the recruitment message was a call of duty Now Sylvia s on a quest to catch a killer but if she fails she could wipe out an entire alien race in the process *Hijacked on a Moon Trek* is the hilarious third novel featuring uniform lieutenant Sylvia Stryker If you like humorous mysteries unique characters and spacey fun or read favorites like Joann Fluke or Dakota Cassidy you ll love Diane Vallere s entertaining interstellar series Previously published as SATURN NIGHT FEVER What a fun unique and intriguing story Love the inside joke about red shirts That and the laser cat Lol Thank you for such an entertaining read Reader I am pleased to say that after finishing the third book in the series the enchanting mind of author Diane Vallere continues to charm and come up with even more new fun and adventures around every corner Reader CHAPTER ONE EXCERPT When Neptune said I fought like a girl I did the only respectable thing I hit him That s not to say it s a good idea for dropouts from the space academy to strike their newly appointed superiors but in this case he deserved it In the two versions of the story that will be told of the incident at least one will contain the fact that technically I was in training Technically the only reason we were on the helipad on the corner of Neptune s property was because the helipad was a convenient place to practice Technically I was being paid a small sponsorship fee to test the durability of new uniforms designed for Moon Unit Corporation and technically the only way I could fully know if the uniforms were durable were to see how they held up when I threw a punch Neptune s version might include slight variations In case you haven t noticed I am a girl I said Neptune was bigger older and more experienced than I was and he probably had more important things to do than spend the day teaching me defensive maneuvers But never graduating had left me with relatively few channels to advance my learning After Moon Unit 6 returned from Venus Neptune contacted me via the comm device implanted in my ear and offered me free room and board in exchange for lessons to pick up where my interrupted education had left off I d dropped out when my dad was arrested so I could help my mom with the family dry ice mines Neptune s offer to teach me gave us both something of value I d accepted more for me than for him I m

selfish that way You know why you were almost incapacitated on our last moon trek he asked Because you dropped your guard You thought size and skill were enough to beat your enemy You fought fair You fought like a woman Oh so now I m a woman I countered I grew up fast It wasn t that Neptune treated me like a girl or a woman He treated me like a student And most of the time I was okay with that But the voice in my head that I didn t want to listen to wondered why someone like Neptune spent time training someone like me It was a voice that hadn t had much to question since my dad was arrested Any attention paid to me usually had strings attached Retribution for my dad s crimes or the novelty of my half Plunian background in a world where lavender women were now rare More than once I d fended off advances when I saw where they were headed I developed a thick skin and narrowed my social circle to a very tight group But despite the fact that Neptune was a muscular wall of taciturn authority or maybe because of it I was attracted to him I doubted it was the black military issue cargo gear he wore did he buy his clothes in bulk or the intimidating stance he d perfected long before I met him arms crossed feet shoulder width apart I d never been attracted to men in power in fact power was a pretty tried and true turn off I didn t know what it was about Neptune that made my lavender skin glow at the least opportune times I only knew it was important to me to prove to him that I was different Today different meant throwing a non girly punch He grabbed my wrist and closed my fingers into a fist His hand was twice the size of mine tawny against my lavender coloring You have to toughen up Stryker You re smart and you learn information fast but instincts don t come from a book I learned how to fight by an accredited Hapkido master Or have you already forgotten that I dropped you with a sweeping kick because you underestimated me He let go of my fist and pointed at me Don t let that go to your head Success is built on failure If you learn anything from these lessons learn that Failure is your friend I thought failure wasn t an option The flight director of Earth s space shuttle program said it right His biography was required reading You didn t read the book That s a made up quote from a movie script The flight director liked the line so much he used it for the title of his biography Lesson number two check your source I thought you knew that by now I didn t tell Neptune that I hadn t read the book because the course took place after I dropped out I m pretty sure lesson number three was to keep your weaknesses to yourself Repeat it back to me Blah blah check your source Repeat what I told you about failure Failure is my friend Remember that He turned around and walked a few feet away from me and then turned back If you think you can fight because you dropped me once then you ll get complacent Don t forget what happened the last time you got complacent How could I forget I almost died It didn t help that the fight had been four against one or that my oxygen supply had been cut off rendering me helpless My opponents knew my weakness and used it against me Nothing fair about it I didn t want to admit it but Neptune was right I d falsely assumed I could defend myself without too much effort and my false sense of confidence had worked against me Go again he said He bent his knees slightly and prepared for my attack I swung my arms forward and backward giant half circles to limber up my shoulders and felt a seam tear Hold on Uniform malfunction Moon Unit Corporation thinks they can cut corners

by using a different supplier but the last six uniforms I tested fell apart Where Shoulder Turn around I turned and pointed to where I d felt the split What am I supposed to tell them this time Looks good but you can t throw a girly punch I felt Neptune tug the split fabric together Even though I wasn t looking at him just the graze of his fingertips against my shoulder blade made me flush Why are you wasting your time with uniforms Someday the name Sylvia Stryker will be synonymous with space uniforms After our trip to Venus the publicity company who planned the hype around the Moon Units contacted me to wear test their prototypes It s a little cash on the side between treks and all things considered I can use the money I can t crash here forever I knew Neptune wouldn t pursue the conversation He understood my predicament no planet no family no home He was with me the night space pirates destroyed everything I d ever known The only reason I agreed to train with him was because there s a certain security in spending time with someone who prioritized silence over small talk I could learn a lot from Neptune and I knew it He could learn from me too I wasn t sure he knew that Yet Neptune s loner lifestyle suited him but I was glad that he begrudgingly allowed me to coexist on his property Not one to mooch I made sure to bring what I could to the table Enter Mattix Dusk space courier and my Hapkido instructor who traveled between the thirteen colonies under Federation Control to pick up and deliver anything that needed to be picked up or delivered I introduced the two men and they worked out a mutually acceptable deal Mattix had use of the helipad and a place to crash while on the Kuiper Belt Neptune had access to Mattix s courier contacts and suppliers And for the foreseeable future I had not one but two mentors who could further my education Where Neptune was tall tawny and solid muscle Mattix looked like a piece of worn leather in loose fitting castoff clothes Tanned skin bleached hair worn in a ponytail and ragamuffin clothes suited him His job as courier put him in front of shady characters and he passed along his two most important pieces of advice look like you have less than the other guy and learn to take care of yourself Whatever direction my lesson was supposed to go was interrupted by a swiftly approaching space pod I looked at the sky and watched it glide toward us It was the Dusk Driver the space pod that belonged to Mattix I smiled and waved while backing up so he could land As his space pod drew closer alarm bells rang out from the nearby towers His speed was too fast He was going to crash And if I didn t get out of the way I d burn up in the wreckage Neptune reached the same conclusion before I did How do I know When I tore my attention from the incoming space pod to tell Neptune something was wrong I saw him charge toward me The impact knocked me to the ground Either Neptune knew what was happening and wanted to save me or he was trying to make a point From the bank of dirt alongside the helipad the space pod jerked to a halt and then hovered two feet above the ground Mattix knew better than to approach at the speed he had but he d compensated for the potential accident by activating the ship s invisible buffer a two foot bumper of static electricity that kept the exterior from contacting another surface It operated much the same way as two magnets held in close proximity The dueling forcefields pushed away from each other making it impossible to touch Mattix wouldn t have activated the buffer shield unless something was wrong I scrambled to my feet and keeping my center of

gravity low approached the space pod Mattix wouldn't allow anyone else to navigate the ship without reason which made what I saw even scarier The ship was being flown on autopilot \_\_\_\_\_ It is set in outer space but keeps a true cozy mystery vibe to it at the same time Reader Hijacked on a Moon Trek was another fantastic addition to this series Sylvia and the gang are back in what is quite possibly the best installment yet This series is quickly becoming one of my favorites I can't get enough of it Reader This was the best in the series so far with added depth in backstories for several of the characters Reader For fans of Star Trek Star Wars Dune UFO The Orville Galaxy Quest Lost in Space and The Jetsons Diane Fans describe her vintage Vallere goodness and say she is a great storyteller with a way with creating strong female characters and intrigue who is a superb and very humorous writer Her gift of creating spunky sleuths in fun settings take readers to Dallas Palm Springs Los Angeles Pennsylvania and outer space **A Police Bibliography** Jack E.

Whitehouse,1980 **Space Governance** Hamid Jahankhani,Stefan Kendzierskyj,Sina Pournouri,Maria A. Pozza,2024-07-31 This book delves into the complexities of space governance offering innovative solutions for a sustainable future From the pressing issues facing space governance today to creating a consensus on responsibility ethics and frameworks we aim to answer key questions i What are the current challenges ii How do satellites impact society iii What are the potential negative consequences From communication and early warning systems to global broadcasting and navigation satellite technology plays a pivotal role in our daily lives However this reliance also exposes vulnerabilities as any disruption to satellite systems could have disastrous consequences across multiple industries The rapid development of satellite technology including drones and UAVs has ushered in a new era of exploration and exploitation Yet this progress brings with it new challenges particularly in terms of governance As satellites transcend national boundaries the dynamics of space governance become increasingly complex with various entities pursuing their own interests without always considering the broader implications This book bridges the knowledge gap surrounding space technology and highlights the need for increased governance frameworks data protection and disciplined deployment By addressing issues of control privacy and security we pave the way for a more sustainable and responsible approach to space exploration Join us on this journey as we navigate the evolving landscape of space governance and chart a course towards a brighter future for all
